OFFER FOR SALE

sell out of tap stock BY DAVID MARSH

Second

DEMAND FOR Government bonds picked up further momentum yesterday with the exhaustion of the second gilt-edged tap stock. In spite of City hopes that this week's fall in long term bond yields would spur an early fall in bank interest rates, there is still, bow-ever, little chance of an early reduction in the Minimum Lend-

ing Rate.
The early morning sell-out of the £1bn short dated tap stock, issued this week, 14 per cent Treasury 1984, took the total volume of new Government bonds sold over the past two days to about £1.5bn. Following Thursday of the long term tap, 14 per Treasury 1998-2001, the market will be operating without a regular tap stock next week.

To ease pressure on the money market caused by the gilt-edgad sales, the Bank of England last night announced the temporary release of about £1bo of special deposits held at the central bank by the banking

Honda to build car assembly plant in U.S.

BY RICHARD HANSON IN TOKYO AND IAN HARGREAVES IN NEW YORK

HONDA MOTOR, which recently public switched its affection entered into a car production the first Japanese motor company to build a car assembly plant in the U.S.

MESARY

The move comes at a time when lay-offs in the U.S. motor industry bave reached more than 200,000. It follows intense U.S. Government pressure on Tokyo to cut car exports and undertake instead direct investment in the

American car industry.

Ford Motor, which lost its second place ranking in the U.S. car sales league last year to the combined importers, announced the permanent closure yesterday of its Los Angeles plant for manufacture of large cars, with the loss of over 1,700 jobs.

Construction of Honda's plant, with a capacity of 10,000 units a month, will begin this year for completion in 1982 on a site next to Honda's motor-cycle factory near Columbus, Ohio.

The plant would be about a third the size of the Volkswagen of America Rabhit (Golf) plant which blazed the trail for foreign investment in U.S. car assembly

with American Motors. Honda's decision came sooner

than generally expected. Toyota and Nissan, the two leading Japanese car manufacturers, are also considering setting up plants in the U.S. and the early decision by Honda may spur them to action. Honda ranks third among

Japanese exporters and is the fourth largest seller in the U.S. market, which bought a record 2.3m imported cars last year. representing 21.5 per cent of total sales as the American Honda plant details, Page 23

small. fuel-efficient toward

behind Honda's decision to invest an estimated \$200m in the U.S. is its extremely heavy dependence upon the American market. Last year, the company exported more than twothirds of its car production, and 65 per ceut of these exports went to the U.S.

Honda would therefore be the hardest hit among the Japanese if the U.S. Government were to impose restrictions on foreign car imports. The Administration has been under fierce pressure from the powerful United Autoworkers' Union either to stem Japanese imports

or to demand direct investment. Detroit's leading motor industry executives have also made it clear that they expect the Japanese to invest in the U.S. and create jobs in the way that Ford. Chrysler and General Motors have all done in Japan

in rerent years. The Japanese Ministry of International Trade and In-dustry, which welcomed the Honda move, reacted to this pressure earlier this week by calling in motor industry eaders to explain its anxieties. Japan is exposed to the possibility of import protection moves in a number of other sectors. including steel and electronics, and there is a desire in hoth Washington and Tokyo to avold

confrontation.

The Honda decision to move into U.S. car assembly was influenced by the success of its three-month-old production line for motor-cycles.

U.S. may urge emergency wheat reserve

BY DAVID BUCHAN IN WASHINGTON

THE United States is expected to call for an emergency world wheat reserve when officials meet representatives of other grain-producing countries today. But the orime aim of the meeting will he to work out a unified grains sales policy towards the Soviet Union.

Argeotina has said it will not commit itself to withholding grain sales from Moscow, following President Carter's han on sales of 14.17m tons of U.S. grains to protest at the Soviet intervention in Afghanistan. But other grain-producers represented at today's meetings-the European Community, Canada and Australia—have indicated they will refrain from filling the Soviet shortfall.

The Carter Administration has already said that it would hav sultations, Mr. Norman Hillierthe 37m tons of wheat due to he sold to Moscow and divert it to bilateral food aid programmes. But Agriculture De-Herr Helmut Schmidt, the partment officials said vesterday West German Chancellor, plans that overall U.S. wheat stocks a visit to Washington, prohably are high enough now to allow a in March. The visit was substantial U.S. contribution to arranged during a telephone a world reserve.

The Administration has committed itself to "isolatinn" from U.S. markets the cancelled Russian grain contracts, which included some 10m tons of maize to prevent U.S. prices from plummeting. It has said it will put the grain back on the leader, yesterday defended his market only when prices on party's uncritical stance on the market only when prices on commodity exchanges start to rise again. A world reserve would help take some of the oversupply off the U.S. markets, officials here believe.

Meanwhile, Mr. Cyrus Vance. the Secretary of State, said yesterday in a television Interview that the administration for the moment planned no new economic or diplomatic reprisals against Moscow.

The President, Mr. Vance said, would prefer the summer Olymypic Games to go ahead as planned in Moscow, hut that no decision had been firmly taken on whether the U.S. should try to get the venue changed. This prospect was raised this week by Mr. Walter Mondale, the Vice President, who sald while cam-Soviets should not be allowed to

The first result of the closer American imperialists.

Some details of the President's news conference were published earlier by the Soviet TASS news agency.

But Western correspondents

The first result of the closer relationship has emerged in the visit to Peking by the U.S.

Defence Secretary Harold Brown. The trip, scheduled last autumn and only by coincidence taking place at this crucial moment, has produced an agreement that the U.S. will supply technology with defence applications, that China should send a military mission to the U.S., and that the defences of Pakistan should he strength-

Whether the U.S. would have played its "China card" more into Paklstan's Baluchistan obviously and sent Mr. Brown to Peking even if his visit had not been pre-arranged is a mootpoint. In spite of its concern, the U.S. has not reneged on its long-term policy not to supply arms to China. But Washington The refugees said the rebela has made it quite clear that the were attacking military con- ground satellite station it has north-east from Kandahar to already agreed to supply has

The U.S. Defence Secretary said the Chinese had not asked dependent on airlifts for for weapons, but a more

ONE of the gravest reasons why better U.S. understanding of China's military needs will probably mean Washington will look more favourably nn the supply of arms-related equipment by its allies such as Britain and France.

It is true that uptil now China's economic difficulties have meant that most discusfied that the Soviets have so sions on arms sales have not got past the talking stage. But the current crisis may concentrate Chinese minds un their military inadequacies. If contracts materialise the question of getting such deals through the Western arms sales control hody CoCom should become much

The Afghan affair probably spells doom for the Sino-Soviet talks on bilateral relations The object was to resolve Government - to - Government differences, and improve contacts such as trade. There was a strong (though not un-animous) view in the West that at least some Chinese leaders wanted to move back to a more central position between Washington and Moscow.

With a new flexible leader-ship in Peking the dispute between the parties over doctrine was dormant. Although Chinese suspicions of Soviet "hegemonism" was still a factor, Peking aeemed keen to improve the relationship for purely practical reasons. While the talks may eventually resume, the atmosphere for real progresa will have been effectively poisoned.

The Chinese do not themselves feel threatened by the Soviet move as their own border with Afghanistan is only five miles long and in wild and monntainous country. But they

GEORGE MEANY A labour leviathan

MR. GEORGE MEANY, whose irnn will and powerful intellect enabled him to dominate the American labour movement for a generating, died on Thursday night in Washington. Only twn mnnths earlier, the 85-year-old Mr. Meany,

looking gaunt and frail and speaking from a wheelchair,

had finally announced his retirement as president of the American Federation of Labour and Congress of Industrial Organisations (AFL-CIO). He had held the presidency since the merger of the AFL and the CIO in 1955, a union he had pressed for since his election to the presidency of the AFL in 1952. Mr. Meany was born in Harlem in New York in 1884, started work at 16 as a plumber but by 1923 had hegun his long career as a union official. It stretched from a period which saw workers fighting often violent battles with company-paid things for the right to organise, through the growth of "husiness unionism" and, earlier this year, the first appointment of a top union official to the board of a major corporation, Chrysler.

But it is with the growth of business unionism " that Mr. Meany has been most closely Identified-and at times criticised by the more leftward leading American unionists.

Mr. Meany had little time for Left-wing ideologies and saw trade unions primarily as an instrument for improving the working conditions and the wages of workers and ensuring that organised labour in the U.S. was able to wield its power effectivety in pursuit of its goals. He once remarked that militancy was often a way of seeking instant solutions to complex problems. In the past decade, criticism of Mr. Meany's leadership had been growing steadily, partientarly since the election of President Jimmy Carter.

Sweden's Left calls for price freeze

A DEPARTMENT of the En-ranging from £136 to £7,600, tainty in an appraisal of the vironment study published over 20 years. vironment study published yesterday showing that substantial profits might arise from the sale of council houses to tenants totally conflicts with the findings of a report by the same department 18 months

The latest study suggests that, over 20 years, a profit of up to £7,600 might arise on each council house sold. A similar appraisal carried out 18 months ago, however, ahowed that losses of up to £8,535 might emerge over a similar period.

The department said yesterday that, as the first study was never published, it did not feel able to comment nn any dis-crepancies that might have emerged. The report showing losses was widely leaked to the Press shortly before the publication of the Housing Bill.

The new appraisal appears much more comprehensive than that carried out slightly more than 18 months ago and covers an extensive range of options of the likely impact on the public purse over periods ranging from one year to 50

However, in every case considered, the sale of a conneil

Mr. Heseltine, however, said surplus of £9,218, depending on that the appraisal represented what view was taken of future "a most rigorous, sophisticated and comprehensive attempt to assess tha financial effects of the sale of council houses." It showed in all cases that, for the first 20 years, council house sales would financially henefit authorities and the

> . The report concludes that, on current interest rates and rent levels, the gain in the first year of a conneil house sale would be between £2,364 and £2,481. That agrees with most other recent studies, including the institute's, which generally accept that profits will arise in the first year.

The report also analyses actual of council houses in 1970-1971, which, it says, shows that average gains on each sale, after allowing for lost rent and subsi-

dies, amounted to £1.127.

Much debate is likely over the
Department's analysis over the longer period, conflicting, as it does, not only with its earlier findings but also with reports conducted by, among otbars, Shelter, the organisation for the

Seek EEC mine grant, says Owen

By Richard Evans, Lobby Editor

THE GOVERNMENT was urged y Dr. David Owen, Opposition Energy spokesman, yesterday to apply immediately to the European Community for a £15m to £20m grant for the coal industry.

Dr. Owen, speaking at Stanley, Co. Durham, said that this would henefit the industry hy preventing pit closures and redundancies, and be a modest step toward reduction of Britain's financial contribution to the Common Market Budget.
A grant would ensure that the Coal Board could offer

Corporation at a price allowing it to import no further coking coal for this year. Dr. Owen thought it an absurd situation that Britain, at a time of world energy short-

coking coal to the British Steel

age, was reducing her own coal production. present the Governmen was refusing to pay the money to the Coal Board, and this was

a dogmatic and short-sighted decision which ought to he There could be no justification for the Government's not approaching the EEC. In 1978 West Germany had spent £237m in conformity with Common Market rules in supporting the

BY MÁURICE SAMUELSON

shut down this weekend because of welding faults discovered last year in one of its twin reactors and the decision to advance the inspection of the

The Central Electricity Generating Board said that there was no health hazard. Elactricity supplies would not be affected.

The station's No. 1 reactor was shut down after the discovery last May of welding defects in the cooling-gas pressure circuit.

As a result, the No. 2 reactor is being closed for inspection two months before schedule. The process will start this

weekend and should be completed by Monday night. The advanced shutdown is a prudent measure. There is no

DUNGENESS "A" nuclear public or to the staff at tha will be carried out on the helpower station, in Kent, is being station. Electricity supplies to lows units of the No. 1 reactor tha public will not he affected,"

The 550-Mw station is one of Britain's first-generation Mag. say at this stage when Dungenox stations and has been in service sinca 1965. It uses carhon dioxide gas as its coolant instead of water, which is favoured for U.S.-designed re-

Dungeness "A" has given one of the hest performances of Britain's first-generation plants. Its No. 1 reactor was closed last spring for investigation of welding faults found in steel ballows associated with cooling. The board said yesterday that the faults appeared to have been present when the bellows were manufactured and did not develop during the operation of

the reactor.
Inspection was likely to take several months. "Remedial work

and similar work may be necessary on the No. 2."

Although the hoard could not ness "A" would resume clectricity production, confident that the station would be hack in service this year.

Until then, however, filling the gap from other parts of the national grid will involve greater use of coal. It will cost \$80,000 a day, which, over several months, might run into millions of pounds.

The defects were shown up by ultrasonic testing equipment not available when the station was completed 15 years ago. Dungeness "A" is one of the board's 16 Magnox reactors.

Dungeness "B" completed last year 10 years behind schedule,

A little more wit and originality at Treasury

BY PETER RIDDELL, ECONOMICS CORRESPONDENT

THE SENIOR Treasury appointments announced yesterday involve promotions for some of the key officials who will advise successive Chancellors of the Exchequer throughout the 1980s. Among those affected are a possible future official head of the Treasury ane one of the laading monetary experts in the Department.

The appointment of Mr. Bill Ryrie as second Permanent Secretary in charge of the domestic economy and of Mr. Peter Middleton and Mr. David Hancock as Deputy Secretaries of the home and overseas sectors, respectively, are hardly surprising to Whitehall watch-

ers. Each has been closely marked past government as well as the present one.

The appointments are much more conventional than, say, the decision to hring in Prof. Terry Burns of the London Business School as Chief Economic Adviser, but they nonetheless represent a definite addition to the originality and liveliness at the top of the Trea-

Mr. Ryrle, 51, takes over from Sir Lawrence Airey who has just become head of the Inland Revenne. Mr. Ryrie has just returned after four yeara as the senior Treasury representative in Washington and the UK Executive Director of the International Monetary Fund and

He earned high praise thera from all sides, particularly for his work during the lengthy and delicate negotiations between the UK and the IMF in 1976. He is a man of considerable

charm and openness, although he has a reputation for possessing a sharp tongue and an unwillingness to suffer fools.

He will be responsible for tha whole of the domestie economy apart from public spending, and is mentioned as one of the most likely successors to Sr Douglas Wass, the Permanent Secretary, in a few years

One of Mr. Ryrie's deputy secretaries will he Mr. Peter Middleton, 45, one of the Treasurv's genuine characters. He is a witty extrovert of undoubted cleverness whose taleots have recently heen employed princi-pally on work on the impact of monetary influences upon the economy and the balance of payHe has been closely involved

Mr. Peter Middleton

In the internal studies on Britain's contributions to the EEC budget. For his work on the monetary side Mr. Middleton has become a familiar figure In the City, and is still highly regarded in Fleet Street from his days as the Chancellor's press secretary in the mid-1970s

He was highly regarded hy Mr. Denis Healey and is believed to have impressed Sir Geoffrey Howe in the past eight months, since he was one of the few officials who correctly warned the Chancellor about the monetary risks being taken in the Budget.

Although he is no doctrinaire monetarist. Mr. Middleton's views are closer to those of the

Mr. William Ryrie

present Ministers' strategy and philosophy about the economy than those of some of his Treasury colleagues.

His new joh will involve responsibility for both fiscal and monetary policy. present occupant of the post, Mr. Jeffrey Littler, is moving sideways to hecome Deputy Secretary responsible for general public spending policy. The other important promotion involves Mr. David Han-

Mr. Hancock has great experi- from outside the Bank.

ence of the EEC since he worked in Brussels as the Treasury representative in the early to middle 1970s.

He marked himself out for promotion-particularly in the eyes of Sir Douglas Wass-following his work in 1975 on the major internal restructuring of the Treasury. This resulted in the present broad division into

three sectors of overseas, domestic and public spending. These appointments are only the first stage of a series of moves among top Treasury officials. Other changes will have to be made to fill the gap left hy Mr. Middleton—Mr. Hancock's successor. Mr. Roger Lavelle, named yesterday—and a further promotion will be required later this year when Mr. Fred Jones, the Deputy Secretary responsible for indus-

trial policy, retires.
The vacancies which have led to the current reshuffle have been partly the result of retirements and partly of postings

outside the Treasury.

Moreover, later this year, there are expected to he aignificant changes at the senior levels of the Bank of England. There is already much speculation about who might take over from Sir Jasper Hollom, the Deputy Governor, if he decides not to stay on for a further term.

Mr. Christopher Dow, the present Executive Director on the economics side, is also expected to retire within the next couple of years.

There is particular interest to see wbether Mr. Gordon Richardson, the Governor, will promote some of the officials and economists whom he has brought in

BY ARTHUR SMITH, MIDLANDS CORRESPONDENT SIR KEITH JOSEPH, Industry Secretaryreception in Birmingham yesterday is pictured above—offered no concessions yester-day in his first face-to-face talks with steel union strikers. He refused to intervene in the dispute, arguing that it was a matter for

management and unions.

Sir Keith was stony-faced when confronted with 1,000 booing and leering steelworkers when he arrived for a routine visit in the

Protected by a police cordon, he passed through workers who list come from Wales and many parts of the UK for the demonstrations. Sir Keith was in Birmlngham for talks with regional officials of the TUC and Confederation of British Industry. Mr. Roy Bishop, Midland divisional nfficer nf the Iron and Steel Trades Confederation said afterwards that it was clear from Sir Keith'e attitude that it would be "a long, The Industry Secretary had made clear

that although it was in his powers to intervene, he would not do so. He rejected an appeal from the union delegates to dismiss Sir Charles Villiers, British Steel Corporation chairman. He tuld press conference afterwards: "I think the chairman is coping with a set of inherited problems in the way best suited to the national interest, the taxpassers' interest, and the

steelworkers"interests. Questioned about the possible length of the strike, Sir Keith conceded that he could see no settlement in the immediate future.

Pickets arrested after barring lorry's entry to stockyard

Work on schedule in London's derelict dockland project

BY ROBIN PAULEY

improved significantly according to the Docklands Joint Gonmittee in a report released yesterday.

The Operational Programme 1978-83 shows that work on the infrastructure for the 5,000acre site has caught up and is on schedule.

The provision of industrial and commercial floorspace has shown a dramatic improvement, with s total of 413,000 sq metres completed or planned within the docklands industrial zones and a further 62,000 aq metres outside those zones. This total of 475,000 sq metres still represents a shortfall of 137,000 sq metres compared with the Strstegic Plan target for floor-

The latest report says the deficit could be eliminated hy further development at the London Industrial Park and the release and redevelopment of the Limmo site.

Housing progress in Docklands, which straddles five London boroughs in the East End has been slower than expected in the Strategic Plan, published in 1976. The target was for 6,600 units by the end of 1982 but the revised figures indicate s total only 4,266 completions by

However, the report is hopeful that by 1986 the programma

changed its plans.

announced there this week.

PROGRESS in redeveloping will have caught up to the tar-London's derelict docklands has get of 13,800 completions—if the programme is not modified by any new financial constraints.

The joint committee is composed of members of the five docklands boroughs, the Great-er London Gouncil, the Port of London Authority and community representatives. though the committee is rolling the programme forward a question mark still hangs over, what the new Urhan Development Gorporation to be set up under the Local Government Planning and Land Act will do.

The development corporation will have a host of wide-ranging powers, similar to those enjoyed by new town development corporations, although the exact extent of the powers bas still to be defined.

It is heing set up by the Government to mastermind the redevelopment of the docklands and may leave the joint committee without a function. The committee says Govern-

ment alocation for Docklands for 1979-80 now stands at £19.73m, having been revalued at 1979-80 prices to take account of inflation and other adjust-

For the financial year 1980-81 the previous Government had intended to Increase the allocation to £20,4m at November 1977

But the present Government has announced that urban programme resources for 1980-81 will he limited to 1979-80 levels in real terms. As the allocation will be less than expected, adjustment in some areas of the programme will be necessary.

Schemes for three of the four district shopping centres are planned to begin development on time, but the fourth, on the Isle of Dogs, is being studied further to establish its feasi-

The strategic Plan for schools is also to he re-examined because of the declining number of pupils on the rolls within the Inner London Education Authority area.

One area where redevelopment is ahead of schedula is in the provision of parks and playing fields. By 1982-83 the area will have a planned total of 116 hectares of open space compared with a target of 60.69 bectares, e figure which will already hava been pased in

Development has now reached a stage where tha question of whether certain major projects should proceed has become largaly a matter for Government decision, says the report. They are tha Northern and Southern relief reed schemes, the East London River Crossing project and the extension to the Jubilee underground line.

Belvoir 'essential for future fuel supplies'

FAILURE TO open new coal mines such as those proposed. for the Vale of Belvoir could endanger England's future fuel supplies, the public inquiry at Stoke Rochford was told yester-

Strongly worded support for the National Coal Board's proposals to mine 510m tonnes of coal from Leicestershire, Notts and Lines came from its largest customer, the Central Electricity Generating Board.

The NCB and CEGB are heavily interdependent As Mr. Raymond Razzell, general policy engineer for CEGB. pointed ont: 'In 1978/79, 62 per cent of the NCB's output was parchased by the CEGB, and 721 per cent of energy used for electricity generation by the CEGB came from coal."

There was no long term contract between the two boards, although an understanding had recently been reached that the NCB continue to supply 75m tonnes a year for the next five

nuclear strategy this depended on the hacking of successive governments and on public acceptability.

the CEGB had adopted

In the Trent valley, coal-fired power stations provided 22 per cent of the electricity supplied by the CEGB. Mr. Razzell said these were "expected to play a major role in meeting demand in the 1990s."

He added: "If the Belvoir coal field is not developed and it becomes necessary to transport coal from outside the area, the order of the additional cost bas been estimated by considering the transport of coal from the mines at Selhy, Kellingley and Thorne to the centre of gravity of the stations between Willington and High Marnham, rather than Belvoir. The additional costs amount to £8m per

annum in today's money. "In the long term, the CEGB must clearly rely on both coal end nuclear power, and failure to develop new coal mining capacity could endanger future Mr. Razzell said that although fuel supplies."

angers civil servants

LABOUR

By Philip Bassett, Labour Staff

CIVIL SERVICE unions yester-day warned angrily of industrial sction if the Government tried to circumvent the pay compara-bility system by sticking to its decision to provide for pay increases of 14 per cent in the cash limits covering public service workers.

Mr. Bill Kendall, secretary. general of the staff side of the Givil Service National Whitley Council, the umbrella body covering all nine public sector uninus, said that if the Government departed from the Civil Service pay agreement by enforcing cash limits then "I state as a fact that there will be industrial action."

He was responding to the disclosure that the Cabinet is to calculate its forthcoming cash limits for the public services on the basis of a 14 per cent annual increase in earn-ings. The decision was spelt out in a confidential Treasury

If there were an an attempt "artificially" to interfere with the Service's pay agreement, there would be "one hell of a row," ne said. Independent pay comparability studies, which form the basis of the Service's

pay agreement, are showing rises due of 17-18 per cent.

Despite the disclosure, the Civil Service unions would continue to operate on the basis that the national psy agree-ment was still in effect, Mr. Kendali said. The unions, though, are likely to seek speedy clarification of the Government's position. disclosure

Cabinet's decision caused considerable embarrassment in Whitehall yesterday. Official sources were insisting that the wording of the Treasury letter was being misinterpreted.

for being allowed to complete The Civil Service Department said that in line with state-ments by the Department and the Treasury to Commons select committees, the cash limit for the Service had not heen set and would not be fined until after the final entcome of the Pay Research Unit comperabistudies became known,

prohably next month.

The Department was also keen to point out that in any event the wording of the letter did not refer specifically to the Civil Service, but was in connec-tion with the cash limits for the more general public service

Carton factory iobs to go

By Our Labour Staff

THE AMERICAN-OWNED St. Regis International announced yesterdsy that it intends to close its folding-carton factory in Liverpool, making 417 ployees redundant. St. Regis said the factory.

Tillotson's (Liverpool), had lost money for all hnt two of the past 12 years. It produces car-tons mainly for the cigarette tobacco industries, the remainder of production going to confectionery, frozen foods and drinks.

The company said the demand fer folding cartons this year would not rise and would he further hit by a falling demand for cigarettes. Tillotson's has operated in Laverpool since

Union officials are to he asked to give their views on the closure proposals in talks with management. St. Regis said last night that it "will explore in full any suggestions designed to make the operation commercially successful."

Liverpool's port can prosper, chief says THE 1980s will be the decade

of the survival of the fittest docks, Mr. James Fitzpetrick, managing director of the Mersey Docks and Harbour Gompany, has warned its 8,000 employees. But he predicted that Liverpool's strategic position would make it e survivor if the port

fought for every ship and ton Writing in the company journal, he said Liverpool bad demonstrated its adaptability by

meeting the traumatic changes of the 1970s. In the 1980s rising fuel costs will make road transport a bigger part of the cost of goods. "A port like Liverpool, which is strategically placed, will have a great advantage."

More holidays in settlements

NEARLY 40 per cent of pay deals reported to the Confederation of British Industry pay data bank contain agreements to in-

erease holidays. Claims for longer holidays and shorter working hours are in virutally all current negotiations. Although employers seem willing to concede extra holidays, few deals contain shorter work weeks.

14% limit Whitelaw spells out police role in picketing

BY RICHARD EVANS, LOBBY EDITOR

THE ROLE of the police in breaches of the peace occur. industrial disputs, particularly those involving picketing, was spelt out last night hy Mr. Wil-liam Whitelaw, Home Secretary, takes place—and there could be In a speech that emphasised the neutrality and independence of the police.

The Home Secretary said in Carlisle, that the police were not there to serve the interests of one side or another, or to enforce claims or complaints by one party to a dispute. These were matters that had to be dealt with through civil law.

In his view, the police had duty to preserve order, to pre-

tent the criminal law being broken and to deal with those wh did break it.

Criminal law, however, affects criminal law, how

Pay dispute grounds 21

BY NICK GARNETT, LABOUR STAFF

BRITISH AIRWAYS cancelled rise worth 17 per cent linked to 21 flight services yesterday, five long-haul, 12 European and four domestic, because of industrial action by maintenance engin-

eers over pay.

The zirline said it expected to make all long-haul flights today but that there would be 16 cancellations—13 on the European department. pean service and three domestic ment that they want a "no flights. National union officials on the

airline's national joint council, the corporation's top negotiating tier, are due to meet naion officials on the engineering and maintenance national sectional panel on Monday to discuss the ection.

Mr. Stan Havill, secretary of the joint unions committee at Heathrow, said he expected the national officials to put a proposition to them in the hope of

restarting negotiations
The airline bas offered a pay

ments through Parliament to establish the framework of the criminal law-it was for the police to enforce it. Finally, it was not the con-cern of the police to say who might or might not picket or

Unit Trust Notebook No.23

Yields

What is Yield?

The yield of a unit trust is the estimated yearly income, in pence per unit, expressed as a percentage of the offer price of the units.

How is the yield calculated?

The estimated yearly income is based on: The dividends paid by each company in the trust's investment portfolio during the latest completed financial year. Estimates are adjusted to take account of forecast increases or decreases in dividend or alterations in companies' financial structure. If assumes that the value, size and income

following twelve months. Income arising from the fixed interest and cash elements of the fund.

from this source will remain static for the

Less estimates in respect of tax, professional fees and other charges.

The resultant sum is then grossed up at the current basic rate of tax, converted into pence per unit and expressed as a percentage of the unit offer price. Before or after tax?

Yields are quoted gross. Income tax is payable on the distribution and the investor receives the net amount together with a tax credit.

Can unit prices change without the yield changing? Any change in unit price will always affect the quoted yield unless the estimated yearly income and the offer price maintain the same ratio; the

yield will then remain constant. Some yields in 1979 reached 13%. The average yield was 5%.

uncertainties. Another factor has been the attitude of the club-like institution, Lloyd's of London, Will it relax its rule that insurance interests outside its market should not normally hold more thao 20 per cent of an approved Lloyd's broker.

If the rule stands it could affect the bid package planned hy Marsh and anger an in portant prodocer of the market's business. The Lloyd's committee decided that the best course of action was to do nothing until a report into self-regula-tion of its market by a working Asher is ready in April. But the signs are that the 20 per cent rule will go, and it should not be constraint on Marsb moving it on Bowring.

It was unsurprising then that 231.61 227.45 230.20 last week insurance brokers were one of the most actively traded sectors in the stock-

uousual series of moves, has market as speculative buyers sought to identify the next UK broker which might fall into American bands.

Westland Aircraft has come a long way over the last 12 At the beginning of 1979, the sharea were languishing at 31p, little more than a third of net worth, and the whole future of the group had been cast in doubt by problems with the Lynx hellcopter and Super 4 bovercraft. Losses and provisions on the Lynx in the previous two years added up to £19m, while a contract with British Rall Hovercraft bad

brought losses of £4.75m. But during 1979, Westland at last started producing the Lynx at a regular enough rate to make profits, and the bovercraft contract was completed. As a result, profits have jumped to a record £15.3m pre-tax, and the sbares were pushing up towards 70p this week.

Westland is capable of mak-

ing significantly bigber profits this year and next as it completes its unprofitable belicopter contracts. future of the Lynx depends on Westland's ability to pick np some big army orders—so far, most have been sold to navies. And sometime in the latter half of the 1980s, if all goes to plan, the group will start to deliver the replacement for its ageing The bope is that this will take the company into the rapidly growing market

Lynx experience, there are directorships, Highland should obvious questions about the not coosolidate its share of financial costs of delivering a Robertson's profits. brand new helicopter.

The shares currently yield under 9 per cent on a divideod covered roughly 14 times by current cost earnings. They seem high enough for the time being.

Spirited response

As Hiram Walker-Gooderbam and Worts proposed a reverse takeover into a Canadian utility company, Highland Distilleries sent a strongly worded letter to its shareholders urging rejec-tion of Hiram Walker's £80m cash offer.

The rejection was issued just over a week before the offer and condemned the Canadiao attempt to present the commercial benefits of the deal as "totally unconvincing." The document was long on the advantages of independence and short of any hard financial pro-

Glasgow brokers say that few shareholders bave accepted the 130p offer and the Highland sbare price, at a premium of 10p and more to the terms, suggests that the Caoadiaos will attractive inducements. Little

some of its powder dry. Unofficial estimates, bowever put Highland on course for £4.6m last year. That takes in only dividend iocome from Highland's 34.5 per cent stake in the "Cutty Sark" group,

Assuming Highland consolldates, the share of Robertson profits in calendar 1978 (latest figures are not vet available) would he worth around £1m pre-tax, net of the attributable dividend, to leave fully taxed bistoric earnings at 5.47p per share. Brokers are reasonably coovinced that Robertson's

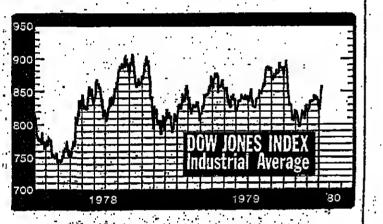

earnings bave grown in 1979, addition, defeoce document insists that the company has not incurred a mainstream tax liability for this basis, the exit p/e for last year would bave been around 12 including a full contribution from Robertson and Baxter.

certainly wait for a bigber offer. The new link with a Canadian utility is certaioly thought to complicate matters.

A hectic, but encouraging week

ON OCTOBER 11 last year I- the day, excitement was in-interviewed a grey-faced and creased by a report from Mr. weary Mr. Alec Chapro, senior floor partner for Drexel-Burn. Department's chief economist, York's biggest securities firms. to have grown by 2 or 3 per cent. The cause of Mr. Chapro's last quarter, double the preat the end of a week of chaos on the New York Stock Exchange after the inflationfighting monetary policy an-nounced by the Federal Reserve

the previous weekend. The highlight or lowlight of that week was the chalking up

NEW YORK

IAN HARGREAVES

of the busiest day in the big board's history, when over 81m shares were traded. Chapro's most surprising com-

ment in our conversation was

his firm belief that the share volume record set in the market collapse would soon, within a few months be believed, be exceeded on a rising market. It seemed an odd forecast and one based more on intuition than on any systematic analysis, but this week it very nearly came to pass. The daily record set on October 10 was not surpassed, but it seemed certain that with strong trading yesterday a new weekly record would be set.

The bectic pace of the week and the strength and breadth of the rally took most observers by surprise. None of the mnchdiscussed problems of the international political crisis, speculative fever in gold, uncertainty about interest rates and economic growth, abated. What happened was a combination of circumstances, which is best explained by a daily diary.

Monday was the exchange's first full week of trading after the holiday period. In moderate to heavy trading, buyers maintained pre-Christmas interest in defence stocks whose fortunes started upwards with the Iranian confrontation and which are now shoulder high on the emergency in Afghanistan.

The other positive development was a spurt of interest in companies thought likely to profit from President Carter's plans to convert embargoed Soviet grain into gasohol. Companies like A. E. Stanley and Archer Davies Midland did well as a result. The Dow Industrial Index went up 3.16 to 832.

On Tuesday there was intensification of concern about Afgbanistan, a spate of exchanges between the U.S. and intentions shows that executives its allies about the Soviet threat are much more cheerful about but more upward pressure on defence stocks, with buying in this year than about the terest gradually spilling over economy as a whole. Into electronics, aluminium and There has also, in spite of the steel companies likely to gain Fed's supposed cooling of

over 9 points, in the middle of good for market confidence.

Lambert, one of New that the U.S. economy appeared

Although this is arguably negative for the markets, suggesting higher interest rates and more inflation, investors took it as a positive signal of a shallower than expected recession to come and an indication that corporate profits may not be so badly hit as the market fears in the next two quarters. The Dow put on 19.7 points, its best performance for over a year. Wednesday was another busy

day, but one when the Dow slipped a point, although all other more broadly based indices showed a fractional gain. There was profit-taking on steel and electronics issues, but mining and precious stocks, which had been weaker early in the week after last week's momentous rises, started to push upwards again as did paper stocks belped by news of higher newsprint

Thursday saw a resurgence of interest in the computer stocks, helped by news of product development at IBM and Burroughs, and perhaps most significant of all the market marked up General Motors by over two points and Ford by threeograters in spite of further news of lay-offs and plant closures

from both companies. Metal stocks also bad a good day and those who bad already bonght aluminium stocks were rewarded with strong final quarter earnings and buoyant forecasts from Kaiser Aluminum. The Dow inmped by almost nine points. After the market closad, the money supply figures proved fairly neutral.

This pattern seemed set fair to continue by noon yesterday and was leading analysts to the conclusion that if the market can prosper with gold at \$650 an ounce, oil at over \$30 a barrel and a comeback by the cold war, the next three months may be better than most of them had dared to predict.

It is early days for such opti-mism, but it is clear from the diary of events that the market now bas a group of strong sectors, which are capable of offering leadership and which, as portfolio managers switch between issues, guarantee continued strong volume.

The genomely encouraging factors for the market are the fact that the explosion in gold prices has not inflicted radiation burns on the dollar and the fact that every survey of business their own companies' prospects

There bas also, in spite of the indirectly by higher armaments speculative financing, continued to be a steady flow of take-over Texas Instruments put on aftempts this week which is

NPI Announces **Record Bonuses** for 1979

Self Employed Retirement Plan

Endowment & Whole Life

Visible Growth Fund

Capital Pension Plans

These rates apply to current series policies. Increases have also been made to bonuses on old series policies.

Terminal bonuses have also been increased to record levels.

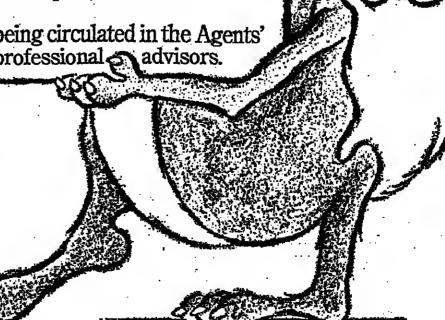

NPI Policyholders will receive, with the Annual Report, full details of how this good news affects them.

Full details of all the increased bonuses are being circulated in the Agents' Newsletter to insurance brokers and other professional advisors.

Loss of light by trees

From replies I have read recently in cases of loss of light from trees growing on the other side of a boundary, I gather than I can in any case cut back to the boundary. You have also referred to loss of light as a nuisance in law. Could you please enlarge on this? Have I any rights in addition, where my garden is concerned? In one part of our boundary, our fence is being overgrown by our neighbours ivy and pushed to our side by his neglected rose lushes, etc. Can anything be done about

Finance act contravention

I am a foreign national not domiciled in the UK and I have been living in this country for three years. My duties are performed in the UK but my employer is a non-resident; therefore, acording to the Finance Act of 1974, my salary is subject to a standard deduction of 50 per cent. In addition to the standard deduction I am entitled to family allowances

and reliefs. Recently I was advised by my Inspector of Taxes that the relief I may claim in respect of the interest on the house loan is limited to 50 per cent of the amount involved. More specifically the assessment I received for the fiscal year ended April 5, 1979, was based on the following computation:

Salary Less: Loan interest Deduction (16,120 $-763 \times 50\%$ Personal allow. 100 Child allowance

6.043 Net taxable income not correct as the standard deduction of 50 per cent is

When journeys end with relief

and we therefore think that you IP IS a cardinal principle of ago that this was an unreason our tax system that a taxpayer's able answer. They therefore would have no claim for loss of light to your garden. As to the expenses in travelling from announced that by extrahome to work cannot be statutory concession they would fence affected by the ivy and rose, you would be entitled to deducted from income in the not tax the reimbursement of calculation of tax liabilities, travel between the UK and the re-crect it in its proper place, This has long been an unpopu- foreign station. The concession and to cut the ivy or rose to lar rule and those most anti- covered travel for the emachieve this. Technically you also have the remedy of an pathetic have been known to describe it as one of the Revenue's sacred cows:

But if it is so secred one might well ask why the authorities have seen fit to shoot it so full of holes? Some of these derive from legislative exceptions and others from concessions granted by the Inland Revenue.

It would be nngrateful but accurate to say that in making any such concessions the Revenue are operating outside the law: that they should either apply the law as it stands or bave it altered. Judges trying tax cases remark from time to time on this apparently Gardiner v. Courthorpe 12 P.D. unprincipled " behaviour, although they usually admit thereafter that the well-known concessions are less distasteful than unpublished or dis-

cretionary ones. One exception to the original principle, stemming from a pair of House of Lords decisions. has been examined on an earlier occasion in this column (November 4, 1978). employee in each case The bired to do a particular job some distance from his home. Both employers knew and and the former wife has earning accepted that not only were there no other individuals who could do the work concerned but also that there were good reasons why the employees

could not move nearer to that That is one very narrow exception. Other, apparently wider, categories of exception sometimes prove on examina-tion to be something quite else. Sailors who pay off at Southamplon but are then required after a leave period to join a ship in Liverpool, are said to get an "allowance." That is correct, but that does not mean that it is a tax-free allowance,

still less a deduction. But there are real exemptions. Published extra-statutory concessions make provision for three cases. An individual who is a director of more than one company in a group is regarded for tax purposes as having one. main place of work, and can deduct his travelling costs from there to another place that his

directorships require. This gives him some relief for travelling to work—although it is not of course the same thing as allowing his costs from is a director of one group another.

to work" expenses, where he employer must reimburse these is giving his services free to a expenses.

company which does not seek to But if these conditions are might be an example.

The third of the relevant

concessions was one applying to this country after his 60 days to the person going abroad to take visit them. In fact, every indiup employment. If be retains his bouse in the UK, his travel from here to the country in which he is to be stationed will be a journey from home to

clusion some considerable time cow as a "boley cow."

please write or phone —

ployee's family—and placed no limit on the number of journeys which could be made: the practical restriction was the willingness of the employer to reimburse unlimited travel.

TAXATION DAVID WARMAN

However, this concession required careful study to be understood in its proper con-text. It applied only where the employment is one all of the duties of which are to be performed abroad." If the employment were to extend through a full fiscal year, the employee would have become non-resident, and would have no need of any concession to free him from tax on his earnings or the reimbursements which

the Revenue bracket with them. The concession was thus aimed only at those proceeding abroad for short periods and even then it affected only the individual who carried out those short-term overseas assignments for an employer different from the one he worked for in between, when his duties lay in the UK. The concept of its being necessary to have separate employment contracts. (for UK and overseas duties respectively), was one which existed prior to 1974, but which has substantially removed been

since that time. The Revenue, as part of that removal process, brought in some new statutory provisions in 1977. And in doing so they declared their original concession to be "otiose": it now exists only for foreigners coming here, and mirrors for them the legislation explained below.

The main 1977 provision per mits deduction of costs of travel from the UK to an overseas employment at the beginning of the employment period, and o. the return at its end. It is no. a condition (as It had been for the concession) that the employee must retain his bouse in he UK. Nor is it vital that the employer should reimburse, the travel costs. But this particular section of the statute does not make allowance for a wife and children, nor for intermediate

returns home. Both of these last are dealt home to work. The same relief with in the second main 197; is available to the person who provision. This applies only where the employee is out of the company and an employee of UK for a continuous period of sixty days or more. To keep up A second concession does the necessary level of confusion, permit a director lo escape tax the draftsman bas made it a reon reimbursement of "home quirement in this case that the

next September.

kating agency, De Beers' Central Selling Organisation. This follows three years of record sales culminating in tha 1978 boom when big stocks were built up in the cutting centres as a result of the trade bolding on to its diamonds as a hedge against currency uncertainties. Last year's sales of roughs should have produced a new record value when price increases are taken into account, so it is clear that the amount of

stones sold was lower. A return to more normal conditions was forecast last March by Mr. Harry Oppenheimer, the world authority on diamonds and chairman of De Beers. While sales of the larger gems of one carat and more have kept up well as a result of investment buying — a highest quality one-carat polished gem, if you can find one, is now worth all of \$40,000 compared with about \$25,000 in July — price resistance bas been felt in the retail market for the smaller polished gems.

The sales ontlook for this year is uncertain, although not necessarily depressing. Jewellers may continue to use less diamond in Individual pieces of jewellery and may well have to accept a reduction in profit margins which can go to 100 per cent or more. At the same time De Beers can be expected to pursue a vigorous sales campaign and, indeed, you have probably seen the latest television commercials.

.. De Beers should still bave had a good year in 1979, especially bearing in mind the group's important gold income, and a modest increase in the thricecovered dividend could be on the cards. Now yielding 8 per cent shares of this high calibre concern with its strong financial backing should be worth picking up for the longer term if the price comes back

much further. From Australia the Conzinc Rictinto of Australia beaded

recently-discovered Argyle. It indeed. makes exciting reading but comments on the find being possibly "the biggest in tha world" are premature, to say areas, Eliendale and the more are premature, to say least (remember Poseidon?).

MINING

KENNETH MARSTON

A great deal more explora-tion work remains to be done. The two areas appear to have a very large concentration of diamonds and the diamond-bearing "pipe" at Argyle is buge by any standards. What remains to be seen is whether

been preponderantly very tiny However, it can now be said

that Ashton has progressed from being merely a prospecting operation to a diamond mining proposition. There could be at ast one commercial diamond mine in the making, but at this stage its likely profitability can-

not be assessed Sbaremarkets love to look ahead and tha abare prices of the participants in Ashton are already putting a value on the find of some £480m. In order to justify this, the discovery will have to be a real bonanza when you realise that its value in sbare price terms is now about 30 per cent of that of the great De Beers which bas a dozen high grada and high earning diamond mines.

shareholders. For instance, it encourages mines to extend into neighbouring areas which is a costly business, although it ts cheaper than establishing new properties. As a result Libanon and Doornfontein will be financing the costs of their expansion from profits with the result that while they can look to long term benefits from these " mines within mines " they will have to be careful in the maantime with their dividend distributions.

Even so, the whole industry continues to pay very well indeed and the next batch of increased dividends will come with the Anglo American group's quarterlies which are due to be published on Friday. As to the future of the gold price, the latest comment comes from bullion brokers, Sharps Pixley. They still see higher prices as inevitable for the near term in view of the continuing difficulties on the world political and economic fronts.

Why Britannia should manage your portfolio.

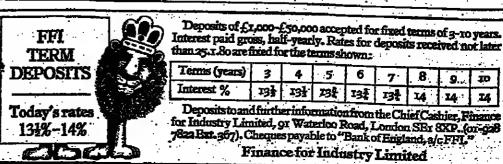

Britannia's investment management team demonstrated its abilities with great distinction over the past twelve months, dominating the unit trust performance charts in 1979 with first, second and third.*

How can you benefit from Britannia's investment expertise? Our Unit Trust Portfolin Management Service is designed to meet the needs of those who have more than £10,000 to invest. It consists of an individually managed portfolin chosen from the wide range of successful Britannia unit trusts. The funds

specialise in high income, fixed interest, energy, gold shares, property shares, North America and the Far East as well as more general U.K. trusts. Your portfolio will be given the individual day to day attention of a director of Britannia Fund Managers who will decide on the timing of investment in particular trusts or when to hold cash.

All this is at no extra cost to investing in a unit trust yourself. If you have investments in individual shares and wish to avail your ell of the Unit Trust Portfolio Management Service these may be exhanged for units at a considerable saving. MR CHOLMELEY MESSER

chairman of the Unit Trus

Association, spoke out strongly this week against specific agree-

ments by unit trust groups to

purchase Unicorn unit trusts will receive a reciprocal commission cheque on a one-for-one hasis." It continued 'If actual business subsequently results, reciprocal business will then be given on a three-for-one basis." Asked about the circular Mr. Messer said: "Personally I think this is a misjudgment on the part of Barclays Unlcorn.

UNIT TRUSTS

TIM DICKSON

Reciprocity is an inevitable part of the two-way service between a unit trust manager and a stockbroker but I do not like the way this has been done."

Mr. Messer agrees that all unit trust groups give business to intermediaries who belp them but emphasised that there is no general ratio. "Three to one is by no means excessive though many people wouldn't do as much as that. What often happens is that groups decide at their year ends, on the basis of research assistance and client introductions, bow much business they should give to stockbrokers."

Critics of all reciprocal business arrangements of this nature point out that unit trust groups could be open to allegations of "churning." In other words, if a unit trust manager is committed to rewarding the stockhroker he may be tempted to turn over his portfolio purely to generate sufficient business. Clearly, this would not he in the interests of unit-

holders. Mr. Messer, however, maintains that there is no real danger of reciprocal husiness arrangements being abused. "I know there are connotations of hrokers and unit trust groups have their reputation to protect." If a group took advantage of this sort of opportunity and was known to churn its portfolio, it would rebound in

the long run, he added.

Mr. Messer emphasised that while he would be raising the issue of the Barclays Unicorn circular at the next meeting of the Unit Trust Association, no action would be taken. "I don't think this is the sort of matter you can put down on papar or make rules about. Nor is it something we can really monitor —it is up to each group to make

their own arrangements as they

Meanwhile, Mr. Bill Hilling, senior investment manager of Barclays Unlcorn, claims that the fuss about the circular is a storm in a teacup. "A lot of people say this will lead to churning but that is just not so. I know that churning damages a portfolio and we won't do this."
Mr. Hilling admitted that Barclays Unicorn sales last year bad been disappointing but he added: "We are only in line it was extremely unlikely that is a few bundred words longer, expand. Its usual source is the with the rest of the unit trust

But a few life companies still do not pay any final bonus. The level of bonus depends not only on the investment performance, but on the sctuary's calculation of profit and the amount given to policybolders—a process still surrounded by a certain

During the past couple of weeks, we bave seen the results from those life companies which make early declarations ahead of the end-year valuation of assets and liabilities. This time, they form a somewhat varied

LIFE PROFITS

The general investment pat that there has been a substantial rise in investment income coming from the massive investment made over the past few years in high yielding gilts and swollen by the rise in equity dividends and property rents. But the market value of equities and gilts fell significantly over the latter balf of the year. Generally speaking, rever-

sionary bonuses reflect the investment income position, and movement of assets. There are other factors which enter into the actuary's calculations. With the buoyant investment

income, one would expect reversignary bonuses to rise for 1979. Some life companies bave done this, notably Friends' Provident with a 35p per cent rise, Nor-wich Union with a 20p per cent increase, plus a special bonus, Guardian Royal Exchange with 25p rise and Scottish Widows with a 20p increase in its interim rate.

paid when the policy matures. of interest rates will put pressure on actuaries to consider cutting their bonus ratea and no one wants to be the first. Some life companies appear to have adopted a "wait and see" policy and have held their bonus rates unchanged, for life con-tracts, including Sun Alliance

ance industry this week suggest that householders face higger and higger premiums for home insurance in the 1980s.

property see the premium rise each year as their cover is re-valued in line with inflation of rebuilding costs. Those renewing this month face a 19 per cent rise in their premiums

from this source alone. But the insurance companies, accepting that the Englishman's . home is his castle, bave managed to keep the rates per £100 sum insured unchanged for over 50 years, the basic rate of insuring private bulldings baving been fixed at 12 p per cent (2/6d as it was in the 1920s). . But the 1970s saw a change in the weather pattern over the UK with more adverse weather

in winter. being assailed from outside by the winter storms and underare simply sending out the cooling off notices for the ground. As a result, insurance companies have had to pay out ever increasing amounts on winter storms and are still paying the bill for giving subsidence cover free of charge. Household accounts of companies have been making losses for the past five years. So when two leading insurance companies, Sun Alliance and Phoenix, announced rate inereases this week, ending the 50

year tradition, one is a little surprised that they have not done this before. Nevertheless, a 20 per cent rise in rates, from 121p to 15p per cent, is going to he a hitter pill to swallow at one gopremiums are going to rise hy over 40 per cent this year. Warnings from Sun Alliance are that this increase will barely keep the bouseholder account in balance. So other rate increases could come in a

year or two. General Accident and Eagle Star have already made the increase. Other insurance companies are likaly to follow this lead during 1980. One obvious message is to shop around for cover to find a company which has not yet put up lts rates, as many car insurance customers are doing.

But there is also some good news from the insurance companies this week

Fighting off attacks on the castle BLEAK NEWS from the insur-

But not everybody can laugh at a flood.

Accident and Phoenix bave also ful format used on its plain lanthrown over the tradition that guage motor policy to insert exhouseholders should not have the slightest idea of what their Insurance covers, by issuing policies that are incomprebensible to the layman.

These two companies, quite independently, bave produced a home insurance policy in plain English that every householder should be able to understand.

INSURANCE ERIC SHORT

The problam up to now has been that because the policy is a legal document, it has been drafted by lawyers and amended or added to, each time a change has been made to the cover. Or there has been a legal decision affecting a part of the contract. These two companies spent many man

hours rewriting the policy document in plain English.
Companies used professional market research organisations to find out what the policybolder wants and to test the reaction of various phrasea used. Thair views meant there had to be several revisions before the final policy document

appeared.
The results have been worth waiting for. Both policy documents make it straightforward to understand what cover is being provided. To start with they are in book form in standard type, not small print. One significant feature is that the number of words used has been significantly reduced, so reading

is quicker anyway. The average policy document is about 5,500 words long. Phoenix's is about half this length, while General Accident's GA has adopted the success-

WHAT WITH the holiday shut- stamp duty, which always nperation."

For more details, and locations of the Golden Key sites, which are mainly in southern Grinstead, (East England Weybridge Woking, Winchesterl, contact Mr. Price. New Ideal Homes, Freepost, GU 211. BR. Woking, Surrey (048 62 76155).

Just how do the rebate schemes actually work? For instance, Bovis Homes will pay a purchaser £450 on a £15,000 mortgage, which is equivalent to a gross amount of over 41 per cent for those paying income tax at the standard rate. The rehate will be payable by 12 monthly instalments beginning immediately after the date of legal completion, or alterna-"mortgage rate frozen at 111 tively, it may be naid io one per cent" offer made in the lump sum. The scheme has been carefully devised in consultaoffering to freeze the rate at tion with the Inland Revenue, to 12.5 per cent; while Bovis make sure that a purchaser will not be liable for any tax on the rehate.

Even if the mortgage interest gage this adds up to a cash guarantee to pay the full rehate, rebate of £600. guarantee to pay the full rehate, and if you sell the house within Claim up to £1,000 towards the period of the agreement, you your New Ideal Golden Key don't have to give any of the " is the campeign being money back. four-bedroom houses in Steven-One of Wates' most interest

ing developments looks to be "Stanhopes," built within the conservation area of the pretty village of Limpsfield, Surrey, a 20-mile drive from London; the complex occupies part of the grounds of the 18th-century manor house, once called Stanhopes after the family who owned it. (Philip Stanhope's father was Lord Chesterfield who wrote the famous "Letters to his son"). The village, with its attractive mixture of tilehung wealden and Tudor timber-frame houses, includes the Old Court Cottage, originally an early 13th-century courthouse, the oldest surviving timher-frame, house in the South of England. The church is mostly 13th century, with a Norman tower, and composer Frederick Delius is ouried in the chnrcbyard. The four- and five-bedroom,

two-hathroom, tiled or timberclad, linked or detached houses. are set around a central green, with views of the North Downs and surrounding countryside; prices are in the £85-£100,000 bracket.

Reduction is also a pro-motional tactic of Focus 21, who have reduced the price of their houses at Feltham (threeand four-bedroom town cottages from £34,500), and in Blackheath, where similar accommodation is from £42,500. The company felt that the higher mortgage rates were possibly the reason why people were delaying looking for a new home, and that the reduction

tion to plants (all walls do that, garden. even those that are shady) but they also trap so much warmth in summer and early autumn that growth attains a degree of

Ripeness determines to a considerable degree whether growth survives or succumbs to cold in winter. August and September are usually so much warmer in most of eastern America and this is why plants can thrive there which seldom de much good in Britain, though

our winters are much less

Two climbers that I am about to plant on the south facing wall of a new store shed are Actinidia kolomikta and Campsis radicens. They could scarcely he more different in character and they need the warmth of a wall for quite different reasons. The campsis is distinctly tender and in less sheltered places it is likely to he damaged severely most winters. It is true that it can be pruned quite hard each March and will still have time to make strong stems by August which will bear good crops of its striking scarlet and orange trumpet-shaped flowers, hut only if the growth to which it is cut back is itself strong and healthy. In a cold place the piant will either die or produce weak stems and no flowers.

There are two species of campis and a hybrid between them. C. radican is native to the south-east of the U.S. and is the hardier of the two. The other, C. grandistorn, comes from China and has larger flowers a little less strongly coloured and in Britain not always so freely produced, though the warmer the position the better the performance,

The two species cross so readily that one might wonder if botanists are really correct in declaring them entirely distinct. But whatever the truth. it is one of the hydrids, named Madame Galen, that gets most of the praise and publicity. It is certainly a fine plant with the will lower the cost of repayments nearer to the preincrease mortgage cost, and so

nf C. radicans, yet I am content

every natural advantage their at supporting itself with aerial Album, since the common form gardens offer and sunny walls roots, like an ivy, and it is cer- has rather dull slatey blue must rank high among these. tainly the most likely to flower flowers. Not only do they afford protec- regularly and freely in my cold

How to make them

climb up the wall

Incidentally, I am buying it. name which some of the nursery trade has not yet abandoned. ripeness often impossible in It is just one more example of lack of an approved list of garden names.

There is nothing in the least tender about Actinidia kolomikta which grows wild in Manchuria where winters must be far more savage than anything we experience in Britain. The reason for the sunny wall for this plant is that without sun and warmth in spring and summer the leaves may not produce the remarkable variegation which makes the plant so desirable.

These variegations, which can make some of the young leaves almost wholly cream and pink. are onite natural to the species and are not a freak observed in gardens and preserved by vegetative propagation. could grow Actinidin kolomikta from seed and still get just the same unique colour effects, though there might be some difference in quality from plant to plant. This is one of those species in which some plants are wholly male and others wholly female, and the males

The-plants are twiners which require wires, trellis or something else around which to wrap their slender stems. They are not usually regarded as very vigorous hnt there is an immense plant on the upper terfrom Aherdeen.

are said to produce the hest

leaf colour.

Two other climbers I would be are Solanum jasminoides and S. crispum. Again they are very different though they belong to the same genus but this time there is no doubt that they are distinct species and there is no interbreeding between them.

Solanum jasminoides is a true climber with long slender twin- if you cannot find it in a nur-ing stems. The starry flowers sery or garden centre it might are produced in loose sprays be worth trying a specialist from July well into the autumn seed firm or even badgering, a

GOOD GARDENERS expluit species. It is by far the best their white flowered form,

Not so S. crispum which is always a fine violet blue, each flower enlivened by a little cennnt as Campsis radicans, but as tral cone of yellow anthers. It Tecoma radicans, a former is not really a climber for it neither twines nor has any tendrils or aerial roots with which to cling to anything. However the confusion caused by our its stems are long and supple, easily trained on wires nr trellis and crying out for a sunny wall to bring out the full beauty of

this fine plant. There is a magnificent specimen at Sissinghurst Castle in Kent which must bave made many visitors wish in possess it. Given sunshine and warmth, it is not in the least difficult and it will thrive in most soils with special liking for those containing lime.

At last a few nurseries, other than specialists such as Hilliers of Winchester are beginning to stock these and other previously rather scarce plants. I actually picked up a fine plant of S. jas-minoides a few months ago quite cheaply in a garden centre and there were plenty more in

Even my actinidia most surprisingly came from a garden centre and I can only asume that some of the wholesale nurseries which supply most of the plants sold in these establishments are becoming much more adventurous.

If the sunny wall is still not overburdened there are plenty of other candidates for protectinn, all the evergreen ceanothuses, of course, but also less familiar plants such as Abutilon mogupotamicum with charming little lantern shaped red and race at Crathes Castle not far yellow flowers dangling from slender stems and continuing non stop from July to October glad to have on my sunny wall and Fremontodendron californicum (it was fremontia until the hotanists changed its name a few years ago) with stiff stems, saucer shaped yellow flowers and interesting leaves, lehed, crimped and covered beneath with tawny down.

It grows readily from seed so fellow gardener who is lucky

:urous,

FOR THE 5,000 or so inhabitants of Westerham, Kent, life took a turn for the better in the closing weeks of 1979. The crushing volume of traffic including hupdreds of articulated lorries each day, that had been shaking the town's historic buildings, deafening and endangering its people suddenly

Life improved, too, for the villages of Brasted and Sundridge nearby. Like Westerham, they had the misfortune of being bisected by the nolorious A25. But their ordeal by juggernaut was suddenly over and the people liferally danced in the streets. The reason, of course, was the

opening of the latest nine-mile section of the M25. This is London's orbital motorway, which has been making a snail-like and piecemeal progress around the capital for a decade, though the need for such a road was first identified before World War I and its construction was seriously contemplated in the

About one-third of M25 is now open for use. The government regards its completion as top priority and has forecast—many think over-optimistically—that it will be finished in 1985. Then it will link all the radial momr-ways the MI, Al(M), M11, M2, M20 M23, M4 and M40.--

Not only will It improve the lives of hundreds of thoosands of people io rural and suburban communities. It will keep out of Loodon a huge though oot easily quantified volume of traffic that now has to go through it because there is no practical alternative.

I bave to declare an interest bere because I live in West Kent and I can't avoid golog motorways that ruo through through inner Loodon (or at someone else's neighbourhood, driving north or west. My 30 or often one hears from a group of using country lanes, resideotial roads, high streets and a maddeoingly brief — though much than it inconveniences. appreciated — stretch of M25 So it gives me plea from Godstone to the top of

worsen, because the link bc- area (Reignte Road, Ewell), tween the M20 and M25 will found that the average was funnel even more traffic (especially heavy lorries) up to Reigate Hill. Then, they have nowhere to go except the suburbs.

Motorway construction variably leads to protests. People who are against motorways tend to be articulate and well versed in the theory and practice of opposition-especially the semi-professional protestors. Some are against motorways as such, though it is oot clear what they propose as an alternative solution to urban environmental pollution from excessive traffic.

Others offer qualified opposition. They are in favour of least some inner suburbs) when but not their own. But it is not overwhelmingly more people to the M4.

CHESS

ERIC SHORT

BRITISH players made their best start for many years in the ICL international at Hastings where Jonathan Speelman took an early lead while Nigel Short in successive rounds defeated strong Americans powerful pin. Seirawan, the reigning junior world champloo, and grandmaster Lein, twice U.S. Open

Short's debut at age 14 gained in merit since be had to recover to the black king. from a severe defeat by Speelman in the first round when the schoolhoy seemed affected by the occasion. Nigel bas been studying Nimzovich and his fourth move in this game was one of the great writer's recommendations, but Speelman won with two simple strategic themes. He pinned the king's knight and weakened the black king's pawn defenders, then established a koight on a dominating central outpost. White. J. S. Speelmao. Black:

N. D. Short. Opening: Nimzo-Indiao (fCL Hastings 1979-80).

1 P-Q4, N-KB3; 2 P-QB4, P-K3; N-QB3, B-N5; 4 P-K3, BxN ch. Nimzovich liked to double the pawns before While rould play N-K2, but modern theory judges the capture premature com-pared with P-B4 or P-QN3.

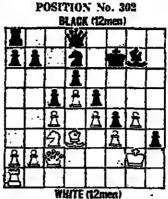

Black's game is inferior since White cao start a central action wilb P-Q5, P-K4, and P-KB4but the bishop move is a blunder and should be replaced

11 N-K4: BPxP (NxN; 12 BEN wins QNP or KRP); 12 KPxP! PxP; 13 B-N5!

Recapturing the pawn is unimportant compared with this Black; I. Zilber (Israel).

13 . . . N-B3; 14 BxN, PxB; 15 NxQP, R-K3; 16 P-B3! Again more forcing than 16 BxP ch. White now has chances on two white diagonals leading in this opening), PxP; 4 NxP, to the black king.

N-B3 (N-Q2 and KN-B3 is simpler); 5 NxN ch, KPxN;

Litvinehuk v. Weeramantry. New York 1979. White (to move) is in check from Black's pawn. Is KxP safe, or is the pawo poisoned?

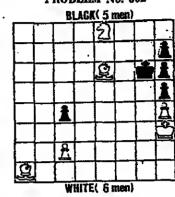

5 PxB, P-Q3; 6 B-Q3, 0-0; 18 Q-B4, Q-R5. If the knight 6 7 N-K2, P-B4; 8 0-0, P-K4; retreats 19 Q-KR4 gives a 8 9 N-N3, R-K1; 10 Q-B2, B-Q2? decisive attack. decisive attack.

19 Q-Q5, P-B4; 20 B-B4! Forcing material gain. If 20 N-B3; 21 NxP (B7). 20 N-N4; 21 BxN, BxB; 22

QxNP. Resigns. He loses at least the bishop. It says something for Short's character that next day he bounced back with this fine positional win. White: N. D. Short (England).

Opening: Caro-Kann (ICL Hastings 1979-80). 1 P-K4, P-QB3; 2 N-QB3, P-Q4; Q-B3 (playable here since the knight is often developed at K2

PROBLEM No. 302

White mates in three moves, against any defence (by T. Riemann, Rochade 1978). Solutions, Page 12

8 P-Q4, N-Q2; 9 0-0, N-N3; 10 B-N3, P-QR4; 11 P-B4, P-Rā; 12 B-B2, B-B2 (NxP fails to 13 Q-Q3, but P-QB4 is energetic); 13 B-Q2, B-K3: 14 P-QN3, Q-Q2; 15 B-B3, KR-K1; 16 N-N3, PxP; 17 PxP, RxR; 18

RxR. BxN? Presumably Black intended R-R1, then changed his mind. First thoughts were hence since after the text Short soon mobilises his pair of bishops. 19 RPxB, N-B1; 20 Q-Q3,

P-KB4; 21 P-KN4. White's larget is the long dark diagooal. 21 . . . N-K2; 22 B-N4, P-KN3; 23 B-B3, P-B3; 24 P-N5!

The same theme, and already decisive. The diagonal threats induce Black to give up a knight for three pawns, but the pawns prove to have little chance against White's roving bishops. The rest is easy to follow and Short's technique is accuratehe got a book on Capablanca for his tenth hirthday and made

good use of it. 24 . . PxP; 25 P-Q5, NxP (PxP; 26 Q-Q4); 26 PxN, QxP; 27 Q-K3, P-B5; 28 Q-N6, P-B4; 29 R-K1, Q-B3; 30 QxQ, PxQ; 31 B-B6, P-N5; 32 B-N5, P-B6; 33 PxP, PxP; 34 R-K3, B-B2; 35 RxR ch. BxR; 36 B-K7, B-B2; 37 BxBP, BQ1; 38 K-R2, K-N2; 39 K-N3, K-B3; 40 B-Q4 ch, K-N4; 41 P-N4, P-R4; 42 B-K3 ch. K-B3; 43 K-R4. B-B2; 44 B-Q4 ch. K-K2; 45 B-K4, B-B2; 44 B-Q4 ch. BRIDGE

E. P. C. COTTER

I WAS grateful for a couple of hands given to me by two of my friends with whom I play regular partnerships. The first occurred in a teams-of-four match at International level:

9K76 ♠ A 10742 +AK1086

said one no trump, and East came in with two hearts. The opener now rehid four clubs. North said four spades, and all

West led the two of hearts, a had lead eaused by slavish obedience to "lead low from three to an honour io parmer's it suit." He should, of course, start with the 10-it might be vital. Well, said my friend, how do you play it?-he showed me need I say, only the North and South hands.

I play low from the table, I said. What does East return? The Koave of clubs—how do the diamond Kiog with dummy's Ace, and lead another club-East, f suppose discards. Yes, be throws a beart. I make my King and lead a third club, which West wins, and I ruff another club, either immediately or later with the 6ve of spades, You are the only person who

played it that way, sald my friend. That makes the contract, because the added chaoce With both sides vulnerable that West beld both oine and South dealt and opened the bidding with ooe spade. North of the original declarers, famous

names both of them, played for West deals and hid four hearts, East to hold King and aoother trump, and went down.

If East returns a diamond at the second trick, the contract is defeated, because the declarer is forced to take his diamond entry before be is ready for Friend oumber two brought

The deal, supposedly from rubber bridge, is far more difficult than the first handeven oux cartes ouvertes you may find it baffling. With both sides vulnerable,

North doubled, and South said four spades. West persisted with five hearts, and North's five spades concluded the auction. West led the king of hearts - how should declarer plao his play?

The solution is neat and fascinating. West's heart King is allowed to win, and the heart coolinuation is ruffed to baod. Now the declarer draws trumps with Ace and Kiog of spades, and then leads the club Queen. East, of course, does not cover. aod now comes the key-move The Ace of hearts is led, and oo it South diseards bis Ace of clubs. Then follows the club Knave, which East must cover sooner or later. Suppose he covers at ooce-declarer ruffs in hand, returns to the eight of spades on the table, and diseards two losing diamonds oo the established 10 and nine of

A beautiful example of pre eislon timing, and the discard of the club Ace to set up the ruffing ficesse position is very

uromarkets in 1980

LONDON, JANUARY 21-22 1980

The 1980 Euromarkets conference to be arranged by the Financial Times will cover a wide range of subjects including such immediately important themes as the prospects for the dollar, and whether there will be a grave crisis of L.D.C. debt, as well as interpretations of what is happening in the international capital markets.

Among the speakers will be The Hon. Cesar E. Virata, Minister of Finance, Philippines; Mr. Norman Robertson, Senior Vice President and Chief Economist, Mellon Bank NA; Mr. Erik Hoffmeyer, Governor, Danmarks Nationalbank; Dr. Irving S. Friedman, Senior Vice President and Senior Adviser for International Operations, Citibank NA.

The 1980 Conference will be co-sponsored by the Investors Chronicle and The Banker.

For full details of the agenda and registration procedures complete and return the coupon below.

TRAVEL

How to discover ! Britain

BY SYLVIE NICKELS

IN LONDON'S Regent Street recently I nverheard one of nur visitors asking a passerby, with a hint of desperation, "Excuse me, do you speak English?" I did not hear the reply, but with nur annual total of overseas visitors now well over 12m. about 81m of them including London in their stay, the question did not really aeem so quaint.

The national and regional tourist boards, aided and abetted by a lot of enterprisiog commercial organisations, are doing their best to encourage them (and us natives) away from the magnet of the capital, so the first priority is to reduce the ignorance most of us have concerning large chunks of our islands and their astonishingly varied amenitles.

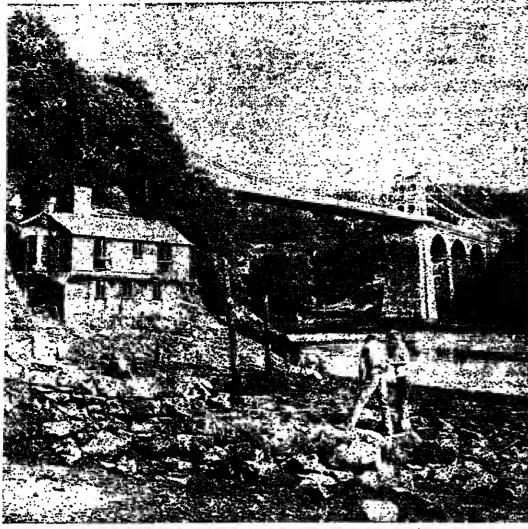

The hest (free) sources of information I know are the annually revised publications of the English, Scottish and Wales Tourist Boards, packed with ideas and, just as importantly, giving the addresses from which fuller details can be obtained.

Quite a few are concerned with organisations marketing differ-ent types of accommodation, in-personally guided open-air holi-Their resp cluding self-catering cottages, farmhouses, camp and caravao

sites and university campuses. Availability is throughout England, but the emphasis is undnubtedly rural when it comes to cottages and country bomes in the most idyllic settings from Cumbria to Cornwall. In con-trast, purpose-bullt chalets on popular coastal sites offer many of the amenities of a modern community if that is what you

SYLVIE NICKELS

The crucial Test

spring from the natural aquifer of the great chalk deposits of Salisbury Plain and North and South Downs.

The chalk acts like a sponge absorbing the rainfall without allowing it to run off, and then releasing it throughout the rest of the year. Chalk rivers do not have spates unless there have heen exceptional local delnges. They also seldom run dry, although in the 1976 drought their levels dropped alarmingly.

So I am very happy that the rainfall in these parts -- more than 30 ins last year-should keep the Test and other chalk streams running well through-out the next 12 mooths. So reliable is the chalk for

storage that various water authorities have plans which could absorb all the flow of

THE CHALK streams and rivers these rivers within the next 100 of the southern counties have years at the present growth rate

One angry fishing member of a water authority told me some time ago that his grandchildren would see some of the better rivers of the south of England dry for much of the year.

There are already some signs of this happening. Before the war noe of the springs or winter bournes, which are a feature of the Chalk, used to rise every winter on the boundary of one of my farms. Over the past 20 years they have never come closer to this than 5 miles and then after an exceptionally wet

The reason for this is quite obviously the abstraction of large quantities of water from a well some miles down the valley for the benefit of the inhabitants of south Hampshire and Southampinn. I know that modern civilisation needs inshould it always have to be piped all the way? ...

tn be met by abstraction near equally disillusioned.

The mouths of the Test and the

The Test was still the needs of South Hampshire

to flourish in perpetuity.

I hope the water engineers worst through the rest of my

FISHING

JOHN CHERRINGTON.

lifetime and that I shall be able to enjoy the Test and its dry fly as long as I am physically

In my writings last year I admit to being a bit critical of the Test and its lack of fish and It was put to me that I was being unfair and that if I was having little success should perhaps blame myself.

Now that the season's records for my own beat have been published, it does seem that catches were down by 20 creasing amounts of water, but per ceot. This was not due simply to my seduction to a salmon river where my success was. There is a very good case for. negligible in the extreme. Other

would bring it all down to them growth was very poor until the and at the same time would pro-vide enough flow for the fishing life only looked up during the last six weeks, after a long blank period following quite a good will not be able to do their Mayily hatch. There should worst through the rest of my now be plenty of water, and by May everything should be nor-

> Incidentally salmon on the Test did show an increase in the late season run, and things which had been very bad in that section may improve over the years.

> I am also redoubling my efforts after salmon on the Wye and elsewhere from which I had practically retired last year. All the reports of the Wye season were bad and those for the. autumn spawning equally so.

Nevertheless, there is nothing rational about salmon behaviour. Some of the post 1976 drought spawnings ahould be coming back to the river. In any case, I am relying on the . illogicality of salmon fishing which makes fish appear in spite of the most unpromising aogeries.

. There are plenty of Wye rodsadvertised but it is worthwhile when making the bargain, ask-I were ing, not for the average catches th be met by abstraction near equally distillusioned.

The mouths of the Test and the Itchen. Nature left to herself from the 1976 drought. Weed bargain the operative word.

One of the irritating things

about ski instructors tends to

be their inflexibility. Univers-

ally they seem intent on teach-

ing skiers to ski in the way that is considered right in their own

country at that time. Ski in-

structors become infected with

some form of evangelical spirit

which forces them to denounce

all that has gone before in favour of the new ski messiah.

Fartunately, international co-

nperation is improving and thus

we do not get quite as many of

the vast divergencies of opinion

that bedevilled the 360s and

early 70s. Instead of saying:

"Right, that is the way you have learned to ski; it may not

be what we are teaching in

France/Switzerland/Vermont at

the moment, but let's build on

Oh no, that it all wrong now,

You have had a very bad in-structor before, yes?" This is not entirely a cry of

personal bitterness, I've never

managed to wedeln anyway, but

it is a comment on skiers who

have said to me: "They tald me to do it this way in Les Arcs

last year, and here in the Tyrol

is no question but that a broader based ski stance is

more stable and certainly much

easier to achieve that neat a

close-together parellel style.

The average recreational skier

is likely to be able to ski a much wider range of terrain with their feet 6-12 inches

Personally I think it would be a tragedy if the practice

That having been said there

they say it's all wrong ! "

they tend to watch and say;

TRAVEL

Free with every log cabin: a boat, a sauna, and a lake for the family to frolic in.

We've just invented the perfect family summer holiday. In fact perfect is almost too poor a word to describe the beauty, charm and peace of the great Finnish forests.

Imagina yourself and your family staying in your own self-catering log cabin with atteched sauma. Thet sounds marvellous enough but read on. The log cabin will be nestled at tha side of a spatkling werm leke. And bobbing at anchor your very own boat.

Think of it, long summar days, werm sunshine deap in the tranquil forests and lakes of Finlend. No more pushy crowds, no more Hotel Millemers, just sheer peace, where you and your family can re-discover the meening of relevation.

We can offer many log cabine this summer in Finland. Prices begin from £143 per petson and there ere child reductions. But we do advise you to hurry before averything is snapped up. Last summar was a virtual sell-out.

Here are some figures to put the problem in perspective. The total cost of domestic space heating in Britain is in excess of £3bn a year. If we could all just achieve a reduction of 2 deg. Fahrenhelt in our heating levels we could save about 12345m a year, and this would existing mortgage and usually mean each bousehold would the savings on the fuel bill make save shout £24 a year. By up for the extra mortgage moving the thermostat down repayments. If you went to call the BP Heat Conservation Services of the BP Heat moving the thermostat down 2 deg. Centigrade, the saving could be about £40.

The easiest and most comfortable way to achieve these fortable way to achieve these of Felcourt, East Grinstead, savings is, of course, by better Sussex (Tel. Lingfield 833022).

I have only to look at our home to see ways in which the beat we pay for could be better conserved. We, like many people in Britain, live in an old Vic-torian house. The roof, at least. properly insulated (if yours isn't, this is the casiest area to tackle on your own using simple methods like granules or pellets - over to a wood-burning stove, of vermiculite or laying down in the wild hope that the forests mineral -or aluminium foil).

The windows in our honse never seem quite to fit and, ask them for their leaflets expensive though the outlay on on wood-burning stoves. Alterrenovation will be, that is natively write to Simon Thorpe, obviously the right thing to Newcastle Emlyn, Dyfed Wales tackle next. Draughts from who is the agent for the under the door can be more Austrian wood-burning stoves easily dealt with by using any by Tirolia but is an expert on of the do-it-yourself draught the subject and very anxious excluder systems on the market. to spread the gospel.

Double-glazing certainly keeps I don't know of anybody who houses a great deal warmer and though prices seem initially material of Milium for lining high the saving in fuel bills can their curtains but it sounds very be quite considerable. If you are good, at this sort of thing, from aluminium particles on one there are plenty of systems that you can instal yourself, but fabric on the other and is meant unfortunately there is no to provide a barrier to the cold central body that gives independent advice as to the compara- between windows and walls. If tive merits of the respective you have your curtains made at

However, there are some sources of general advice. The Millum for the lining if you Department of Energy issues a lask for it — home sewers can, free booklet called Make The of course, buy it by the metre Most Of Your Hebting which (about £2.10 per metre) at many gives useful advice on how fabric departments, including much you can save on your fuel. John Lewis.

BP bas been running for a veyor measures up the bouse, money can be saved by which methods. The survey itself is free but if you wish to follow its advice BP naturally bopes to organise the work, through subsidiary companies, for you. It mers can save up to 30 per cent of their fuel bills.

Funding for cavity wall insuthe savings on the fuel bill make vice ring 01-821 2553. The Rentokil Advice Centre,

will advise on cavity wall insu-lation as will Cape Insulation Services (write to them at P.O. Box 100, Rosanne House, Bridge Road. Welwyn Garden City) who bave a system of their own. All the fuel boards offer advice on the most economical ways of using their fuels and if you are thinking of turning will outlast the oil-fields, then go along to the Building Centre, Store Street, London, WC1 and

has actually used the insulating impressive indeed — It is made side and looks like ordinary wafting in through the cracks Sanderson of Berners Street, London, W1 they will use

who live in warm, centrally-heated homes are tucky and don't really have need for any special clothing. However, there are plenty of people who can't afford to keep their houses heated all the time (I seem to remember some remark-ably chilly after-lunch hours in country houses when the central heating had been off for a couple of bours in the middle of the day) and plenty of others

I haven't yet tried thermal

underwear myself but propose to do so on my next visit to the ski slopes. Chilly mortals I know who wear it through an ordinary British

winter say that it just makes all the

difference in the world (what I want

If chilly country houses, unheated rooms or long hours spent out of doors are part of your life-style then Wolsey have just brought

out a new range of thermal underwear made from 100 per cent

chlorofibre. Chlorofibre is specially designed to trap the warm air rising from the body and

therefore insulate it from the cold outside. The styles shown here

seem to be perfectly acceptable when worn under ski-clothing or

The long-sleeved spencer and the long-legged pantaloons come in

Wolsey are not, of course, the

only people to produce thermal underwear. Possibly the most famous firm of all is Damart who have specialised in thermal clothes of all sorts for a very long time.

They have 12 shops in major towns throughout Britain (I'm told the one at 263, Regent Street,

London WI has sometimes actually had to close the doors to

keep the hordes of eager shoppers out in the very cold weather) but are particularly useful because

readers can send off for their brochure and order whatever they

want from the comfort of their

own homes. There are some relatively attractive lacy numbers

which look as if they might be

quite suitable for the lives that

who really do have a problem

most of us live (a long-sleeved lacy spencer is £4.65) but for those

keeping warm, like alpine climbers,

market traders and so on, there are some extremely serviceable-looking garments which go under

white only and are £5,50 each. Find them in a wide range of

to know, though, is don't you swelter whenever you go into a centrally heated building?)

cent Polyester quilted outer and inner linings which are padded with 100 per cent Polyester wadding this is far from being the most flattering garment ever invented but it is warm—it is about three times as thick as a regular dressing gown. They are much sought-after by elderly people and invalids, but I don't see why the ordinarily chilly shouldn't find much solace from them too.

whose houses just seem to be prone to draughts from ill-fitting doors and windows.

If any of these are your problem then this cosycoat could be the answer. It is rather like a duvet

They're available in two colours, navy and dark red, and in three sizes (small, bust size 32 ins/34 lns, medium bust size 36 ins/38 ins and large, bust size 40 ins/42 ins). They are all £46.50, by post from cut into the shape of a coat. Made from 100 per Cosycoats, Castle Eaton, nr. Swindon, Wilts.

the Double Force label. There are also Thermolactyl-lined socks, slippers, boots and shoes. For the

Damart, Bingley, West Yorkshire

complain of cold feet-and if their feet are cold, they are wont to complain, they feel cold all over. Scholl has a product, new to me, which I've just been testing and which seems to work called Thermal Insoles. These cost only 99p from Scholl shops, chemists. branches of Boots and Woolworth and are quite thin insoles which you slip into your ordinary shoes or boots. They're made up of a layer of thermal insulation and an akıminised film which was. apparently, originally designed to combat sub-zero temperatures in space. The idea is that you put these insoles into your shoes and put the shoes on when you are warm-your natural body heat then keeps the warmth entrapped in the shoes. Certainly my feet seem noticeably warmer since I've been wearing them.

There are many people who

Fortunately for those who like which combine being exceedingly warm with being very high fashion (unfortunately, high prices seem to Norma Kamali's coats are those very colourful sleeping bag coats that are made with pure elderdown and are reversible. They are huge and come in one size only but they are at the moment all the rage among those who have £265 to spare. Find them at Browns. 27 South Molton Street, London

Michiko is an equally fashionable designer who has produced some amazingly warm coats and jackets this winter. These come slightly less expensive (the jackets are about £72 from Howie, Long Acre, London, WC2) and they, too, are reversible and have an all-

One of the oldest but simples ways of warming up the chilly frame you own a hot-water bottle but find its clammy unadorned exterior would be improved by a cosy cover there is a pretty but simple cover made from a fresh design of crisp striped hearts. The colour is a fresh red on white and is made by Noyadd Rhulen of Battle Fach, recon, Powys LD3 9RW can be ordered by post for £3.75 (30p extra for postage and packing) or it can be bought from selected retail outlets throughout the country. If you prefer it there is also a charming elephant and palm tree orint in blue and green

or while it waits on the table for those who want second-helpings is one of those perennial problem
I have hardly ever come across a which do the job admirably from a practical point of view, look even worse. So I was amused to come across an old, traditional system of keeping food bot which uses no electricity at all—it consists of hot stones.

The Idea comes from Portugal where stones are put in the sun o near the cooking fire to heat up. Over here the idea is that you put the hot stone in the oven where it absorbs the heat. When you serve the food you put the stone on its own wrought-iron stand (cork-backed so as not to harm the surface of the table). The hot stone goes on warming the food throughout most of a norma meal-time. They measure about 12 inches in diameter.

Each Sunrise hot stone is individual, and made of handpainted ceramic in shades of blue, green, cream and beige. No two stones are identical. They are pre-fired to a heat of 1250 degrees so they are completely beat and erack-resistant. Christine of 10 Gee's Court, London W1, has a small collection of Portuguese hot stones that she is selling at £19.95 each (inclusive of p + p).

Stresses and strains of Belfast by Anthony curtis

Bill Morrison has a huge Belfast man. He knowe from within his bones what he is is eating or opening a window or just walking dully along . . . "

Morrison's great theme,

sardonically embodied in his receot, hrilliant atage-play Flying Blind, is the contagioo of violence in cootemporary Belfast, how like some rampant disease against which there is no known form of immunisatioo, it suddenly strikes and blights the lives of people who are not themselves activists or at all politically committed. Morrison mediates this theme of the underlying tension in Irish life today with a generous measure of Irish bumour and theatrical sense.

"The killer was a big, youngisb, well-dressed felle who enjoyed his work "-it is all there in that typical Morrisonesque lice from Maguire, a new radio play which was last week's Saturday Night Theatre piece (Radio 4 UK, January 5). The title-figure, Harry Maguire, uttered by John Hewitt in a voice as

brush with the police, happens within his bones what he is to he the sole witness of a talking about when he writes of hrutal shoot-and-run murder. violence in our society "how it From being a cobody. Maguire takes place while someone else is transformed by events wholly ontside his cootrol into becoming a crucial pawn in the lethal chess game between the proves and the police. Both sides manipulate him in order to capture much more valoable nieces, and the action alternates furiously between the police beadquarters, a seedy social clob and the dangerous oo-man's land of the streets. Bill Morrison's last work for radio was turning the work of Raymond Chandler into radio

> with the long arm of the law, was tautly transmitted in Robert Cooper's production from BBC Northern Ireland. There are further parallels when it comes to terrorism and kidnapping between Ireland and Italy, but these were not the concern of Natalia Ginzburg in

drama. The parallels between

Chandler's Los Angeles and Morrison's Belfast are not hard

to seek, and the plight of an

individual in an uneasy alliance

Bill Morrison has a huge rich and frothy as a pint of as The Monday Play (Radio 4 advantage over other cootem-porary playwrights. He is a ged layabout who, on a dark involved only in a storm in a Belfast man. He knowe from night after he has had a mild Martini-glass, stirred vigorously Martini-glass, stirred vigorously rather than shaken; but nonetheless pleasantly intoxicating.

Italians talks faster than Engglish people, particularly during their marital rows, and Zoe Wanamaker as the ex-sbop assistant who lands herself a smart, well-bred husband whom she hardly knows from Adam took the lines at a terrific lick to bring out the Latin in them. The pace certainly needed a bit of getting used to, but as the situation between husband (Patrick Drury) and wife built up, one accepted her for what she was, a thoroughy nice girl on the make. Her test came wheo she had to give her mother-in-law, in the person of Patricia Routledge, dinner after her mald (Roweca Roberts) had apparently walked out on her. True to form, she rose nobly to the occasion. The lively pro-

Was Company in Fears and Miseries Fun which was given its first it indeed an affair et all? The of the Third Reich by Bertolt Fun which was given its first it indeed an affair et all? The of the Third Reich by Bertolt at 7.30 pm (free preview the performance in this country in question was delicately posed Brecht, directed by Giles previous evening) and closes on the translation by Henry Reed and examined in Mac and Miss Havergal in a translation by February 9.

The play opens on January 18

Taverner Players

BY DAVID MURRAY

The latest party to be sent out on the Early Music Network, a three-year scheme for sowing early music all over the country, is the Taverner Players. They hegan their mission on Thursday at the Wigmore Hall with a programme of mostly Mooteverdi which in due course will be heard in several other places. They were persuasively stylish and fresh; they ought to make many converts.

Their major offering was II

Combattimento di Tancredi e Clorinda, a work of great historical importance which stretches out its heavy length in many e respectful performance. This re-creation was of quite eoother order: it was as dramatic and moving as one always hopes (usually vainty) that it will be. Honours must be absided as a likely between Andrews divided equally between Andrew Parrott directing his four excellent players of period strings from the harpsichord and judging the exact weight of each episode to a nicety, and the tenor narrator Nigel Rogers, who found a perfect balance between objective reportiog and sympathetic excitement. No period allowances needed to be made; the lean power of the work The loving antagonists in It

Combattimento were Emma Kirkhy and David Thomas, who had more extended opportunities elsewhere. Miss Kirkby delivered the Prologue to Orfer tenderly and elegantly, and Mr. Thomas sounded his base reaches impressively in two songs by Caccini, ornamented with grave delicacy. Earlier, three madrigals from Monteverdi's seveoth and eighth Books bad been as engaging for the light, springing string accompaniments as for their bright vocal parts (though I felt a little resistance to the string mannerism of swelling long ootes after the beat-surely that is oeither technically inevitable nor historically prescribed). A. Capriccio stavagante for strings by Carlo Farina, a Monteverdi pupil, alternated a characteg ritornello with successive playful imitations (other instruments, hens, quarrelling cats and a dog), and the Taverner Players did it with as much tact

Le Cirque Imaginaire returns to Riverside

Victoria Chaplin and Jean-Baptiste Thierree's Le Cirque Imaginaire will return to Riverside for a limited season from March 4—30, nightly at 7.30 pm.

Women with

the needle

BY JANET MARSH

in collecting habits that are not work."-wool embroidery on associated with economic cir- twill or linsey-woolsey cumstances and inflation-hedg- inspired by Indian originals, ing. Collecting historic textiles, notably the serpentine "tree of for instance, quite suddenly came into vogue in the early 1890s : art periodicals of the time are full of articles on old lace and embroidery.

The taste lasted 30 years or so, but was then not revived until very recently.

It is only with the last four or five years, for instance, that Christie's, South Kensington, who now specialise in the field, have held regular textile sales. The early collecting boom may well have coincided with a period of realisation that machine-made textiles were fast usurping hand work. The new when a revival of hand crafts in general suggests a comparable surge of nostalgia.

These fine embroideries of the past reflect of course eras of female subjugation to make even the mildest feminist wince. For centuries the women-of any European household were expected—as they still are in many peasant societies - to utilise such time as waa not taken up by serving the needs of their masters, in needlework. Even so the women of the Tudor and Stuart periods may still have felt a secret sense of superiority, seeing the extent to which their fine embroideries were used to cover up the inadequacies of male-made furniture, or man-tailored clothes.

Significantly, inventories of the 17th century often value the coverings of a chair or bed at many times the price of the furniture itself.

Because of its perishable nature, no great bulk of embroidery has survived from before the 17th century. Most that has survived is ecclesiastical vestments or courch furnishings. Enough of these exist good, sale of fine embroidery in museums however to reveal the 13th century as a golden age. 29. One section of the sale (literally, too, the best ecclesiastical embroidery was richly lection formed in the early part embellished with jewels and gold thread) which was not to be equalled until Elizabethan present owner and vendor. times, when embroidery came more into secular use, to supplement the rich imported velvets she and her hrother enthusiasdamasks demanded by

rich yariety of embroidery tech- home, at North Mimms Park niques; and much still survives which was liberally hung and last time out.

THERE ARE some evolutions for the collector. "Crewellife," snaking up bed curtains and colourfully inhabited by exotic blids and flora, with

strange beasts to guard the roots where they sprang out of lumpy little hillocks. The prints in herbals and illustrated classical works, such as Ogilby's 1658 edition of Virgil, inspired the 17th century. embroiderers, who worked their pictures in a variety of tech-

niques tent-stitch (or petitpoint). Hungary stitch, applique and stumpwork, in which portions of the ornament are raised.

in relief upon a foundation of wood or padding. Tha "sampler" was a test of the embroiderer's skill. But perhaps it served also as a kind of aide-memoire, to record the impressive repertory of stitches and effects available to the needlewoman. The earliest known sampters date from the turn of the 17th century; and occasionally you still find examples worked by girls in village schools in the early 20th

Samplers-which a decade ago you could still find for a couple of pounds or so-bave become a specially popular field for collectors. When Christies sold a good collection last month an unusually large 18th century example realised £1,300; and another of unusual interest, commemorating the Battle of Culloden, made £1,100.

Traditionally a young girl's sampler embodied in its design the alphabet, the numerals, the date and the name and age of the embroiderer. Alas, a large proportion were mutilated in after years by their own makers who, as they arrived at a certain age, carefully unpicked the

ANYONE GLANCING through the latest editions of Sotheby's and Christie's yearbooks cannot fail to be stunned by the price levels reached by the best examples of any particular type of art. Just to 30 through the current volumes makes the prices of a decade ago seem unreal.

One is amazed at the extraordinary wealth of works of art which still appear to flow endlessly through the salerooms, but also aware of a few really outstanding prices, sums which are not, necessarily, among the highest but which represent a completely new level within the ever changing structure of the market.

prices paid at Christie's -245,300 for a painting of an interior in Cairo by the 19tbcentury British artist John Frederick Lewis and £1,115 for small piece of rostume jewelery designed by Coco Chanel; £802,800 for a Fauve painting by Matisse and £53,520 for a French 19th-century glass paperweight by the St. Louis factory. At the same saleroom, oos might also mention £146,000 for a painting by Mondrian, the same price for a landscape by Jan Breughel the Elder, and 1568,650 for a seascape by Jan van de Capelle. Or what about £66,900 for a 16th-century English bookbinding, £88,000 for a pair of 18th-century American chairs, £66,900 for a 19th-century grand plano of quite startling vulgarity or £184,659 for a 1920s clock by Van Cleef and Arpels about which much the same comment could be made?

Equally inexplicable to many noureau glass cup by Gallé, £48,291 for an art nuurenu hrooch by Lalique, or £210,526 for a 1936 Mercedes-Benze type K two-passenger roadsler. Even prices for undeniably beautiful objects, such as the £83,625 paid for a 161h-century

> Sotheby's, too, had its fair share of "super-startlers." Two collections the Ojee (ex 18th century Wildenstein) French furniture and works of art and the Maxwell-Constable aocient glass, might be said to have altered these particular markets overnight. In the first a single piece, a Louis XV eucoignure by Dubois after Pineau fetched a slaggering £835,165, after which prices like £219,780 for a Louis XIV boulle centre table, £461,531 for a Louis XVI commode by Leleu. encoignures by Latz, or £307,692 for a Lonis XV folio cabinet by Van Risenburgh the Younger seemed almost commonplace. eveo though they were all higher sums than had been paid previously at auction for furni-

ture of any kind. Perhaps even more incredible. bowever, was the £579,800 given Maxwell-Constable Roman glass "cage" cup of circo 300 AD, an object in only the real expert would be able to see much

beauty. Once again, there were many

celain of this type), £30,732 for a single Japanese woodcut by Harunobu and £50,930 for a 16th century Russian silver

The value of watches took a massive upward lurch when a Breguet gold-rased pocket watch fetrbed £63,555 and nothing among the sums paid for 18th which fetched quite remarkable century French furniture could quite match the sbock-value of. prices-£83,625 for a tiny signed Cypriot glass cup of the 1st the £89,000 paid for a slightly century AD, although after the battered early 20th century oak

writing desk designed by Charles Renzie Mackintosh. Among more esoterir items at-Sotheby's. Nijinaky's diary for the years 1918-19 made £50,175, a small ivory portrait medallion £146,341 for a atill-life by the by David le Marchand fetrhed 19th century Irisb-American 46,830, an early 19th century Scrimsbaw (etcbed whale'a tooth) made £14,146 and a late 19th century painted Berlin porcelain plaque, about whirh the Persian lacquer pen-case, £379,000 for a manuscript atlaa by Mercator, and £22,927 for a less said the better, fetched

The 1970s has seen a remarkable resurgeoce of ioterest in Stradivarius violins Istamic art. Oriental carpets which, at the heginning of the decade, were almost being given away, have been among the most rapidly expanding growth markets, in terms of price andalao for the numbers of oew colleriors. My "star choice " for the 1978-79 season seems to here there is still murb that remains to be disrovered.

If one of the most noticeable features of the rarpet market during the past two or threa interest in tribal and village rugs, one of the most interesting and yet still under-valued areas remains the weaving of the Baluch tribe of the Persian-Afgban horder region. But one extraordinary price at Sotheby'a last April suggests that even this might now be changing.

I refer to the so-called Harbley Clark ' Adraskand " fetched £13,380 at which Sotheby's last April. It seemed celain vase (ooly a year ago, to me ooe of the most remark-we were marvelliog over prices able prices I had ever seeo other pieces in the collection in the region of £30,000 for por- paid in a saleroom.

seriously considered. Practically every good judge would nominate Ben Crensbaw, Dave Stockton and Genrge Archer as the three hest putters in the world today. But here again I would point out with more than a little cynirism that they have bad to be to survive on the tour so wildly inarcurate are the vast perrenlage of their shots from tee. In consequence they bave had few chances of bitting many greens in regulation figures, and constantly rely on the often delicate and always courageous art of scrambling. That is why I should like to see the putting category altered to reward the player who most consistently gets up and down in two sbots, baving missed the green. Gary Player would be among the favourites for such recognition.

The three categories recording the highest percentage of boles played in sub par figures. most eagles and most birdies scored appear somewhat superflous to me, since any of those tables could cooceivably be led by a man who was woefully inconsistent, and dcopped as many strokes to par as he a comparatively simple 50-foot saved. Money won in a season putt, while his brave partner and the lowest stroke average—bas attacked the flag and finds which wins the coveted Vardon himself with a diabolically diffiwhich wins the coveted Vardon important facets of the game to those in world class.

Nevertheless it is as well to reserve judgment and make baste hopefully-to the sunshine in Phoenix, San Diego place a reasonable premium on length can be, but it would be Nelson and Bill Rngers, the three weeks with a considerable straight hitting. Ben Hogan and shameful if golf was ever Suntory World Match Play sense of gratitude.

BOOKS

Victorian hostage

BY C. P. SNOW

The Ahyssinian Difficulty Oxford, £9.50, 240 pages

In the 1860s the British Government-actually succeeding British Covernments-got into a mess not dissimilar, though on a miniature scale, from that which the White House now knows all about. The Emperor of Ahyssinia (which we should now call Ethiopia) decided that he wanted friends. The Turks were too close for safety, and not to be trusted. Theodorus wanted the support of the strongest Europeao power and so wrote, as one supreme ruler to another, to Queen Victoria.

There was nothing stupld ahout this step, although it somewhat misjudged the power relation between Victoria's Britain and Theodorus's Ahys-sinia. Theodorus wasn't at all stupid. He was both brave and slightly deraoged. He required arms from a major power, and even more the technicians who would teach Abyssinians to make arms. He knew his country bad to moderoise itself to survive. What was more sensible than for ooe Christian monarch to appeal on terms of equality to another?

There was oo answer to the letter for over two years. When an answer did come, it wasn't sigoed and sealed hy the Queen, hut hy some insignificant person by name of Lord John Russell. Theodorus was enraged, a state in which he spent much uf his time. Previously he had had two English advisers to whom he usually listened, the British Consul, Plowden, one of those curious roaming figures whom the Foreign Office in the 19th century seems to have picked up oot of the air, and the other John Bell, an Englishman who no lotention of communicating had transformed himself joto an Abyssiniao, not for any only British emissary who had esoteric reasons but simply any real talent was Hormuzd because he preferred the Rassam, plucked out of the

Those two, particularly Bell, were extremely tactful and Armenian-Kurdish-Persian. He sensible and bandled Theodorus their early forties. The new Consul. Cameron. was another tongue. eccentric appointment. He had macaged in Arabic.

no qualifications for the joh, and his chief distinguishing mark was a refusal to live in his official postiog, which was to Massawa. Theodorus dis-liked him at sight and was cer-tain that he had no connection influence with Queen

Victoria.
So what to do? Theodorus was a man of resource, and didn't hesitate. He arrested Cameron and other Europeans whom he could collect. They were put in chains. (This wasn't as ferdcious as it sounds, and was explained by the inadequacy of Ahyssinian prisons.) The hostages would be released wheo Theodorus received a satisfactory response from the Queeo.

The problem moved to Whitehall. What to do? Sir Darrell Batea shows a delicate command of cat-humour, which foreigners sometimes profess to regard as a specially English accomplishment. Sir Darrell is well equipped for this art. He has spent a variegated set of tours for the Colonial Service, including three years, in wartime, in Abyssinia itself. He knowa precisely how officials, even good ones, would respond to this kind of trouble. They would be irritated. They would wisb that the problem would go away. They would wish that Cameron was anywhere else on earth, or alternatively gathered to his fathers.

As the commotion increased, Edward Stanley was Foreign Secretary. He was one of the most attractive of Victorian aristocratic politicians, and a bumane and civilised man. But he was about the last man to be disposed to Palmerstoolan Minutes accumulated. Emissaries were sent to talk tothe Emperor-which was a great deal more difficult than might be thought; since he was good at disappeariog and had except on his own terms. The any real talent was Hormuzd secretariat in Aden, a complicated mixture of racial stocks, spoke a good many languages, but unfortunately not Amharic. which was the Emperor's native

They seem to have

Rassam behaved with good manners, extreme patience and psychological finesse for three years or more -since the Emperor, who liked bim and explained that there were no bard feelings, duly put him in chains too.

The number of bostages grew. There were protests in the British press, perhaps not so much as there would be now, hut enough to disquiet a Vic-torian Government. The same in Parliameot. What to do? The last thing Ministers wanted was a military expedition-expensive, alightly ridiculous, and have been a first class modern in country so difficult that it might be a fiasco.

The British knew remarkably little about Abyssinia. They did rather like Scotland at the time him now at the top of Queen's of Maebeth, with warring harons Gate in one of the most and ferocious fighting men. In deserved of military statues. such a medieval state, they might be able to separate the principal barons from the Emperor, hut they weren't well-informed ecough to know where to go. Not a country to fight in. But, at last with a very bad grace, the Government bad to agree to ar expedition.

Then they were lucky. By good fortuoe or good judgment, they turned tentatively to the Governor of Bombay. The peerage Rassam got a money life; the colour magazines report. Governor, not a specially energetic man, turned teotatively to credit and honour at Brightoo. Seotment, the fate of the most

his Commander-in-Chief, Rober Napier, a General from the Engineers. moved. It is difficult to imagina planning in that detail and relative to the period, on such a scale, happening so fast nowa-days. Napier and his staff had an expedition plan and a battle

From then on, the expedition went, as the Germans used to say, according to plan, which marks it out from most in military history. Napier was un-fortunate in his time. He would general, expert in logistics, intellectually equipped to play cbess with large forces. He became too old for the Boer War. know something about the or otherwise we could have disjagged terrain. They also knew pensed with Roberts, Kitchener that politically the country was and all the others. You can see

> The hostages were released substantially intact. The Abys were. indomitable sinians. fighters, but were technically outclassed. Napier's expedition cost £9m; a large sum in the 1860s, but very few British lives, as Napier wasn't slow to point out. The Emperor made a grand theatrical suicide. Queen Vic-toria tried to look after the Emperor's son. Napler got a

Streets is basically a novel of Hungary in 1955 and 1956. We might then expect it to be aumbre, doomladen, tragic. It has those aspects, but they are outweighed by the elasticity of youth, the high spirits and the intellectual volatility of the group of students at its centre. As is only to be expected in a novel by János Nyiri, who himself left Hungary in 1956, it has an unmistakable mark of authenticity also.

A group of young men, friends since school, are now students, unwillingly about to enter tha bleak world of adult responsibility and conformity. Amid their sexual explorations and general hi-jinks works a worry: is one of them an informer? of Communism." Joska lingers Was, one responsible for the at the frontier, and "drops of

arrest and death of 16-year-old Schlosser for blowing up trains? At first the novel is hard to follow, as our attention is wrenched for example from Schlosser, the elder brother, to Kalman König, the suspected agent. If he is not an agent, then his public bullying of another young Schlosser and secretion of his gun may have saved a life. We share the un-certainties of tha group. There is Joska-Tarcal, main centre of consciousness, who saves his Jewish friend Tamas, falsely accused of starting a student

seduce his sweetheart. Everything is ambiguoua: always this is expressed pithily, withily: "Encountering a shortage of fear and anxiety the Terror began to falter." Joska temporarily succeeds, owing to his own cleverness in steering a tightrope path between Marxism and official Marxism."

army mutiny. But Tamas will

die anyway, and Joska will

At last, inevitably, comes the uprising. There is the chapter called "La Fiesta" followed by Bloodbath." After three days of "mirage, a fool's paradise" come the Russian tanks, the Joska admits to a "demoralising idea": the Russians are in Thare is desperation on the part of those who believe in "a non-Russian type

Hard to get into, the novel becomes riveting and illuminatslogans about 1956 in Hungary should go near it.

and his bungry search over the States to find and kill his desertof vast soms, to love and be loved by the almost equally chiselling Iris. The novel is full of splendid

characters, not least Rainbow himself and his opponents, The Greek. The Whip, and the rest. Rainbow'a closest companion, and accomplice in his betting ventures, is a tender and convincing character, and Iris, the morally torn, beautiful daughter of a craven, debased and muchloved father, is an appropriate mate for Rainbow to aspire to. Well written soaked in the atmosphere of the 1920s, this novel makes a funny and com-

pelling read. Paula Nauss's first novel, All Girls Together, is a most interesting one. It is set in a often spine-chilling-

Deprived of any other sub- impressed.

stantial emotional contact, the majority of staff become to different extents obsessed with ing. No one who wants simple individual girls. It is in this milieu that Hetty, 15 but not yet physically a woman, finds
Rainbow takes us back to a berself in trouble because of Rainbow takes us back to a betself the less painful period in our her friendship with Ellen, two psyche, to Prohibition America years older. Most of the story of the 1920s. It is a long enter is told from Hetty's bewildered, of the 1920s. It is a long, enter is told from Hetty's bewildered, taining read, about one hustler honest perspective. The worst in particular, Rainbow Roberts, of the mistresses takes on a ghoulish quality: the (all female) dance becomes a climar ing father, to cheat people out to be feared, and only the heterosexual English mistress can rescue Hetty from some of her perplexi-

This is a very accomplished first novel, but with weaknesses. Principally, there is no final coming to terms with the The black boy Murph, who is character of Ellen. None the less, one awaits the second novelwith pleasant anticipation.

Patrice Chaplin'a The Siesta is a hizarre and self-styled supernatural love story." may be unfair to betray that this means that the central character doesn't know she is dead, but I didn't feel it was worth reading the whole bookto find this ont.

Divine Dion By B. A. YOUNG

Dion Boncicault by Richard Fawkes. Quartet Books, £10.95, 274 pages

"I didn't even koow bow to pronounce bis name," Richard Fawkes apologises in his introduction, though surely be must have heard Colonel Calverley in Pottence:

The science of Jullien, tha Wit of Macaulay, who wrote of Queen Anne The pathos of Paddy, as rendered by Boucicault— Style of the Bishop of Sodor

Io 1881, when Patience sppeared, Dion Boucicault, born 1820, was still going strong; the 138th of tha 160 plays catalogued by Mr. Fawkes in his fascinating book was produced tha previous year, Therese; or The Maid of Croissey at the Adelphi. There were still four years to go hafore, at the age of 65, he married (bigamously) his 21-year-old third wife. His name was as well known then as Bernard Shaw's today, and he bsd worked hard for his reputation as playwright, actor, manager, hankrupt, wit and man about town.

man abont town.

He once claimed to have written 250 plays, but he was a notorious liar. The first on record, for a school production, was done at the age of 15; at 17, with the help of an allowance from a Guinness cousin, he was a full-time actor under the name of Lee Moreton, taking parts like Lago and Hamlet. His pseudonym was a lucky one, for when, still only 20, ha called on Charles Mathews at Covent Garden, Mathews at Covent Garden, Mathews received him in the belief that he was Maddison Morton (author of Box and Coxf, and was so won over that he commissioned him to write a five-act comedy. He wrote one called London Assurance, and made a fortune.

Boucicault had a casual way

Boucicault had a casual way with fortunes; he made several more, with topical pieces like
The Poor of New York (alias
The Poor of Liverpool, Leeds
and so on) and sentimental
melodramas like The College Boum and Arrub-no-Pogue, and ran through them all. Much of his writing was straight theft; the Victorians stole as unashamedly from the French as

the Restoration dramatists, and with less discrimination. But he was no amateur thief; his adaptations, like his original work, were of high quality, and he was a master of stagecraft who produced stunning effects, and a director of genius who elevated the stage-manager's work into an art. Nominally he was the son of

Samuel Smith Boursiquot, a Dublin wine-merchant; but probably probably his father was Dionysius Lardner, a scientific dilettante, after whom be was diettante, after whom be was named and who paid for his upbringing. He was thoroughly untrustworthy—a compulsive liar, a thief of others' work, unreliable in business, a aeducer of women. Yet everybody loved him hut his creditors, and he became the most auccessful playwright of his time and one of the most successful actors. Doubtless as further than the successful actors. successful actors. Doubtless a a result of his iosatiable desire for money, he inaugurated the system of royalties for dramatists instead of a flat fee, and helped establish copyright in America; he probably invented the matinee, he first introduced fireproof scenery, he discovered Irving. Mr. Fawkes, stepping carefully through the lies, has

given an enthralling account of him, with some interesting

ELECTRICAL APPLIANCES 1

Greater use of micro-electronics in appliances in the 1980s will force companies to innovate to stay competitive. Italy's conspicuous success in the European market has created problems for British, French and German manufacturers but they have made strenuous efforts to recover lost ground. The latest products will be at Idea '80, the International Domestic Electrical Appliances Trade Fair opening in Birmingham on Tuesday.

Hard to match Italians' lead

BY JOHN LLOYD

DOMESTIC market, worldwide, has been characterised by stagnant or even declining production in conntries, aggressive market leadership in

At the same time, the introduction of micro-electronics into the electro-mechanical control hanisma of many appliancea has posed a challenge for many companies, to which the most successful are reacting aggressively. As in many other sectors, the semi-conductor will not determine which are the winners and which the losers, but it will accentuate and speed success or failure.

One more broad trend worth pointing up is that Japanese manufacturers, which traditionally have not been atrong in this area, are now showing signs of a greater interest in it. The move towards greater use of micro-electronics in appliances in the mid-1980s will tend to increase their growing strength, and European and U.S. manufacturers must ensure a faster rate of innovation than many showed in the consumer electronics sphere if they wish to avoid a similar bard pounding.

Within Europe, the most aggressive centre by far for the production of domestic electrical appliances is Italy where such companies as Candy, Indesit and, above all, Zanussi Candy. are turning out products which hid fair to become as much English household names as

Hoover has in the past 70 years. Both the Italian Government and the companies identified the white goods sector as an attractive export market in the early 1960s from a position in the 1950s where the only Italian manufacturer of appllaoces was Fiat (under licence from Westinghouse in the U.S.). The companies established Fiat's exit from the market bave risen to command Europe. Europe's largest manufacturer man and UK companies have in this industry, a position it made strenuous efforts to has held for much of the 1970s.

The success has been based -Intrigulugly, like that of Fiat on highly-automated plants producing machines which were quickly recognised as being reliable as well as obean. The duction and securing a companies apparently have that of the Companies companies apparently have that of the doments to benefited from the vertical for UK producers. The con-

Mixed prospects in the industry are being felt keenly at Singer, which has had to cut back its sewing machine business to meet changed market

likely to decline.

where the import

integration of the industry in has bad the close attention of the 1960s: they manufacture the National Economic Developmany of their own components, ment Council through a sector and are thus strong in the market for larger appliances (fridges, freezers, cookers) and much weaker, or even wholly absent in smaller appliances.

Other European companies bave found it difficult to match the Italians' lead, and over the past year there bave been accusations of dumping and of Gov-ernment subsidies to Italian coupled with industry—usually angrily retivity and high absenterism rates. Manpower in the indusbutted and characterised as sour now claims to be grapes. However, French, Gerrecover or create their markets, both domestic and export.

In the UK, which has seen its markets flooded with imports (and sail does), some promes: was made in increasi

ket of 753,000 units; automatic washing machines-49 per cent penetration in a market of 895,000 units: one-door refrigerators—32 per cent penetra-tion out of 952,000 units; tumble dryers—24 per cent penetration out of 507,000 units and vacuum cleaners-18 per cent penetration in a market of 1.8m units. Only cookers, with a market of 585,000 units, showed minor Import penetration (3 per cent) and indeed ran an export surplus, with 8 per cent of a UK-production of 616,000 units being exported.

According to the working party, trends since then have varied from sector to sector. As a general rule, it appeared that imports were down by about 9 per cent in 1978, with home production up by roughly the same amount—though in the fridge and freezer markets conditions were depressed.

In the past year, the trade raports a generally good start, with domestic production well up and a likelihood of bettering the previous year's improving figures.

However, the industry was badly, hit by the engineering strike and lost a good deal of production and first indications suggest that the past year will show a slightly worse perform-ance than in 1978. The engineerlong dispute at Hoover, and by the transport strikes early in the year, which delayed deliveries and belped imported goods.

Within the broad market, two appliances in particular deserve attention. First, microwave ovens were forecast to reach sales nearing the 150,000 mark, hut it appears that, instead, the market has been depressed. Manufacturers blame pub-licity on the claimed safety bazards because of radiation.

is not expected to grow significantly and indeed is more and especially on a television The working party stressed documentary on the subject "at the level of subsidy being received by foreign competitors." and produced However, the matters also expect Agures (ell for 1977) showing

Fridge freezers, with an improvens recommends them to a port penetration of 78 per cent wider public. In a UK market of 574,000 units The second appliance has had

was the most extreme. It was an even less happy history in followed by freezers, with a 51 recent years. The sewing per cent penetration in a marmachine, whose production has been dominated by Singer of the U.S. for decades, faces a declining market. Singer itself faces increased competition and has been slow to innovate; the company recently closed its Clydeside factory with a heavy loss of jobs.

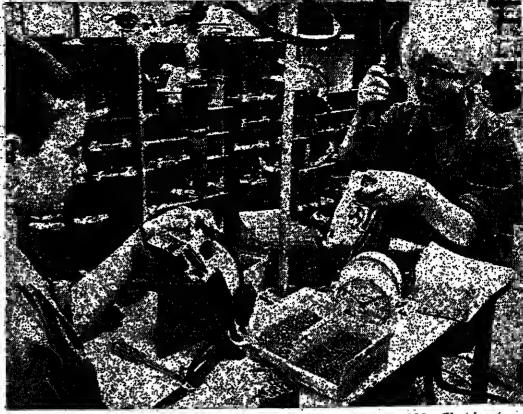

The future for the domestic appliance industry is intimately bound up with two factors: first, general trends in consumer spending, and hence with the economy; second, with innova-tions, especially in the sphere of micro-electronics.

Few manufacturers are happy when looking to the immediate future. Most concede that a well-used bot serviceable fridge or cooker will not he replaced when the family budget tightens, and that comparative luxuries (for most families) such as the smaller or newer appliances simply will not be bought by a wider market. At the same tme, the recession in the housing market means fewer sales there.

Yet two companies with substantial UK bases (one British, one Swedish-owned) are expand-ing their facilities — they are Hotpoint-Schreiber in north Wales, and Electrolux at Luton. The managements of both believe that the UK industry can recover, and is beating back excessive foreign competition.

On the innovation front, leading European companies such as Thorn, Hoover, Rot-point, Electrolux, Thomson in France, AEG in West Germany, Philips in Holland as well as the Italian companies—are all hringing in electronic controls and timers. However, the prices the more sophisticated appliances that are heing manufactured tend to be aignificantly more expensive that the electromechanical equivalents, and few expect the all-electronic kitchen to be general before the mid-

Kusseli hodds are giving breakfast a great deal of thought.

ELECTRICAL APPLIANCES 2

BY TONY JACOBS

FOR THOSE who are concerned with the domestic appliance industries and have an aversion to walking, February can be a trying month. Domotechnica, which is the largest and most important of the Paragraph and the properties of the Paragraph and the Paragraph important of the European trade fairs covering the whita goods sector, opens in Cologne on February 6. (The word "white" in this context is shorthand for in this context is shorthand for all types of domestic appliances; "brown goods" is used to describe all forms of electronic home entertainment equipment, which are exhibited later in the year at their own fair in Berlin.)

Domotechnica is an important marketing event, not only for appliance manufacturers, hut also for suppliers of the many key components such as motors, programmers and tharmostats, which appliance makers buy from specialist suppliers. It is often these component suppliers who pave the way for the introduction of new ideas and techduction of new ideas and tech-nology into the industry's products, and their stands deserve careful study.

Thus anyone with widespread interest in these industries, needs a great deal of stamina to do justice to an axhihition which, while always extremely which, while always care
well organised, covers many
large halls, joined together hy
some lengthy corridors.
The first appliance trade ex-

hibition of the new decade will provide a valuable platform from which to observe how from which to observe how European industry will seek to overcome the problem of low growth, which it faces in the 1980s. Overlaying the traditional patterns of competition between the major manufacturers will he a common interesting the potential for diversificain the potential for diversifica-tion, in the activities of suppliers from outside Europe, and in the impact of new technology.

The appliance markets within the EEC have seen little pene-tration so far hy goods from overseas suppliers. Disparities in technical and safety require-ments (both the U.S. and Japan use 117 volts 60 cycle mains instead of Europe's 220/240 volts 50 cycles), and fundamental differences in national eating and living habits have combined to provide European manufacturers with a large degree of protection from the

U.S. and Japan. So, freed from the sort of overseas competition that bas reshaped Europa's hrown goods sector, the local white goods industries bave been slower to innovate,

Sales in UK

CONTINUED FROM PREVIOUS PAGE

workforce slimmed down to 1800 the projections of market-ing executive Tony Williamson are cantiously optimistic...

Mr. Williamson predicts that automatic washing machine deliveries from all sources will reach 1.07m which is not signi-ficantly below the 1979 figure of Deliveries in the vacuum

cleaner market are expected to drop by ahout 200,000 on 1979 down to 2,230m. Meanwhile, dishwasher deliveries could well exceed 100,000 machines compared with about 90,000 in the past 12 months.

So what products are going to sell in 1980? Ownership of electric cookers alipped in 1979 by 1 per cent to 41 per cent hut manufacturers see this area picking up in the next 12

months. Over the last five years the demand for huild-in cooker units—as against the freestanding type -- has grown standing type — nas grown steadily. The huild-in oven now accounts for three per cent of ownership compared with one per cent two years ago. The demand for build-in hobs is just as satisfacture. There can be as satisfactory. There can ba little doubt that the market for build-in models is going to ex-

pand considerably.

If the mortgage rate continues to rise and new housing remains scarce, the demand for build-ins in the existing homes will escalate as more and more householders concentrate on improving their homes rather than moving. Experience proves that most bousewives will put the kitchen at the top of tha improvement list.

Similarly, the automatic washing machine market will advance. Many of the twin-tuh washing machines of the John Bloom era have now passed their expected lifetime and few housewives will go without this essential item. The cost of using launderette continues to go

Another product line that augurs well for 1930 is the two-donr fridge/freezer. The single-door refrigerator appears to be losing favour and money spent on replacing this kitchen "must" is being spent on the fridge/freezer. Deliveries to the trade have risen by more than six per cent in the 12 months to ment.

refrigerator has levelled out at Domestic Electrical Appliances 75 per cent of British bouseholds said: "1980 will be a period of steady since 1975. This com- Prospects are not marvellous."

pares with a dramatic rise to 15 per cent for the fridge/freezer last year from 5 per cent in 1975. And freezer ownership has risen from 18 per cent in

There are a number of reasons for the swing to fridge/freezers. The first is space saving; another is the fact that a large freezer is not necessarily the money/ time-saving appliance that many housewives once thought it was.

1975 to 25 per cent last year.

Many of the houses built today have smaller rooms than older properties and It always appears to be the kitchen space that is sacrificed to make way for other living areas.

In heating, the storage radiator has enjoyed a good year following the Electricity Council's introduction of the Economy 7 off-peak tariff. Sales of these radiators are well up after a recent slump and all the

signs are that this will continue. When the Economy 7 tariff was announced in the summer of 1978 it was widely expected to bring the storage radiator hack into public favour. And it certainly did. Sales through electricity board showrooms in 1978-79 soared by 70 per cent to 93,081 units.

However, direct acting heaters auch as radiant and convector types are not so popular now.
Ownership in the UK dropped
from a high of 86 per cent in
1972 to 70 per cent in 1978. And last year there was another 5 per cent fall. Sales of quilted bed covers

appear to have hit the electric hlanket market. Though ownership had remained steady at 50 per cent for five or six years, sales dropped off in 1979 and ownership has fallen by 4 per Electric kettles, bair dryers

toasters, and various other small domestic appliances are all enjoying good sales—except for the electric shaver, where ownership bas dropped from a high of 41 per cent in 1978 to only 36 per cent last year.

Most introductions to company ranges due to be previewed at the International Domestic Electrical Appliances trade exhlhition in Birmingham (January 15-17) are likely to be modifications rather than sensational new ranges of household equip-

Ownership of the single-door Association of Mannfocturers of -a figure that has remained retrenchment for our members.

situation. Firstly it shows that the numbers of appliances built and bought in Europe is very substantial by world standards. The whole of the U.S. white goods industry produced unly about 5m washing machines in 1978, considerably fewer than Major appliances do not, were huilt in the four principal

producing countries in Europe. The American machines, in contrast to those favoured in Europe, are mostly top-loaders, which here would he considered to he wasteful of electricity (and water), and which are, in time, likely to be similarly criticised in the U.S.

The Japanese white goods industry, with some notable exceptions, is still a lnng way hehind that of the U.S., and even further hehind Europe. While Japan produced about 4m washing machines in 1977, fewer than a quarter ware modern automatics, the rest being twin-tubs, wringer mutdated being twin-tubs, wringer machines and other out-dated designs. Thus an early threat of large-scale imports of these products from ontside Europe continues to be unlikely.

The second aspect of Europe's iodustries that is Illustrated by the table is the way in which some countries, and this is most true of Italy, have managed to corner large sectors of the market. Italian producers have the major share of the key clothes wasning, refrigerator and freezer production programmes. In contrast, they have a poor standing as producers of small appliances, such as vacuum cleaners and food mixers, where Germany and France are the

Expertise in the design, manufacture and marketing of smaller appliances has been a dominant theme in the U.S. business in the past decade, with vast numbers of appliances, and must therefore redouble many almost unheard of in their efforts to find the right Europe, which have buoyed up the for diversification. the American Industries. rmulæ for diversification. the American Industries.

The table illustrates some of Nothing really comparable has

or Japan, although Japan's production in 1977 of more than 4m electrical appliances all dedicated to the sole purpose of cooking rice should not go

course, live in isolation in the home, and a principal theme in Europe has been the increasing need for harmoniously related units that will combine well with modern European kitchen. with modern European kitchen design schemes. The larger con-tinental producers all seek increasingly to offer as complete a range of appliances as pos-sible, and the teaming-up of appliance and kitchen fitments manufacturers has become a significant element in market-

ing strategies. . This policy has been implemented largely within the framework of the industry's traditional electro-mechanical engineering practices. However, this year's Domotechnica exhibi-tion will demonstrate more positively than ever before, the industry's ability to absorb and exploit the facilities offered by an advanced technology electronics.

Three separate factors are now combining to accelerate now commining to accertate
the use of electronics. First,
the availability of very low cost
micro-processors and cheaper
displays is attacking the cost
penalties previously associated with the adoption of electronic rather than electro-mechanical timing and programming

Once they have been designed in, the micros will open the way for much greater sophistication of control, allowing clever, yet easy-to-use solutions to devised to the problems of machine by huilding in a variety of pre-programmed operating cycles, and permitting many other ingenious new and useful involved in these two cooking features to be added. One need processes are very different. instructing the recorders or the American microwave cookers to get a glimpse of what will become possible through the use of

In the U.S., the Department

of Energy is now setting applications.

ance standards, which manuface. In contra turers will be required to meet. for the energy consumption of supplant gas or radiant ring refrigerators, freezers, water. heaters, air conditioners, cookers, home beating applihome. Their market share in ances, clothes dryers and tele-vision receivers. Manufacturers will need to design machines with better insulation, more efficient motors and improved operating cycles.

There can be no doubt that electronics will play a very positive role to improving the energy-efficiency of many appliances. Already today, top-of-the line tumbler dryers use humidity sensors to limit the duration of the drying cycle and the amount of current consumed. Eventually, it will be possible to manufacture washing machines which closely match their demands for water, elec-trical energy and detergent to the kind of washload.

In between these extre combination of lower energy formance can result from the application of intelligent alectronics to cookers, food processors, washing machines, dryers, refrigerators and freezers, and to many forms of home heating

The third area of prime alectronic interest lles in the impact of electronics upon the fundamental appliance processes themselves. Those working in this field have by-and-large been disappointed at the lack of real progress in the past. Clothes are still washed using techniques not fundamentally very far removed from the ancient one of hashing the material on a stone. Hopes that ultrasonics might offer new clothes washing technologies were dashed when it was discovered that energy in this form, transmitted through the water, tended to damage the fabrics being washed. (Ultrasonics is nevertheless the best way of cleaning many more robust objects, such as jewellery).

It has now turned out that it is in the technology of cooking that electroulcs is making its first real impact on the fundamental appliance processes themselves. Tha size of this impact can be gauged hy the fact that in the U.S, the size of the cooker markets based npon the two new key technologies of microwave and induction heating had a value of almost \$1,300m in 1978.

Ten years ago this business simply did not exist; today it absorbs about 40 per cent of all American expenditure on major

look no further than the latest Microwaves beat only the food in utensils. For this reason the cookers can be very efficient, and the cooking process is very second, we are seeing the widely used in Japan as the beginnings of a real concern on principal cooking appliance, in the part of consumers with the the U.S. they fulfil a rola which amount of energy and other re-sources which are used by the tional cooker, while in Europe products which thay purchase. so far they have been largely confined to the catering applica-

In contrast to microwave ovens, induction cookers aim to Europe is non-existent, and even in the U.S. only about 249,000 were sold last year, fewer than in any of the four previous yaars.

The attractions of a completely flat hoh, as easy to wipe clean as an ordinary working surface, have not so far out-weighed the cost premium and the very naconventional "feel of the induction flat hoh cooker. The Cologne fair will provide

an insight into all these facets of an industry which needs to innovate not only to expand but also to serve the needs of an increasingly energy conscious community.

Tony Jacobs is a consultant of Mackintosh Consultants.

In America, for 25 years, our microwave cookers have been a shining example to others.

Now there are so many first-time purchasers in Britain, our time-proven reliability makes choosing the best that much simpler!

Sewing machines battle

BY JOHN LLOYD

appliance market—cookers, re- power tools and furniture. frigerators, vacuum cleaners and washing machines — has remained relatively stable in terms of its products for years, and is likely to do so in the future. Only the advent of the freezer, and then the fridgefreezer, has marked a change. though the change is more the development of an existing appliance rather than the production of a wbolly new one.

However, there have been marked finctuations on the periphery. In the past few years -and most dramatically in the last year-the sewing machine market has declined, and pre-sently shows no firm signs of bottoming out. At the other end of the scale, the development of the microwave cooker bas created quite a new sector, one which is expected to grow

The domestic sewing machine is Intimately connected with the U.S. company, Singer, whose name is almost synonymous with it as Hoover is with the vacuum cleaner. Singer has been pro-ducing sewing machines since last century, and its production bas survived and thrived even after its operations in one part of Europe were hombed those in another oationalised by the Nazis.

For decades Singer was a one-product range company, with plants and sales outlets all over the developed world. However, in the late 1960s, it saw the need to diversify and rode off in all directions at once. Under the dominant leadership of the late Donald Kircher, chief executive until 1975, the company acquired computer businesses, white goods companies and housing and property

These acquisitions—not all of hich were unprofitable stretched Singer's management resources to breaking point, and diverted attention from its main business which, in the early 1970s, was running into

In the U.S., Singer's prime Flavin closed Singer's Clyde-market, sales peaked in 1972, bank, Scotland, factory, whose In Europe, they peaked in 1974. Yet the business still made a profit; and so when Mr. Joseph Flavin was brought in from taking a \$130m write-off. That Xerox (be had earlier been a will not be the end; there will senior executive with IBM) to be further cuts, and the world-succeed Mr. Kircher, be conceptated on cutting back on retail outlets will be sharply the heaty acquisitions. the hasty acquisitions, keeping curtailed. obvious cause: the Japanese manufacturers, who had been steadily increasing their market share since the 1950s, were beating Singer machines on price and, at times, on features

too.
The other reason, however, was more disturbing, and it was revealed only when the com-pany commissioned a report into the sewing machine market. The report pointed ont, unsurpris-ingly, that young women—the consumer the company had to attract as purchasers—no longer had the interest in sewing which their mothers had had.

In 1978, the year after the report was delivered. Singer's sewing machine business in the U.S. lost money for the first time: the combined operations crawled into a \$5m profit because of Europe. But in the first half of 1979 the combined operation lost \$6.8m.

Conventional cookers

etched on to the chip's surface it may become part of a radio, camera, digital watch, an important part of a television set, or even a computer. Silicon chips are found now in the bome in bi-fi systems, telephones, cookers, refrigeratora and washing machines.

In washing machines and automatic dishwashers, complicated mechanical timers and controls are replaced by their electronic counterparts but have fewer moving parts and so have greater reliability. Originally, electronic controls used individual components but manufacturers are now starting to use the micro-processor—which combines these functions—to control the operation of their

By the middle of next year, Hotpoint, part of the General Electric Company, is expected to bring out a micro-processor version of its automatic washing machines although it already has a less sophisticated elec-tronic version called the Liberator. Most of the other home laundry companies are also in a similar position.

Investing in micro-processor controls is an expensive, hut worthwhile exercise for manufacturers. For example, Servis Domestic Appliances has invested £1m in the development of an electronic controller for its washing machines. It was the first company to bave a micro-processor-controlled washing machine in full production, beating even the U.S. and Japanese companies.

Servis' Selectronic model will be followed by other microprocessor-controlled machines to keep up the momentum of design. The company, which owns about 14 per cent of the UK market, is aiming to enlarge its market share and the company has stated its intention of boosting production by 1,000 units a week.

But what does the microprocessor offer the consumer? It is extremely simple to operate, less likely to break could be controlled from a down and can be repaired more easily. A simple touch button replaces the traditional electromechanical dial switches to select the seven different washing programmes.

Since the micro-processor allows the wiring to be very much less complicated than wiring on a conventional machine, the Selectronic is also three inches shorter than these types. So, this is also a selling point for consumers who bave kitchens into which larger machines may not fit.

technology provides an oppor- operate randomly. tunity to save on maintenance costs. For example, one call and bot water control systems fewer per week for each of its are very crude compared with maintenance staff could result the possibilities for totally elecin annual savings of about tronic ones.

A silicon chip can be designed to do many different jobs and cookers controlled by microtoday costs only a fraction of electronics. Again, the new its price when it was first components replace mechanical invented more than 20 years timers to regulate temperature precisely and switch on and off when necessary to ensure toat

> Increasingly, traditional elec-tric and gas cookers are being challenged by more imaginative forms of applia.ces such as those using ceramic hobs, and the space age microwave ovens. Many companies now producing microwave ovens, such as AEG Telefunken, aim to encourage working mothers to invest in quick methods of preparing meals.

microwave When appeared on the market several years ago they, too, bad very simple controls — they were either on or off. Today ovens made by companies such as TI Creda allow the user to vary the power of the microwave

Micro-electronics in all products allow closer control, and in sewing machines the microprocessor enables the user not only to choose from a wide variety of stitches but also to add new types of stitches. The micro-processor can remember these new patterns and they can be recalled from the sewing machine's electronic memory at

In industry, sewing machines bave gone one step further than this: they can automatically sew a particular shape as well as a particular stitch. In the future, domestic machines may bave a similar facility, which could truly take away many of the problems of making clothes. Washing machines, cookers

and sewing machines are just some examples of domestic appliances which have fallen prey to the micro-processor's advance. Dishwashers, too, are destined to follow this same path, but even lighting and central heating systems offer great opportunitles for this ubiquitous component.
A popular feature in many

homes today is the use of light dimmers to vary the light in-tensity instead of ordinary wall switches. But by incorporating a micro-processor all lighting central point in each room. The brightness could be automatically determined by the microprocessor according to the brightness of the day and the function of the room. An extremely useful aspect of

the micro-processor'a capabilities would become apparent when a family is away on holiday. The micro-processor could be programmed to switch different lights off and on in a logical but varying sequence. This would be a better deterrent against a burglar than today's For Servis, micro-processor fixed time switches or those that

Attitudes to Armageddon

circumstancea. Thera are two contradictory temptations and many victims vacillata hetween the two: to paoic, or to adopt the ostrich-like attitude of the preacher who invented the formula "Let ua confront this difficulty squarely, and pass on. Both attitudea have been avident in the last few days, in face of tha very different crises arising from the Russian takaover of Afghaniatan, and our own ateel strike. There have been extreme statements on both topics: perhaps Sir Charles Villiars characterisation of tha steal dispute as Armageddan is the most exaggarated, but on the international scene, the gold market has been neck and nack with him.

At homa, hy contrast, a somewbat technical turnround in the gilt-edged market was being treated for much of yesterday as if it heralded an investors' millenium. Sinca it is unlikaly that we face either Armageddon or the Age of Gold in the immediata futura, a more reasonable assessment would he in order.

Economic implications

The international crisis is not, of coursa, economic, but it does have economic implications. Measures designed to ensure bigb enough price for its expansionism to hurt, and so perhaps to sway the next debate within the Kremlin, also imply costs for those imposing them,

One cost, as Wall Street has very promptly registered, is a This may be good news for the compenies lovolved, but it is unquestionably a setback for dollar. Defence spending is loflationary. Grain and technical embargoes blt the balance bare maintenaore of the busi of payments. If U.S. measures ness had clearly fallen very era to be supported by sharply even shead of the America's ellies, as Mrs. expected recession.

Thatcher clearly intends, similar costs could be imposed on

At home, the steel dispute is a microcosm of the whole struggle in which the Government is engaged. The aim is to ket's performance probably force s loss-making industry to also reflects the fact that the confront reality—though a still de-Industrialisation of Britain more drastic reduction In тоте realistic and constructive alter- smokestack

Io face of this the trade unions have initially reacted by manufacturing. Sir Harold reverting to their ancient pre- Wilson used to seek economy reverting to their ancient prejudices io favour of big, round in which it was easier to earn numbers and opposition to money than to make it; Mrs. everything that might improve the situation. While talk of edly of the oeed to earn sticking out for 20 per cent, or incomes through output. resisting even the closurea alraady agreed on, is no doubt the view that production of largely propaganda, it is potan- internationally tially harmful propaganda. Last chance for the Port of London **Authority**

BY WILLIAM HALL, Shipping Correspondent

problems of Britain'a premier seaport but to no evail.

Now Mr. Paige, deputy chairman of the National Freight Corporation and son of an ex-London docker, has only weeks left to solve the worst ever financial crisis in the history of the 72-year-old PLA. If he fails, it will go into receivership jost like the Mersey Docks and Harbour Board did ten years ago and few people, outside the PLA. care. It is a sad fect of lifa that this once proud port has just ebout exhausted the public's sympathy for its aerious problems.

It has been common know-PLA ia technically insolvent and continues to trade solely on the basis of government support. However, lest month the Government announced a strict limit to future financial assistance and turned down the PLA's urgent plea for a capital recon-struction. The Government said that it was going to honour the previous Government's commitments to meet the severance costa of surplus manpower but made it clear that there was no more money after that.

Against this harsh beck-ground of inflexible financial limits, a number of factors are working to make the PLA's financial crisis even worse than it was only e few mooths ago. Higher interest rates are leading to much higher financing charges and the downturn in the world economy is jeopardising the traffic forecasts on which the PLA's recovery bopes are pluned. Worse still, planned reductions in manpower and improvements in working practices are running badly behind schedule.

knows full well that, only months after taking charge, the PLA might not be able to pay its bills and will have to turn to an unsympathetic Government for help. However, his most immediate problem lies closer to home. He has to impress on the PLA workforce the speed with which the money is running out.

This, in itself, is no easy task sinca successive chalrmen and The Secretary of State for managements bave heen talking Transport, Mr. William Rodgers, about the financial problems of promised to support the PLA on the PLA as long as most dockers condition that it did not close care to remember. The facts the Royal Docks.

TEW people can envy Mr. ere so well known now that Victor Paige, who took their Impact is almost lessened over as chairman of the by repetition. The port has crisis-ridden Port of London made a loss every year since Authority (PLA), last week. For 1975, has forecast e loss of £19m yaars, wall intentioned people before government grants for have been trying to aort out the 1979, and expects to lose money for the next four years at least. The PLA's reserves have fallen from £54m in 1975, to a deficit of £6.5m by the end of 1978.

This supports (if that is the right word) capital employed of around £100m.

Mr. Paige's predecessor, Sir John Guckney, was only et the PLA just over two years, much to the disappointment of some, who would have liked him to have seen the port through the current crisis. However, during his brief sojourn (he spent an even briefer time as chairman of Mersey Docks) he has managed to dispel the PLA's aloof image and get everyone concerned with the port talking ledge for some time that the about ways of solving its problems. This in itself bas been

Downstream proposal

However, while there bas been plenty of talk there has been precious little action and the PLA's plight has been exacerbeted by the political indecision of successive govern-

In the spring of 1978, the PLA suggested that the only wey to make the port commercially viable, without outside financial help, was to close both of the Upper Dock systems in London's East End and transfer the business downstream to Tilbury -a trend which has happened et virtually every major port in the world as ships have got higger. This proposition caused such an uproar that there was even talk of a national dock strike in protest. The PLA wetered down its plans and insteed proposed that one of the Docks, should be closed and husiness transferred to the India and Millwall Docks, and downriver to Tilhury. In the run up to the general

election the Labour Government was keen not to alienete its the Royal Docks would bave been a nasty shock to Newbam. a aolid Lahour constituency in which the docks are situated.

of view the vetoing of the Royal Docks closure colved a short term political problem but for the PLA it was e bitter blow and Sir John Cuckney aeriously considered resigning in protest. However, be stayed on and the Government promised the PLA

From the Government's point

up to £35m in grants which was to he used to finance severance costs. There the matter rested for some months and the PLA went back to work on its long term recovery plan. In early 1979 the Govarnment was defeated and any decision on the PLA's future plens were delayed while the new adminis-tration attended to more urgent In June 1979 the PLA sub-

mitted its five year plan to the new Minister of Transport who promptly commissioned yet another report from e firm of outside eccountants. Early last month, nearly 18 months after the previous Government had announced its policy for the PLA, Mr. Norman Fowler, the Minister of Transport, announced e fresh twist in official thinking ebout London's helaagnered port.

Instead of ordering the PLA to keep the Upper Docks open the Government said that it was up to the PLA to decide on the detailed steps necessary to achieve viability. In addition, the Government agreed to con-tinue the previous Government's undertaking to provide grants towards the cost of severance of close to £40m and to stand be-hind the £25m of commercial loan fecilities that the PLA had negotiated since June 1977. It also agreed to the postponement of £6m of loan repayments and to support a £5m overdraft fecility if necessary. At the moment the PLA's

is still to keep both Upper Docks open but to reduce the number of berths operated (the concentration option). Over the period from June 1978 to 1983 the PLA plans to reduce the number of registered dockworkers (RDWs) by just under a third to 3,745 and cut the thirds of the planned reduction staff levels by slightly over a in PLA employees in 1979-80 is a detailed timetable for improved working practices.

The perennial problem for the PLA throughout the last decade has been surplus labour. As conventional traffic was con- targets in the current year must

(including the private wharves) has fallen from 24,000 to 8,000. However, the PLA has found that far from its own dock labour force declining it has been increasing hecause it is obliged to absorb workara made redundant by private wbarves. Even after the recent redundancies the number of dockers employed by the PLA (as opposed to the private wharves) ia over two-fifths up on 1970. It has tried to soften the impact of its swollen dock labour force by reducing its administrative staff from over 6,000 to under 4,000 over the same period. Absorbing surplus labour

PORT OF LONDON AUTHORITY

VOLUME OF TRADE

PLA WORKFORCE

from privata employers which go out of husiness is a main problem for the PLA—since there is no provision for compulsory redundancy in the docks, in addition, following the Aldington-Jones report of 1972, the PLA is committed to paying normal wages to dockers even if there is nothing for them to do.

port over the long term.

surplus

oo the second sbort term plan (1979-80) is running badly behind schedule. On present form it looks as if less than two fifth to 3,655. In eddition, there - will take place. It is also clear thet very little progress has been made on improved working practices.

commercially viable

At the moment the PLA is paying around 750 men (17 per cent of its dockers) for whom there is no work. This costs the authority around £3.5m a year and is a constant running sore. Another problem is that perhaps a third of the 750 are incapable of working yet the PLA has not been recruiting young dockers for the last decade. The average age of the PLA's workforce is steadily increasing which is a serious threat to the PLA's ambition to remain a bealthy and efficient

Cutting the

Sir John Guckney bas already said that failure to meet the tainerised the number of dock- mean a total reassessment of

ers employed by the whole port the PLA'a position. Given the combination of the tight financial limits, the delay in the manpower reductions and the Government's refusal to support a capital reconstruction, it seems inevitable that the PLA will have to reconsider its policy of keeping both Upper Docks open sloce by its own admission they are no longer It is against this gloomy

background that Mr. Paige takes up his new job. Unlike his pre-decessors, he does at least have one advantage in that he has spent the hulk of his working life dealing with manpower problema. After nine years with The Boots Company, he went to the Go-operative Wholesale Society as controller of personnel services and then joined the National Freight Gorpora-tion as director of manpower and organisation. Whether his skills in dealing

with industrial reletions are sufficient to cope with the tre-mendous problems of the PLA given the shortage of time, is open to question. Apart from the PLA's internel problems, Mr. Paige has to face up to the increasing criticism from rival ports of continued support for the PLA. The principal critic Is Sir Humphrey Browne, chairman of the successful British Transport Docks Board. Sir Humphrey has been aroundthe ports industry longer than most, and is close to retirement so he is not averse to ruffling a few feathers. Sir Humphrey's main com-

plaint is that the PLA is being effectively subsidised on two counts, through Government assistance with severance pay ments and by official hecking for commercial borrowings. He outlines his view of the PLA crisis as follows: .

"There is ample port capacity competiti Consequently, the whole aim in the UK; yet very substantial plan is to cut out the surplus by taxpayers for the PLA and these subsidies are being provided by taxpayers for the PLA and these subsidies are being provided by taxpayers for the PLA and these subsidies are being provided by taxpayers for the PLA and these subsidies are being provided by taxpayers. to sustain docks which in the words of the previous chairman. can no longer be considered necessary. With subsidisation, charges can be fixed at "I believe in competition. I

industry could become irreparably damaged. Of course recognise that the Upper Docks present a problem and that rationalisation does require short-term once-for-all assist-ance. The vice of what is heppening is that the centre of the problem has not yet been Rather understandably the

Port of Liverpool also feels that it has been shabbily treated by comparison with London. When the Mersey Docks and Harbour Board ran into difficulties in 1970 the Conservative Government of the day had no hesitation in putting it into receivership and forcing a 60 per cent write-down in its capital debt with tha result that many investors lost a considerable amount of money. In eddition, Liverpool has spent around £16m on severance payments over the last few years but unlike London has received no Government aid.

Profitability warning

After the Mersey Docks crisis the Government published a white paper, "Financial Policy for the Ports." In the light of the current situation one paragraph is worth quoting: "The Government does not believe that the problems of the ports in this country will be solved by either subsidies or the worn out specific of nationalisation. The Government expects the ports to put themselves in a position where they can provide the services essential to the country's economic prosperity efficiently and profitably. They are expected, like other businesses, to be self-supporting and This statement may well-

come to haunt the present. Government in the months: ahead. Present official policy towerds the ports, like that of previous administrations, is full of inconsistencies. If Mr. Paige can transform the fortunes of charges can be made the rine before the month of a uneconomical levels to secure out, and without the help of a the PLA before the money runs. capital reconstruction, the "I believe in competition. I Government will be very happy, believe that the profitability of But if he falls then the PLA's.

Letters to the Editor

Housing

wagas.

From Mr. J. Straw, MP Sir,—During the General Election, Michael Heseltine, now Environment Secretary, claimed categorically that "selling coun-cil houses saves public money." The ao his more recent atatement avoided the acepticism around (quoted by your correspondent its costings if it had accepted Andrew Taylor, on January 3) the suggestion that I made last that the results of any long tarm show exactly what you want it to show, depending upon what assumptions you build into it " does at least represent some substantial shift of view, and unexpected bumility in tha faca

But it may also be a preparation to discredit Mr. Heseltine's own analysis, due next weak, of sales which on any reasonable the long term substantial lossea on moet sales will arise. For, if with inflation rents risa in money terma, while mortgage intarest paymants ramain hroadly stable, there is hound to he a cross-over point at which tha short term "profit" from salaa hecomas a long term loss, as rent lucome foregona axceeds mortgaga Interest received.

And there is a lot less scope for argument over the basic assumptions than Mr. Hasaltina saams willing to allow. Forecasters may disagrae over tha precise level of inflation in tha medlum term but no one disputes that inflation will ba wall above nil for as far as ona can saa. Nor can thare ba much dispute that council rents will rise at laast as fast as tha retail price index-as they have done over the past 20 years - and significantly fastar when Con-sarvative Governments have been in power (average unrebated rents April 1958: 100: April 1979: 663.5; retail price index April 1958: 100; April

Of course the detailed assumptions will affect the time at which the cross-over occurs but the irony is that tha Gnvernand tha large increases in rants which the Government has been reported as planning will do the

The Government could hava summer for an independant technical inquiry into this question. Tha fact that it bas rejected thia, and has repeatedly dalayad publication of its own analysis suggests thet it now knows that sales at such subatantial discounts are a very had deal for the ratepayer and tha taxpayer. I have no objection to sales

at markat values and outside areas of housing stress but I hava yet to bear a convincing financial or moral case for tha enforced high discount policy which tha Government following.

House of Commons, SW1.

Imports

From Mr. A. Porsons.
Sir, — Various articles within

your nawspapar during tha past few days bave drawn attention to the "Buy British" viaws nf Michael Edwardes. Indaed, the trada Press of my industry has also thought fit to draw attention yet again to importers.

My company (vary, very small as it may be) is principally an importar of bardware and hand tools. I do not consider, howaver, that I am doing a disservice to the nation by building a business over the past 11 years basad on importad goods — we must look at the problem in depth. For example, a major import item is a range of Denish wallplugs, produced from raw material manufactured in tha UK. This type of reciprocal trading between nations ob-

viously goes oo all the time. We make our contribution toward tha Exchaquar as wall the case. The 331-50 per cent (a) we remove them posaibly et least because BSC was forced, foult.

fit we pay corporation tax; by very nature of trading we for the nation.
Sir, please let us get the im-

perspective. A. Parsons. Thunder Screw Anchors, Industrial Estate. Southwater, Horshom, West Sussex.

Steel

From the Director and Sccretary, British Iron and Steel

Sir.—You are no doubt correct in aaying that tha Government will be seen by tha strikers and by the public es participants in the steel dispute (Leader January 9).

It is however important that that strict llability would be of the poblic (i.e. taxpayers) should he aware of the enormous acope for raising labour productivity in the British Steal Commission, would cloaa a loop-Corporation by concantrating hole in current UK lagislation production in its recently com- ao that all people who are inplated modern plants, by closing older surplus facilities and eliminating restrictive practices could obtain compensation (not elsewhere. Liability From the Chairman Consumera in the European Community Group (U.K.)

Sir,-I read with interest your report, January 8, of the CBI view that strict liability could damage "the interests of both consumer and producer." It is the view of Consumers in tha European Community Group (U.K.), which represents the 22 main UK organisations interested in consumar affairs, great advantage of consumers.
The EEC proposal, and

recommendations of the Pearson jured, or have their property damaged by a defective product,

The EEC proposal would and efficient clerks, in conseestablish the principle that quence of which errors could manufacturers should be strictly and did occur in information liable for their products, regardless of who is actually harmed: marily upon the manufacturer, who created the risk and is best eble to take steps to prevent sary work in the department as accidents happening and to in-well as putting undesirable according to our evidence is person is not left to bear his loss

The "development risk" defence excludes a producer from liability if he can prove that the product was not defective in tha ight of scientific and technological devalopment at the time it was put into circulation. Removal of the "development risk" from the proposal would undermine the principle of putting the responsibility on the person best able to pay. Con-sumars are then asked to bear the risk of the unknown cannot see how this can be argued to be in their interests. Kate Foss. 29, Queen Annes Gote, SW1.

Taxmen

From Mr. J. McNulty. Sir,—David Freud's eulogy to Sir William Pile (January 5) would bava heen more acceptabla had it not heen reported in various accountancy journals that Sir William bad, very recently, submitted to a aelect committae that it was silly to-pretend that Inland Revenua staff did not make mistakes, but that the taxpayer, as a corollery, must give information 100 per cent correct. He was also recantly reported as finding it desirable to produce Inland

reading ege of 12 years. Thirty years ago Inland ment's policies will ensure that in the following ways: import increeses. Since the summer other users) can only succeed Revenue staff wer not only execute that is is sooner, so losses greater, duty is paid on certain of our there has been at substantial interests. Since the summer other users) can only succeed Revenue staff wer not only execute the tremely efficient but were present than might otherwise have been imports; by employing staff crease in steel imports, in part prove that someone has been at part of the tredesmen and the summer of the summer o end artisana were not trained Hull North Humberside.

Revenue notes designed for e

rendared to HM inspectora of taxes without their being any ulterior motive for the mistake. The present policy of producing higher rata assessments in advance of basic Schedule D or E assessments creates unneces-

pressure on the staff of the taxpayers' agents and I think Sir William should have stood firmly against this policy. My tax department advises me than when hardship to a taxpayer arises they are finding it increasingly difficult to contact a tax officer who will eccept responsibility and even if they do

get a promise of immediate action it naver aeema to

materialiae. I would remind David Freud that under Sir William's chairmanahip the Inland Revenue formally denied that district inapectora were advised as to average gross profits of various trades which denial was aubsequently recanted. I would further remind David Freud that a aimpla mattar of tha application of table benefits for private motoring became, in the words of the headline to bis articla, a tax task made more difficult—perhaps a more suitable heading for his article could have been "The iron band in tha velvet glove."

Wool scientists v. the moths: a replay

BY RHYS DAVID, Textiles Correspondent

IN THE former spa town of large sums of money likely to ford and Leeds in West York shire, scientists working for the International Wool Secretariat have been preparing recently enamy—the moth.

It is 15 years since the last work on moth-proofing was necessary and many people will hy now probably have forgotten. that wool used to be in the Two alternative series of pro-Good Food Guide of a number ducts, Eulan and Mittin, are in of insects until treatments with chemicals, in particular Dieldrin succeeded in making the main product at risk carpets a good deal less

The new research which has now-been made necessary stems not from the development of dieldrin-resistant supermoths but from fighter environmental regulations on use of the chemical imposed by a number of countries. Dieldrin suffers from the drawback of being highly toxic and even more important, is persistent and bio-accumulative. When released in waste water it can build up to high levels in fish and thus . pose a danger to man.

Dieldrin has already been banned in a number of countries, though not yet by Britain, which is urging caution on the grounds that while the problems it causes are well understood, less is known about possible alternatives. A draft directive promulgated by the EEC, could, however, lead to severe limitations being placed on its use, a prospect which is causing considerable concern to British carpet manufacturers, similar insects but will not one of the last hastions of mass-remain in the atmosphere. Forproduced, all-wool woven Dieldrin-treated goods are already banned in

The problem for wool is that because the market for a safe mothoroofing agent is very small, chemical companies are

likley, in the moers above Brad- he required to test and obtain clearance for a suitable product. Wool has only 5 per cent of the total world fibre market and it have been preparing recently is only those wool products for a rematch with their oldest which are likely to be in the dark corners favoured by moths -such as carpets—that require protection. As a result, the total value of the market is put at no more than 12m a year. use as moth-proofing agents but both figure on the KEC's list of potentially dangerous sub-stances, even though neither is in the same category as Dieldrin. This is why the TWS has felt obliged to look for a new agent which will be completely safe in use.

"The approach we have adopted is to look at existing them in a suitable manner for moth-processes. By using a com-pound already devised for other purposes, development costs can be kept down," says Dr. Trevor Shaw, textila chemistry manager at Ilkley. Since the threat to continued use of Dieldrin emerged the Ilkley scientists have looked at several dozen possibilities, narrowed these down further to around 12 and become genuinely excited over about three or four.

Of these, the substance that now looks most promising is a synthetic pyrethoid already in general application the substance. Permethrin, has the advantage of being unstable-in other words it will kill flies and tunately for wool, which requires a stable substance so that lasting protection can be obtained, Permethrin's stability is greatly improved once it is in the fibre. Unlike Dieldrin it unwilling to risk spending the safely handled at effluent treat- synthetic rivals.

From which has now established for next June upholstered furniture itself a key role in ensuring which does not conform to that wool is not left behind by certain fire resistance tests will the technical progress of the have to carry a warning label. wblle from next December upgradually breaks down and able, on occasion, to exploit bolstered furniture will have to be able to satisfy tests for waste water containing it can be advantages it has over its

cigarettes. A further review will be held 12 months after regulation comes into force to decide if upholstered furniture should also be required to pass tests for resistance to match flame.

According to Dr. Lado Benisek, special finishes expert at likley, possibly as much as 40 per cent of the fabric used in furnishing coverings in the UK could fail the second and much more stringent match test if this is eventually incorporated in regulations. Wool, would . pass, however. would some of the specially modified man-made fibres, such as modacrylic.

Fire bonus

Wool's fire-resistance proper-ties are due in part to its high water content-roughly 14 per cent. When exposed to extreme heat it tends to char rather than melt or burn and this is again an asset, providing a form of resistance and delaying the spread of flame to nther materials such as foam interiors. Wool's charring characteristics also make it less of a hazard to fire victims. Fibres that melt can cause deep hurns if they drop on to skin.

The likley work was prompted initially by demands from the U.S. authorities for improved fire safety standards in carpets, and in furnishings used in public places. Further impetus was given to the search for newer and safer materials the development of wide bodied jet eircraft such as the Boeing 747. A treatment for wool fibre hased on the metal zirconium was developed at lkley under the name Zirpro and bas been used in the 747 jumbo jets and other aircraft. version which reduces smoke levels given off by Zirpro-treated fabrics bas also recently been developed to meet

new 757 and 767 aircraft. Scientists at Ilkley will be continuing to develop the lowsmoke Zirpro for use in a wide variety of places-hotels, offices, and other similar buildingsalready subject to stringent fire test regulations in the UK and developed countries. Efforts are being made also to try to combine flame resisting shrink treatments with resistance and oil and water resistance to produce robust fabrics which will shrug off stains and can be cleaned easily. The problem is combining these treatments without making the

The success of Zirpro-treated wools has encouraged the IWS to look at new markets in specialised safety products as well. With technological belp from Ilkley, specialist clothing companies in a number of European countries have developed protective suits for use by workers in the metalworking, petrochemical, cera-mics, and other fire or heat-risk industries, as well as for firemen and car racing drivers Much of the work at Ilkley is less spectacular and has the

fabrics too expensive.

objective of trying to ensure that the mills of Western Europe, Japan and, to a lesser extent, the U.S., continue to find wool an attractive fibre to use technically and economically, The long-term threat to wool is that as a natural fibre it is more difficult to process than synthetic fibres and could, there fore, become less appealing to mill nwners seeking high output levels to hold down overheads. Textile production is passing, too, from the developed countries, such as the UK, to newer centres without a tradition of bandling wool, where demand is again likely to be for a fibre that is simple to

At the same time many of the bigger mills in the devel- these are too harsh for wool.

standards set by Boeing for its oped and developing countries Machinery improvements have multi-fibre basis and will not want to invest in the specialised equipment which some wool processing stages require.

Finally, the synthetic fibre producers can now create variations of their basic products specially tailored to meet particular market requirements -a wool-like feel for knitwear, example, or a soft clinging feel for women'a dresswear. Though there are different types and thicknesses of wool, some of the modifications required in the marketplace can only be achieved by the addition of resins and finishes in the mill such as the special superwash treatment, again developed at Ilkley, which gives wool knitwear machine washability with-ont shrinkage. Though this produces a higher quality product for which a bigher price can be asked, this has to be balanced against the extra cost tional process.

Development

tackled at likley by close liaison with machinery makers to try to ensure that new develop menis can be extended to in-clude wool. Work is being done, for example, to see if wool can he spun using the very fast developed for cotton 10 years ago. Spinning wool on conventional cotton spinning equipment is also being tried to make wool more attractive to developing countries without wool sninning facilities. Another line of research is in the field of dyeing and nrinting wool. Older dyeing methods in the textile industry have been superseded in recent years by newer systems involving lower use energy and water and much bigher throughput, but some of

on

are now geared to operate on a now started to emerge which overcome this problem, while at the same time the IWS bas also developed its own cold system wool dyeing which offers better performance and lower cost particularly for dyeing

lighter shades. The IWS has helped with the development of a new system of drying fabrics using radio frequency waves. The technology being used was originally devised for use in the UK baking industry but work by IWS, the Yorkshire Electricity Board, and a number of independent electrical equipment makers bas now produced a system suitable for textiles. This is likely to be put on the market next year by Smith's Textile Machinery of Rocbdale.

The TWS is reluctant to reveal just how much its Ilkley research bodget is, though an educated guess would suggest at least £2.5m a year. This figure is an indication of the value and importance attached to the centre by the four countries which provide the funds for IWS—Australia, New Zealand, South Africa and Uruguay.

Ilkley's significance lies in the increasingly tough competition between the natural and synthetic fibre producers. During the synthetic fibres crisis of the 1970s, the IWS continued a major promotional campaign for wool and this seems to have helped it to hold, and in anme cases increase, its share of the market. Following the restruc-turing that bas taken place within man-made fibres during recent years it seems certain that the companies that have survived will emerge as more powerful competitors in the 1980s. The fact that wool is able--in its own field-to match and sometimes better the beavilyproducts of the chemical industry is due in no small part to the work done by

Weekend Brief

A tale of snow business -no business

Speculate for a moment on why some of the more commercially minded residents of New York. State felt a lightening of the heart at the sign of a few light. snowflakes this week New York did not get a White Christmas, and the way things are got even although It is bitterly cold, they do not even look like getting a White Easter. For New York this is alarming news, as next month the small upstate resort town of Lake Placid is supposed to be play-ing host to the Winter Olympics.

No nne really believes that Lake -Placid will he without snow when the great day comes, but whether or not it will have Olympic standard snow is another matter. For good ski conditions you need early snows, perhaps followed by a bit of rain and some cold by a bit of rain and some cold-nights. You then get a good firm base. It is onto this that the main falls of January tumble and provide the ideal conditions for the various Olympic events. For Lake Placid to get the whole range of weather in four weeks seems

the nation has a great deal sunk in the hosting of the Olympics, and the idea and the idea of the world seeing this major event played out against a backdrop of snewless winter pastures is a worry-ing one. But there is no question of the Games being cancelled nr moved. Lake Placid is already making its own snow with machines and, provided the temperatures stay low the resort will continue to do so. Cloaking the lengthy cross country courses with sufficient cover is however, likely to prove a massive taskand an expensive one.

The non-sporting fraternity has other concerns about the absence of snow. Without 2 snow cover to keep the ground relatively warm, the winter chill can bite deep into the earth. It is just this factor which crippled a Russian grain harvest a few years ago as, instead of snuggling under the snow until the warm spring sun arrived the seeds were killed off by sub-zero exposure. Now some of New York's state's vegetation is faced with the aame fate. More prosaically residents are alarmed at the prospect of the cold getting down deep enough to freeze, and crack, under-water piping.

The other fascinating speculation at the moment, of course, is nver what sort of reception the Russian competitors are going to get from American crowds at this festival of snow and ice. The cynically minded might be forgiven for thinking that one of the reasons the U.S. has been holding back in urging its sports teams not to compete in the Moscow summer Olympics is events. Any cancellation to the pay up.

Why many Americans are yearning for a snowy white January... How the City of London worries about the Moscow Olympics... and the cocktail comeback

area, which is awaiting gate and

television receipts to pay off the A TIZZ vast investment. Waiting on Mother Nature for snow is one thing, waiting on international politics adds another cruel dimension.

City hearts

As if winter worries were not enough there is another aspect of the Olympic game which is sending shivers through close carpeted offices in both Naw York and the City of London. America's NBC television network, which is currently taking a terrible beating in the ratings, bought the TV rights to the Moscow Olympics in a 1977 deal for \$87m, and promptly insured itself against American non-participation with Lloyd's. The policy gives NBC 85 per cent of any money it has paid should the U.S. team not be present

Every day that passes puts been, but it is the mixed delectably simple fromboise fizz; up the amount that Lloyd's drinks everyone wants these eau device of wild strawberries stands to pay out. Astra Industrial loses ground at interim stage

Rowe and Pitman and Wood Gundy, London, jointly have placed Minorco shares arising interest of £136,000 compared with £56,000, Astra Industrial with £56,000, Astra Industrial recent engineering strike caused Group reports a decline in prefrom the reorganisation of Chartered Consolldated at U.S.56.10 net per share or the sterling equivalent. The sbares were placed in the UK and with internetional institutions worldwide excluding, for regulatory

very large dealing stock may show little surplus et the half-year stage.

The outlook for British Electric

Traction is unexciting. Analysts are predicting little change when interim figures are revealed next

Thursday; last yeer's interim profit was £34.4m before taxes.

The reasons for this projection include the fact that the United

Transport subsidiary, which accounts for about 30 per cent of

group profits. has a calendar year-end and will still show signs of last year's road haulage strike.

Further, the group's Rediffusion

interests have not done well and

the Hong Kong operation was in loss. For the full year, projec-tions hover around £75m, against

£72.1m last year.

REFLECTING a reduced contri- been one of consolidation and bution from the metal and metal would provide a foundation for finishing division of £196,000 increased profits in the current against £275,000 and higher year.

tax profits from £426,000 to the effect on customers of the £262,000 for the six months to October 31, 1979.

tax profits from £426,000 to the effect on customers of the metal division was the main reason for the profit sbortfall. At the end of the last full year, when reporting profits of £1.04m. division bas taken place, as a the directors said the period hed has resigned from the hoard. It was decided not to abandon

the company's investment pro-gramme although this ettracted exceptional interest rates. Astra could, release substantial cash resources if an ettractive proposlnon presented itself, and the present difficult times should increase the opportunities for such an occasion, say the direc-

tors.
They edd that every effort is being mede to recoup the differ-ence in profit compared with last year and the company's strong financial base is allowing it to trade successfully against its

competitors.

The net interim dividend is effectively lifted from 0.243p to 0.25p on earnings of 0.66p (0.94p) per 10p share. Last year's total payment was equivalent to 0.783p.
The company's interests lie in

electrical and mechanical engineering, heavy press tool mannfecturing, ferrous scrap processing and sheet steel stockholdings. Six months Year 1979 1978 1978-79

Milford Docks meeting defeats Scanoil plans

Assoc. Newspapers

For nine months.

Ley's Foundries

Astra Ind. int. 0.25
Daily Mail and Gen. Tst. 15.73

THE bid by Scanoll to reconstitute the Board of the Milford Docks Company was defeated at an extraordinary general meet-ing held in Milford Haven yesterday.

In an unusually heavy turnout, shareholders representing over 75 per cent of the issued capital voted on the five resolutions proposed by Scanoil. Of those that voted, some three-fifths sided with the Milford Docks Board and voted against the resolutions. the resolutions. The remaining two-fifths sup-

ported Scanoil. In terms of the total equity Scanoil and shareholders supporting it mustered just under 30 per cent.
The five resolutions recom mended the removal of two existing Milford directors, Mr. Wikinson, and their replacement by three Scanoil nominees, Mr. H. T. Nicholson, Mr. R. A. Eldridge and Mr. E. S. Barrad. Scanoil, which has been lead-ing e ginger group representing about 27 per cent of the Milford

not convince many other ordinary shareholders.

Mr. Richard Eldridge said yesterday that one of the main reasons for the defeat of his proposals was the letter sent to shareholders by Milford employees recommending them not to support the Scanoil

future plans but insisted that due course.

the defeat was not a serious. So for the time being the the defeat was not a serious

Docks' equity has been critical setback.

Scanoil itself controls around full control but with Scanoil of Milford's performance and return on capital. However, it is clear their arguments did equity—the other 17 per cent uncertainty still exists. Clear their arguments did represents other interested scanoil has never to the support what it would like to the support the support what it would like to but anart for the support of the Milford Docks' waiting in the wings constitution. parties that have been supporting Scanoll. Mr. Eddridge claims what it would like to do with Milford but apart from the that he is still showing a profit property potential it is clear that on his investment although the shares have fallan back from a statutory company established. with 214p at peak.

Milford workers and put his case amount of shareholders' support, ecross. He insisted that he had he declined to reveal his plans no plans for any redundancies. for Milford's future but said that He would not comment on his shareholders would be told in

Vita-Tex soars to £757,000

TAXABLE PROFITS of Vita-Tex, manufacturer of warp knitted fabrics, were more than doubled from £351,000 to £757,000 in the six months to October 31, 1979, and turnover went ahead from £4.04m to £5,97m.

However the directors warn £250,000 (£75,000). that while trading continues to be satisfactory, the first half result should not be taken as an Lidstone indication of the likely outcome for the full year, bearing in mind the general economic outlook.

In view of the current offer from the British Vita Company, the directors do not intend to pay an interim dividend. Last year, payments totalled 4.6p on pre-tax profits for the year of £803,000

Sales to the automotive indus- private Smithfield meat trailer try have been maintained at a which has gone into creditors' good level, say the directors, and there has been a most encouraging increase in sales and margins of household textiles and

clothing.

Tax for the six months takes

Lidstone is creditor of meat trader

LIDSTONE, the publicly quoted butchers and property group, is one of the unsecured creditors

Mr. Gerald Stitcher, chairman and chief executive of Lidstone, is also chairman of Glimore, whose affairs are to be examined by the City of London Police

Fraud Squad, A statement from Lidstone issued yesterday said that provisional arrangements were being made to protect Lidstone from any loss should its debt prove irrecoverable. In any case, the board says

that Lidstone continues to trade profitably and is not experiencing any financial difficulties. Net assets per sbare for the year ending July 21 last amounted to 222p.

BIDS AND DEALS Tricoville/Jeeves offer details

tion, Tricoville will also pay £80,000 cash for 10 per cent of the issued share capital of Jeeves of Belgravia International.

Jeeves Internetional holds franchising rights to the Jeeves marque outside the UK, and will grant Jeeves of Belgravia 99-year excusive rights to operate in Western Europe. Both trans-actions are with effect from November 1, 1979, and are conditional on approval by Tricoville at an extraordinary general meeting scheduled for January

The oBard of Tricoville, which controls 63.6 per cent of the company's ordinary shares, will vote in favour of the acquisition. The deal also contains provisions relating to the British Clothing Care Company, which is registered in New York and has a 99-year franchise on the Jeeves marque in the U.S. BCCC is jointly owned by Jeeves International and Neil and Spencer Holdings. Jeeves International has an option to purpose the provision of the provision o has an option to purchase a further 20 per cent of BCC from N and S, contingent on BCCC repaying a \$400,000 loan to N and S by July 1984.

If Jeeves International becomes entitled to purchase the 20 per cent share in BCCC, it will offer half that shareholding for sale to Jeeves of Belgravia at a price between \$30,000 and

Plum Projects, a company established by Mr. Sydney Jacob, the founder of the Jeeves group, is contracted to provide consultancy services to Jeeves of Belgravia for 25 years. Mr. Jacob vill superstants Jacob will guarantee to provide the services in person for four years, and Jeeves may terminate the contract at any time in the even of his death or incapacity. Jeeves of Belgravia bas net tangible assets of £180,000, and mede a pre-tax profit for the six months to Octobar 1979 of £96,000. It operates four shops in London. Tricoville intends that Jeeves open a further two in the UK and two more in Western Europe over the next five years.

NEW LIFE BUSINESS

Unit-linked record by **Abbey Life**

REGULAR premium unit-linked life and pensions business broke all records in 1979 if the results achieved hy Abbey Life are a reflection of the industry. The company, one of the major unit-linked life companies, say new annual premiums last year jumped by 53 per cent from £23.5m to £36m and single premiums rise by 60 per cent from £36.3m to £58m.

New annual premium life business in 1979 were two and a-half times higher than the pre-vious year—£18.3m compared with £7m. The growth occured across tha range of regular savings plans, with marketing from direct sales staff playing a major part in this increase.

Annual premium pensions business was also bigher last year; overall up by 7 per cent from £16.5m to £17.7m. However this growth came entirely. from executive penaions scheme business which recorded a 19 per

cent rise in premiums to film.
Self-employed pensions last year
declined 9 per cent to f6.7m.
The growth in single premium
business last year came entirely
from sales of guaranteed bonds meome and growth. In a year that was favourable because of the high level of interest rates, sales more than tripled from £9.8m to £35.5m. But this is a

very volatile market Unit linked bond sales fell on the year by nearly 15 per cent from £26.5m to £23.6m. About three-quarters of new money went into the property fund, the largest property fund amone the linked companies, the rest being spread ampng the other funds.

year in the UK only, reached £154m in 1979, against £107m in 1978. Of this amount, £98m represented annual premium contracts and £58m single

CROWN LIFE

The Crown Life Group of Com-panies (UK), the UK life and pensions subsidiary of the Canadian hased Crown Life Insurance Company, also had a successful year in 1979 for linked life business. The company, which entered the linked market in April, 1978, received linkedlife annual premiums of £4.75m in 1979, against £689,000 :: 1978.

Linked single premiume last year doubled from £1.06m to £2.3m. The company's distribution fund — a mixed fund designde in pay out 5 per cent per sunum under the withdrawal facility, was most popular with

overall the group's annual premium business tripled in 1979-from: £3.3m to £9.8m. Group pensions annual premiums remained unchanged at £1.85m. but annual premiums on the permanent health side tripled from £840,000 to £8m. The company markets a competitive short-term sickness scheme.

Total single premiums - last year amounted to £13.5m, against £2m in 1978. Besides the growth in linked life husiness, the company was extremely successful in marketing five-year maximum income honds seling over £11m

cent from £4.85m to £5.47m and

new suma assured improved by 16 per cent from £119m to £138m.

Assurance husiness was even

more huoyant last year, with new annual premiums rising 20 per cent from £2.88m to £3.46m. Almost half this husiness came from sales of mortgage-related

contracts, which remained firm,

nided by the company's involve-ment in the top-up mortgage

OIL AND GAS NEWS

Hibernia oil find is commercial

BY ROBERT GIBBENS IN MONTREAL

CHEVRON STANDARD, a unit of Standard Oil of Callfornia, has confirmed for the first time that the Hiharnia P-15 oil discovery well nearly 200 miles offshore St. JPhn's, Newfoundland, is commercial in

acale. Chevron identified three principal zones of oil accumulation (with some gas) capable of producing al: a rate of 20,000 harrels daily. Additional wells will have to

be drilled to prove the extent of the field and whether the heavy investment required for exploits-Strong growth in new ordinary tuon would be justified. The first step out well. Hibernia P-35, three miles west of Ribernia P-15, commenced on New Year's Day. The cost of drilling the discovery well and testing was between CS40m and

C\$50m (£15m 10 £19m). Chevron is the operator of the venture for a group which includes Mobil Canada, Petro-Ganada, Gulf Canada and Columbia Gas Development Canada. The Hibernia reservoir is about 11.500 feat below the is about 11,500 feel below the

surface of the Atlantic,
A second stap-out well will be started in February, and Mobil Canada is taking over management of the Hibernia exploration programme under an agreement signed earlier. MpbII will sink another well

about 25 miles south-east of Government backed oil con-Hibernia on a separate. Target sortium, reports Dai Hayward depth is 18,500 feet against from Wellington. 16,000 feel for Hibernia. The proposed well is located near the 200-mile limit. Water depth is about 200 feet.

A fixed platform production consortium and PetroCorp. system now used extensivaly in A rig will be brought to the North Sea is being investigated for Hibernia, and alsn a floating gathering system.

The cost of developing the

field and gathering system would run into several hillon dollars. Minimum recoverable reserves will have to be well over 1bn harrels. The high-quality crude could be used in Maritimes Refineries which now import all their supplies. Earllest production could be 1982-83. * *

The oil and gas exploration arm of Diamond Shamrock Corporation has discovered natural gas on Vermillion Block

57 in the Gulf of Mexico.

The discovery well flowed at a rate of 12m cu ft pf gas daily and has an open flow potential of 43m cu ft per day according to Diamond Shamrock. The latter, as operator, bas 25 per cent interest in the well.

along with Kerr McGee Corporation, while Sante Fe Energy holds the remaining 50 per cent. ·* · * The international hunt for pil will resume in New Zealand this year following an agree-

PetroCorp - the New Zealand The agreement followed extensive bargaining between

national oil companies and

A rig will be brought to New Zealand to drill three holes north of the present Maui National Cas offshore field. A spokesman for Shell said work for the \$NZ 40m (£17.7m) project should start by mid-year. Geologists were said to be pptimistic about the project. * * * .

May Petroleum says it has

discovered natural gae on the W. NHes prospect in Canadian County, Oklahoma. The Hubbard No. 1 well fipwed at a daily rate of 2.35m cubic feet of gas at depths at 12,234 to 12,244 feet in the Morrow-Springer formation. The May drilling partner-ships own 50 per cent working interests in the well and 533 acres in the S. W. Niles prpspecl. Other working interests pwners are individuals and private corpprations, according

Chinese geologists have reported a new oil discovery north of the Yangtze River in the northern part of Eastern Jiangsu Provinces, according to ment between three major inter- the New China News Agency. The agency said that large oil and natural gas flows had been Government backed oil con- found in the vicinity of the new well since 1970 and prospecting was still gpiog on.

The pil fipw from the new well at Zhentong indicated gord sentatives, the Shell-BP-Todd Agency added.

Grange Trust rises to £0.62m

FOR THE YEAR to November 30, 1979 pre-tax revenue of Grange Trust turned in £177,383 higher at £617,296. ing only a third of the profits it did in 1975. Hence the rationalisation. The laurels go to

Tax for the period absorbed £205,707 (£155,820), leaving the net balance ahead from £284,003 to £411,499. Earnings per 25p stock unit are shown to have risen from 2.81p to 4.13p, including 0.7p non-recurring, and the total dividend is raised from 2.4p to 3.2p, with a final payment of 2.25p net.

The net asset value per stock at November 30, after deducting prior charges at par, was 103.9p (104p).

Titaghur Jute sees good Indian profit

The Indian operations Titaghur Jute Factory Company will earn useful profits in the 1979/50 year, as already indicated, say the directors, referring to the recent rise in the company's share price.

During the first five months of the year to June 30, 1980, profits in India amount to over 22m, and they expect earnings in that region to continue in the remaining months. The one uncertainty, they say,

is the possibility of Indian Government intervention in the jute industry, as has bappened in the past. However, the operations are bound to earn more in 1979/80 than has previously been possible.

very heavy drain on its financial resources in the past few years. and the directors say it be wreng for them at this stage to bold out any hope that 'ordinary dividends may be resumed because of one "very good year's profit."

The last dividend was paid in 1972. The group has reported isses every year since 1973, reaching £2m in 1976/77. This was cut to £1.26m the following

The directors hope the overall picture will be clearer by the time the accounts for 1978/79 are published, probably about

the end of March.

months

In the six months ended 30th September, 1979 total external turnover amounted to £617.0 million (compared with £581.3 million in the same period last year). Trading profit was £107.1 million (£105.5million). After providing for higher depreciation charges of £53.4 million (£48.2 million) and financing charges of £2.4 million (£3.0 million) pre-tax profits were £51.3 million (£54.3 million). Earnings per share for the period were 22.0p (25.1p) based on the Ordinary shares in issue at 30th September, 1979.

Summary of Results for six

External Turnover

Profits before Tax .

Earnings per share

Ordinary Dividends

per 25p share

The Directors have declared an interim dividend of 4.05p per share, payable on 28th March, 1980 to Ordinary shareholders on the register at the close of business on 6th March, 1980. The interim dividend represents an increase of 12.5% over the interim payment last year and is payable on the additional shares issued in respect of the EMI merger.

The name of the company will formally be changed to THORN EMI Ltd. with effect from 3rd March, 1980

and the results for the year ended 31st March, twelve 1980 will include four months months (from 5th · December, 1979) of 30/9/1979: 30/9/1978 31/3/1979 EMI. Progress has been made towards the 1,208.1 manner in which integration of the Thorn · 118.1 and EMI businesses 55.1p will take place. -13.0p

As a result of the merger with EMI Limited many of the new Thorn Shareholders will not yet be on the Share Register. Therefore, they will not receive a copy of the Thorn Interim Report which is due to be published in the coming week.

Profit-taking on Wall St.

PROFIT-TAKING before the weekend checked a further advance on Wall Street yesterday, after the Stock Market extended its strong advance into a sixth session as prices earlier moved broadly higher in heavy

After rising another 4.27 to 863.23, the Dow Jones Industrial 863.23, the Dow Jones Industrial Average particlly reacted to 859.90 by 1 pm, for a net rise of 0.94 on the day and 31.06 higher on the week. The NYSE All Common Index, 2t \$63.43, gained 18 cents on the day and \$2.26 on the week. Advances led declines hy a nine-to-five majority, while the trading volume expanded 3.59m shares to 38.3m compared with 1 pm westerday.

yesterday.
Analysts said strong demand from cash laden Institutions implementing January reinvestment programmes and a pickup of Foreign interest in U.S. Equities was providing support. A riss in Gold and Silver Bullion prices contributed to gains for Gold and Silver sbares, while other Metals also advanced.

Taksover issues posted good Takegover issues posted good gains as well.

Brokerage stocks were banefitting from the heavy trading volume on Wall Street all week. Gold and Silver issues showed hig gains as the price of Gold jumped \$13 at the London fixing. Active Benguet Consolidated climbed \$11 to \$121. ASA rose \$13 to \$45. Dome Mines \$14 to \$554. Homestake \$1 to \$554 and Hecla Mining \$13 to \$44. Sunshine Mining also improved \$12

Reserve Resources, which is studying a \$65 a sbare cash tender offer prosal from Hudson Bay Mining, jumped \$71 to \$661. Rosario had previously sccepted a bid from Amax for stock. Hudson Bay sdded \$2 at \$25? and Amax St at \$49.

Copper and Aluminium stocks showed gains of a S1, or more, while Steels added fractions. Active Incd rose S11 to S261.

Closing prices for North America were not available

Among Brokerage issues, scrive Merrill Lynch pot on Si to S211, E. F. Hntton S21 to S264. Shearson Loeb Rhoades \$11 to \$251 and Paine Webber \$1 to

Silj.

Deere and Co. were sciive but slipped \$\frac{1}{2}\$ to \$35-a block of 1m shares traded at \$34\frac{1}{2}\$.

Wylain were lifted \$1\frac{1}{2}\$ to \$28\frac{1}{2}\$. Wylain were lifted \$11 to \$25;
—it ancepted an improved \$30;
share tender proposal from
Marley, which added \$1 at \$24;
THE AMERICAN SE Market
Value Index gained 1.28 to
255.73, making a rise of 12.18 on

255.73, making a rise of 12.18 on the week in a turnover of 5.32m (3.66m) shares,
Mining shares were strong.
Volume leader Marindagne "B" gained Sr to S2.14. Atlas Consolidated "B" St to S41. Day Mines \$21 to \$367 and Giant Yellowknife St to \$171.
Raymond Industries advanced \$12 to \$266—it will exchange part

SI to \$261—it will exchange part of its stake in Teleco Oilfield Services for up to 333,333 of its sbares. Teleco Oilfield lost \$11 to \$22 bid, Over-the-Counter.

Canada

A further brosd front advance was recorded in active noon trading yesterday, when the Toronto

ing yesterday, when the Toronto Composite Index climbed 16.5 to 1,900.7 and 12 of 14 Indices posted gains.

The Gold Sharz Index movad up 73.8 to 2,807.3, Metals and Minerals 42.4 to 1,995.8 and Oil and Gas 11.2 to 3.816.5. Utilities put on 1.82 to 254.30. Banks 0.63 to 307.79 and Papers 0.70 to

Hndson Bay Mining rose \$1 to \$30! — it plans an offer for Rosario Resources Corporation. Among Golds, Dome Mines advanced \$2 to \$65, Giant Yellow-knife \$11 to \$191, Campbell Red Lake \$1 to \$341 and Camilo Mines

Sa to \$201.

Base Metals continued upwards. Falconbridge Nickel "A" climbed \$31 to \$104, Inco \$11 to \$301 and Alean Aluminium \$11 to \$641.

Among Real Estate issues Cadillac Fairview improved \$1 to \$241. No-West Development "A" \$1 to \$145 and Daon Development Si to \$141.

HOLLAND

Paris

French and Foreigo shares were marked up across the board in a moderately active pre-weekend session. Market observers said investors had been encouraged by the good Indna performance on Wall Street higher. overnight. The fact that huying In the orders predominated despite a rise in the Call Money rate Friday to 121 per cent from 111 per cent underscored the firm

undertone.
All French sectors were higher spart from some profit-taking in Metals following their firmness earlier this week. Advances led declines 43-to-13 in the International section, where Americans, Germans, Gold Mines and Dutch issues were firm, Canadians steady and

Oils and Coppers mixed.

Germany

Market observers sttributed a general impression of a falling trend toward the end of that trading session to broad declines in certain key sectors, such as Banks and Stores, despits the fact that the overall Index posted a slight increase. Among Stores, Neckermann eased DM 2.00, Karstadt slipped capital operation. Demand on DM 1.56 and Kaufhof DM 1.20. Olivatti was also spurred by Bayerischa Vereinsbank, off orders from sbroad.

DM 1.50, suffered the heaviest drop among Banks. Chemicals and Motors were largely unchanged, while Electricals, Machines, and Utilities were all fairly

narrowly mixed. Brown Boveri gave way to be volatile in a narrow. market.

Switzerland

On continuing large volume. Swiss stocks chalked up further geins, and many easily surpassed their previous psychological barriers.

Heavy Institutional buying for Bank shares and also mora Foreign demand wers mainly seen behind the trand, sparking other investors to go along.

AUSTRALIA

that Egypt is blocking the Suez Canal for Russian ships provoked a new surge in Gold prices, which turned the markst very nervous and tempered optimism some

what. Industrials closed actively In the Foreign sector, Dollar

stocks traded generally above overnight New York closing levels. Dutch Internationals and Germans were naglected. Domestic and Foreign Bonds firmed slightly, apart from Federal Bonds which eased.

Milan :

Prices closed lower for the second straight day under pressure of technical sales triggered by the forthcoming Settlemant day. Sales prevailed throughout in active trading and caused widespread losses.

Selling pressure was focused on Insurance and Bank issues. Italcement and some "big" Industrials such as Fiat and Montedison.

Olivetti closed higher, against the trend — the company might distribute a dividend for 1979 and it also might launch soon 6

Brussels

Stocks closed higher in active trading, elthough foreign sbares did somewhat better than local

In the local list, Oil issues were the best traded stocks of the day, with Petrofina Frs 80 better at 5,660.

Utility shares and non-Farrous Metals gained ground.

Steels were little changed. Chemicals and Holding Securities lost ground.
South African Gold Mines followed the nptrend of the yellow

metal. U.S. shares topped the higher Foreign list, Dutch, German and French stocks were better.

HONDA'S AMERICAN ASSEMBLY PLANT

The small car drives into the U.S. big league

BY KENNETH GOODING, MOTOR INDUSTRY CORRESPONDENT

HONDA'S DECISION to set up growing pace of legislation on joined by Mr. Henry Ford II. Columbus, Ohio, to build a only in 1962, and is still some turnover in 1978-79 of \$4.9bn. a car assembly plant in the U.S. fuel consumption, safety and What has really worried the \$25m motor cycle essembly way behind the leaders in Honda estimated that it pollution-control.

Japanese, bowever, is that plant, and at the same time took Japan. It currently has about 8 needed to produce at least between the current fortunes of the Japanese and American motor industries.

The Japanese carmakers facturers can produce them, entered the 1980s short of Importers have benefited to the manufacturing capacity, extent of taking a record 22 per The Japanese Toyota, Honda and Isuzu have all announced expansion projects for this year in Japan itself. Car plants are continuing to work at close to capacity. In the U.S., bowever, 140,000 of the 757,700 hourly-paid em-

ployees at the car plants have been laid off indefinitely. Chrysler is desperately attempting to atave off collapse, and has even turned to the government for help to bale it out of trouble. Ford faces losses of \$1bn on its American business. Even General Mntors is baying to run hard to keep up with the powerful union voice has been

American new car customers have been snapping up smaller cars faster than the U.S. manucent of the market, representing 2.3m cers in 1979. And some 70 per cent of these imports were made in Japan, so there has been rising pressure for the Japanese to set up plants in the

A long-time critic, Mr. Douglas Fraser, president of the United Autoworkers, commented recently: "I'm getting sick and tired of our trade relationships with Japan, where we give and give and give and they take and take and take with no recipricocity." For some time his

bet up facilities in the U.S. "If they (the Japanese) are going to be as hig a factor in the Japanese car plant. Horda was in no hurry, because the option did not run out until 1982.

But its progress in the U.S. "If they (the Japanese) are going to be as hig a factor in the Japanese car plant. Horda was market. The top three manufacturers are Toyota, with 34 per cent. Nissan (maker of Datsun cars) 29 per cent and with the Japanese car market. The top three manufacturers are Toyota, with 34 per cent. Nissan (maker of Datsun cars) 29 per cent and with the Japanese car market. The top three manufacturers are Toyota, with 34 per cent. Nissan (maker of Datsun cars) 29 per cent and with the Japanese car market. The top three manufacturers are Toyota, with 34 per cent. Nissan (maker of Datsun cars) 29 per cent. huild plants and hring some

employment opportunities bere." Current thinking in the motor business is that a group needs a capacity of around 2m units a year to gain the full benefits of the economies of scale which are considerable in this particular industry.

Honda's car making capacity in Japan is around 800,000, and It plans to add 100,000 more A comple of years ago the of the Japanese market for these group bought a site near vehicles. It built its first cars

Japanese, bowever, is that plant, and at the same time took General Motors' chairman. Mr. an option on adjoining laod for

ket as they have been, then I 40,000 more than the previous think it is high time they did year. The group only started huild plants and hring some selling cars in America in 1970. and less than nine years later its one-millionth took the road. Honda now ranks as the third major car importer in the U.S., led only by Toyota and Nissan. It was to he expected that if any group was to react, Honda would be the first.

Honda made its reputation with motor cycles, and has a commanding 40 per cent share

per cent of the Japanese car

to make the jump into the big league of car makers. The deal with BL in the UK gave one indication of this determination. for the arrangement will give it access to the European market where free expansion of Japanese car sales is blocked in most countries by various re-strictions—imposed either by legislation or on a "voluntary"

THE U.S. Securities and

Exchange Commission bas modi-

fied some of its regulatory attitudes over the past year, said

Mr. Donald L. Calvin, executive vice-president of the New York Stock Exchange in London

yesterday.

The SEC has suggested that

its role is that of an "overseer" rather than an authority impos-

ing its will through regulatory

fiat. For example, said Mr. Calvin, the SEC recently

reversed its approach on the

question of foreign company reporting to U.S. stock markets

away from its previous insist-

ence that they meet full U.S.

domestic requirements.
Mr. Calvin, with Mr. William

AMERICAN MARKETS

NEW YORK, January 11,
POLITICAL UNCERTAINTIES continued to spur the precious metala. Silver was locked limit up with virtually no sales offered. Gold was limit up on sales offered. Gold was limit up on sympathy buying as well as on expectations of accelerated utilisation. Rumours of sew funds at the disposal of the Bogate Group to support coffee orices reliied the market sharply. Arbitrage buying was behind the oteady advance in cocos while the spectacular increases in ougar resulted from a lack of followthrough ealling short the 1.5.0. 1980 quoteo were lifted. There is less and less confidence that producing countries will shot the additional tonnage. Cotton made impressive advances after absorbing heavy profit-taking initiated by an increase in the U.S. crop estimate. Graino and soyabeano reliifed on the close to register moderate gains in anticipation of further government essistates in the markets. Heavy trade and local selling in the livestock complex produced major reversals and lesses, reported Heinold.

UK MONEY MARKET

Bank of England Minimum Leodisg Rate 17 Per ceot Leodisg Rate 17 Per cect are for resale at a future date, (since November 15, 1979) and a small number of corporation for the Treasury bill rate fell by the formal formal

houses and banks, some of which

siderable shortage of credit in ale excess of revenue transfers the money market yesterday, over Government disbursements. This prompted the authorities to buy a large amount of Treasury bills both from the discount money up to 60 per cent

mum occepted hid remained at 158,05. Bids at that level ware met as to about 74 per cent and alsave in full. The £300m bills on offer attracted bids of £548,29m and all bills offered were allotted. Next week a further stock, estimated at up to £900m, a similar amount of maturities.

Thursday's exhaustion of the lang tap proved to be the principal factor in causing a cansiderable shortage of credit in a moder-siderable shortage of credit in as much as credit promises to be scarce enough on Monday owing to the short dated tap to the

New Government stock runs out in first-day dealing Gilts buoyant and £2½ higher despite late reaction

Dealingo tians Dealingo Day Dec. 28 Jan. 10 Jan. 11 Jan. 21 Jan. 14 Jan. 24 Jan. 25 Feb. 4 Jan. 28 Feb. 7 Feb. 8 Feb. 18 " New time " dealings may take place from 9.30 am two business days

An even beavier inflow of twestmeot funds exhausted official supplies of yet another Government stock yesterday, the second in less than 24 hoors. Attention was rivetad on the Gilt-edged market when dealings were due to hegin in the new short tap stock, Exchequer 14 per cent 1984, and it was soon hvious that demand was more than sufficient to take up the

The Covernment broker sold bis supplies at 97, against Thursday's tender price of 961, and the rationing of buying orders to 50 per cent of the total con-sideration auggested that over £1.5hn had been put up for the stock. Exhaustion of the issue a strong injection of confidence

460 70 90

Marks & Sp. Marks & Sp. Marks & Sp. Marks & Sp.

Options tap, longer-dated Gilts surged *First Declara- Last Account forward and, in the absence of announcement regarding replacement issues, established gains stretching to 21 points before reacting in the very late trade. The recently-exhausted long tap Treasury 14 per cent 1998-2001, which ran out on Thursday at 961, touched 991 prior to settling a net 1 up st

> Short-dated stocks were less spectacular, rarely gaining more than a half-point hefore meeting with profit-taking and other general selling which pared rises to minimal proportiona. Over-seas attempts to purchase War Loan 31 per cent were largely unsuccessful hecause of stock shortage and, in this trading, the price jumped nearly a point more to 31. News of the tem-porary release of special porary release of special deposits with effect from next Wednesday came too late to

affect sentiment. Leading shares were bought io anticipation of the Gilt market opening strongly, but interest was insufficient to maintain the firmness and the gains

a net 4.4 bigher at 435.2, after having a rise of 5 points at 10 am whittled down to a mere 0.3 at the 3 pm calculation; on the week, the index registered a gain of 21.3—Its biggest rise ince last March. Southern Rhodesian bonds

improved before and after the statement regarding Rhodesia's sterling deht obligations. The 2½ per cent 1965-70 stock was particularly outstanding at £120, up 8 ponts. Traded options ended the

Account in active mood with 1.007 deals recorded for a week's average of 624. Much of the husiness was transacted in tha soon-to-expire January series, with Land Securities well to the fore with 301 tradas.

Black and Decker staged a quiet London debut; from an opening level of £10‡, the shares touched £10‡ hefore aettling at \$10\$. £101. Among other recently issues equities, Cape influences prompted a useful demand for energy stock SASOL which put on 13 to 175p, after 180p.

Discounts good

Reflecting the huoyant per-formance of gilts, Discount Honses made good progress and closed with double-figure gains in places. Union advanced 15 to 375p and Cater Ryder 13 to 288p. Firmer conditions returned to the major clearing banks where Bank of Scotland came in for considerable support to end the improvad 7 to 342p and Lloyds and Midland were similarly hetter at 302p and 332p respec-

Following Lloyd's of London's decisioo not to give its ruling on foreign ownership of Lloyds brokers until April, Bowring improved 3 afresh to 140p, making a rise of 17 since Monday's announcement from Marsh and McLennan that it is prepared to offer 169p per share for the company's ordinary sheres. Composites closed well below the best. Sun Alitance ended 6 better at 530p, after 542p, while Commercial Union closed 2 barder at 138p, after

made progress although business agaio left a lot to he desired. Magnet and Southerns were notable for a gain of 10 to 140p; the balf-yearly results B came lo for support and, in

of a few pence were gradually after 164p. Housebuilders con-eroded, After the official close, tinued their recent rally with however, values improved again Rush and Tompkins adding 12 to 130p and Fairview Estates improving 4 to 187p. Gozgh Cooper, annual results next Tues-day, firmed 2 for a two-day gain

> ICI slipped to 365p as interest faded before settling o penny cheaper on halance at 366p. Small buying in a market none-too-well supplied with stock lifted Fisons 4 further to 285p for a gain on the week of 23. Fresh speculative interest prompted a gain of 12 to 96p in Arrow and one of 14 to 132p in Leigh Interests.

Kitchen Queen weak

With the exception of Marks and Spencer, which eased a penny to 87p on profit-taking, Store leaders stayed firm. Still reflecting an investment recommendation, Gussles A rose g more to 370p, while Mother-care, 206p, and Burton A, 236p, gained 6 apiece. Raybeck added 3 to 77p; the first-half figures are due on Friday. Improvements of around 8 were commonplace in secondary issues and incloded Comet Radiovision Services, 140p, John Menzies, 208p, Moss Bros., 263p, and Time Products, 66p. Against the trend, per-sistent offerings in an unwilling

Buying interest in the Elec-

34p in Kitchen Queen.

trical sector broadened con-siderably, but many of the resulting gains were exaggerated by stock shortage. Wholesale Fittings advanced 30 to 450p. marked against United Scientific. 380p, and AB Electronic, 148p. Awaiting next Thursday's preliminary figures, Eurotherm rose 12 more to 300p. Electrocomponents, 433p, and Farnell, 244p, gained 8 apiece, while Decca issues continued to reflect hid bopes, the Ordinary rising 5 to 355p and the A a similar amount to 320p. Among the leadars, Thorn finished 2 to the good at 296p following interim results in line with expectations. Engineering leaders ended the day up to 4 better. Elsewhere, selective support ofteo found the market short of stock. Revived demand lifted ML Holdings 12 to 215p, whila compensa-majority of Building tion hopes left Vosper 7 higher Press comment helped Chemring improve 16 to 1160 io

Foods made early progress with retailers again to the fore. J. Sainsbury stood ont, at 303p, up 10, while Associated Dairies added 4 to 182p and Kwik Save put on 7 to 115p. Barker and Dobson picked up 2½ to 242p following Press comment. Savoy A provided the only sig-nificant movement in Hotels and Caterers, firming 6 for a two-day gain of 14 to 117p as specu-lative buying continued.

Friedland Doggart up

Secondary issues provided miscellaneous industrials yester-day. Speculative support fuelled by vague takeover suggestions helped Friedland Doggart rise 15 to 126p, while De La Rue put on a like amount to 600p on share-slimming hopes. Diploma Investments added 13 to 370p and BTR, still responding to a favourable broker's circular. rose 11 more to 302p following a re-appraisal of the preliminary results, Sotheby's rallied 15 to 100p, while Myson jumped 51 to 59p in response to Press comment. Dalgety, 281p, and Vinten, 127p, advanced 12 and 11 res-pectively and North Seo oil fovourites Cawoods and National Carbonising elso gained ground, the former closing 8 higher at 150p and the latter 4 better at rose 20 to 645p and fresh investment support in a thin market left Extel 5 better at 173p. Powell Duffryn revived with 8 6 at 150p. The leaders took their cue from a buoyant gilt market and closed with improvements ranging to 10.

Piccadilly Theatre responded to the good half-yearly results with a gain of 5 to 85p.

Motors finished the Account with useful gains across the board. In Components, Flight Refuelling were again wanted and rose 6 for a week's gain of 22 at 202p. Lucas also improved Engineering closed 3 up at 75 p Among Distributors, Harold Perry rose 5 to 134p, while British Car Auction put on 31 to 57p. Heron provided a rare flat spot following the interim profits standstill and discourag-

31p. Firm immediately ahead of the announcement, Associated Newspapers finally closed 16 an extremely thin market.
CompAir rose 3½ to 75½p for a
similar reason. Yarrow, 310p,
and Babcock, 105p, put on 10
and 5 respectively, while United
Extraorder advanced 6½ to 94p better at 285p following the results which proved to be well in excess of market expectations. Daily Mail A also reported

Firm at the ontset in sym-pathy with Gilt-edged, Proper-ties paused mid-session before moving ahead again in the late dealing. Closing levels were dealing. Closing levels were usually the day's best with Land Securities and MEPC adding 6 apiece to 270p and 176p respec-tively. Keen interest was hemg shown in Law Iand, 3½ to the good at 59½p, and Laing Properties A, 6 higher at 133p.

Lasmo advance

Much of the day's interest in Oils centred on secondary issues.
Assisted hy favourable Press
mention, Lasmo moved ahead to close 30 higher at 380p. Siebens (UK) touched 442p before recovering to close 8 up on balance at 458p, while Viking rose 15 to 610p and Clyde 6 to 326p. Fresh support lifted Premier 31 further to 46p. Among the leaders, British Petroleum drifted off to close 6 down at 330p following adverse Press comment. Shell, bowever, beld steady at 320p.

Overseas Traders were fea-tured by Titaghur Jnte which jumped 17 to 47p on further reflection of the hullish statement which accompanied the interim results; the 6 per cent Preference rose 10 to 48p. Trusts advanced on a broad front, while in Financials, renewed demand lifted London Merchant 6 more to 143p.

Smaller-priced issues held the limelight among Textiles. Stroud Riley Drummond, with interim results due soon, advanced 6 to 42p, while Nova (Jersey) Knit closed 3 np at 41p for a week's gain of 16.
Tricoville added 3 to 63p, still
benefiting from acquisition benefiting from acquisition news, while Sidlaw rose a similar amount to 80p after the preliminary results.

Support was again seen for Bats, S up at 261p for a rise on Rubbers attracted support and double-figure gains were commonplace. Sogomana advanced 22. to 306p, while rises of 10 wera recorded by London Sumatra, 320p, and Castlefield, 330p. Barlow jumped 12 to 100p, while Gnthrie closed 7 640p. Teas responded to Press mention with Williamson, 198p. Assam Dogars, 275p, and McLeod Russell, 290p all up around 8.

Golds sharply higher

The \$23 surge in the bullion prompted renewed beavy buying of South African Colds Gold Mines Index advanced 14.4 a thin market, added 8 to 160p, Eogineeriog advanced 61 to 94p, higher profits and rose 25 to more to 294.9-a two-day gain Cambridge Pet. attack or wants to put down en

that haunted her youth never seem far below the surface. Acting as hostess for her father Prime Minister she had to put up with the frosty criticism of her more erudite and urbene eunt Mrs. Vijayalaksmi Pandit— as Nehru's sister still one of her most powerful critics. Her fether frowned on her marriage to Feroze Gandhi, a lawyer in 1966 the hosses of the Congress Party had little doubt that they could push her around. Over the years she hes grown increasingly suspicious of those who challenge her or dissent from her—a suspicion that bas probably been sharpened by the

of heing distrusted that makes. with Sanjay so important. She and her son will he the two most influential people in India over the next five years. Part of the reason why Sanjay is so disliked in Delhi is because though born of the Nehru fsmily, he seems out of place in Delhi's administrative establiahment. Behind the reticence is an impatient, often hrash, gogetting young man.

Many consider that his mother's attachment to him has blinded her to what have been his shortcomings in the pasthis lack of political judgment. bis simplistic enthusiasm and the lucrative patronage he has trailed behind him. Fear of a repetition of this lies behind much of the apprehension of the unwarranted differentials

Prime Minister. She was edueats sparsely and enormously hard. V her other faults, there is no denying ber dedication.

WOMAN OF THE WEEK

The sweet taste of triumph

BY DAVID HOUSEGO

THE SMILES that heve wreathed Mrs. Indira Gandhi's face as crowds in carnival mood have this week surged through the garden of her New Delhi bome are those of a woman unable to disguise her immense satisfsction.

She enjoys politics and populerity and she hes certainly enjoyed proving wrong by ber massive victory all those at home and ahroad who had written her off. But more than that, her success has brought welcome relief from a three years ordeal io which she and her family have been under constant investigation hy judicial commissions.

Mrs. Gandhi treasures as unique the relationship she has with the Indien people, and she believes that she is uniquely qualified to project the imege of a strong India on the world stage. To have found herself in the dock and bleckballed by many as an outlaw for putting Indis under the Emergency, has been a hittar experience. It has touched the springs of stubborness and gritty determination in ber character so that she now sees her massive majority as a vindication for the record of her previous administration. The only excesses she believes there were in the Emergeocy," declares one of her friends,

eese when responding to large crowds, or else at the other extreme in private conversation in circle. Southern Rhodesia bonds held in London to arrange a have had a chequered history over the past 15 years, fluctuating sharply as hopes of a settleebbed and flowed. One jobber remembers trading 21 per cent 1965-70 for as little as £17.

repayment moves.

As well as the repayment of arrears of capital and interest, a further important factor is the level of any compensation added by the Rhodesian Government for late payment of interest and capital.

That is a point that the Council of Foreign Bondbolders, the body that will represent bondholders in the negotiations, is expected to take

up.
Total Southern Rhodesia debt owed in London and accumulated since 1965, includ-Investors, however, have ing that due to the British steadily pushed up the prices Government and the Common since the beginning of the wealth Development Corpor ing that due to the British Government and the Common-

two clear messages.

The first is that the Omanis want no overt military presence U.S. or British troops. The second is that Oman, like Turkey, which the Foreign Secretary visited this week, is as concerned by the implications of the possible Balkanisation of Iran as by the direct threat thet the Russians pose from Afghanistan.

Oman has apparently offered the U.S. facilities limited to re-fuelling and staging facilities for ships and aircraft as needed, but nothing that would require a permanent American presence.
The Omanis' particular concern is the threet posed to them hy the Communist Government of South Yemen on their Western border.

However, their reaction to Lord Carrington's visit, and to the U.S. request for facilities for its proposed rapid deployment force, bas been measured. While recognising the Soviet threat, and while anxious to acquire and pay for training and equipment, they would regard overt military presence on Omani soil as counter-productive.

About 150 British loan Service personnel serve with the Sultan of Oman's Armed Forces, also 400 contract personnel. Over the longer term, the plan is slowly to run down the British military presence.

THE LEX COLUMN

Trigger-happy in gilt-edged

Every so often in the gilt-edged market the pile-up of investible funds b irresistible. A triggerfunds times a clumpsy leap in Minimum Lending Rate, more usually an impenetrable statistic like the level of interest-hearing eligible liabilities—destroys the unstable equilibrium and the berd of institutional fund managers and bank treasurers around the City stampedes into

This week provided a classic example of the herd springing into motion. At 10 o'clock on Thursday morning the Government offered £1bn ef a new short tap stock, Exchequer 14 per cent 1984, at a minimum price of 964. There were few takers. Yet by 10 o'clock yesterday morning the jobbers had been deluged with orders for the stock. The Government broker could have disposed of bis unsold supplies probably some £800m worth twice over. Sensibly, he stepped his price np to 97.

What had happened in the meantime? It is hard to be sure. The figures issued on Thursday December's Central Government borrowing requirement were indifferent. But perhaps they were not as bad as the market been expecting. At any rate, the jobbers decided that it bad become too risk to carry on their major bear position in the long tap, Treasury 14 per cent 1998-2001. They, together with gemine investment buyers, swallowed up the £400m or so the Government broker had left. That finally triggered off the

buying stampede next morning.
Longs are showing substantial
gains on the week, some 24
points for Treasury 14 per cent. But there is indigestion in the shorts; and yesterday morning's buyers of the short tap were soon regretting their haste, for the stock was showing them a

small loss by the close.

It was just as well that the authorities decided not to launch a Friday afternoon tap stock. As it was, they saved up an announcement for well after hours on the release of special deposits. Tax payments at this time of year often cause tha Bank of England to juggle with special deposits in order to relieve pressure on the banking system. The sale of £1.4bn of taps in sbort order made such

move urgent. As usual, developments in gilt-edeed beve been mirrored in equities. The F.T. 30-Share Index rose 4.4 to 435.2 is much in line with the chair-

chinks of financial light. On there has been little to get cheerful about

The week began with some disturbing news about cost pressures on companies, the official wholesale indices showing that raw material costs had risen by almost 26 per cent in the year prices on home sales had risen less than 16 per cent, and on exports probably by less. Yes-terday, confirmation of the impact of these trends on profits came from the Central Statistical Office, with estimates for profits of industrial and commercial companies after stripping out the juicy returns in the North Sea sector (which are now well over £1bn each quarter).

Net of the North Sea and stock-appreciation, profits fell by more than a tenth in the third quarter of 1979, and although not too much should be read into a single quarter's up at 285p.

figures, the trend is unmistak.

Able in the drop of 5 per cent taking the first three-quarters amounted to about £25.5m, comstrikes, and the first quarter of period last year. But the steel strike looms threateningly, and the cost pressures look; as bad

Five reasons for investing with Fidelity

A new opportunity

American and Canadian stockmarkets carently account for 57% of all world markets and, following the abolition of exchange controls, all UK investors should now have a good proportion of their investments in these areas to benefit from the market opportunities available. These include sectors such as airlines, health care, gold and natural resources. advanced electronics and defence, which are

hardly covered in the UK stockmarket.

By investing in the new Fidelity American
Trust you can also gain the following five 1. Investment team in America

Fidelity Group's senior investment managers

Investment advice is provided by one of the

based in Boston, and supported by a team of over sixty analysts and managers, in close contact with hundreds of American companies. The advantage of this American based investment team is unique to UK unit trusts. 2. \$7.500 million managed The Fidelity Group is the largest unit trust manager in the USA. They have offices in Boston, New York, Tokyo, Bermada and

London, and over 450,000 private investors 3. Performance record The Fidelity Group are well-known for their good performance record in the USA. The Fidelity range of "offshore" funds has

consistently out-performed the relevant

stockmarket indices.

4. Portfolio of American "special situations"

The Fidelity American Trust will be actively managed with the emphasis on careful stock selection seeking exceptional capital growth situations from amongst the tens of thousands of quoted North American stocks. The portfolio emphasis, as for instance between small and large companies, will be continually changed to maximise opportunities. Currently larger companies are being bought. The portfolio breakdown is currently: growth/ technology 22%; defence/aerospace 22%; gold/silver/metals 14%; pharmacenticals/medical 10%; energy 9%; airlines 4%; cable—TV 4%; other "special situations" 14%. Of this perfolio 14% is Canadian.

5. Fidelity switching service Fidelity International Management Limited have just launched four new authorised unit trusts - the others are: Special Situations, Growth + Income and Fixed Interest. Investors may switch between all four trusts at an initial charge of only 2% (compared with normal 5%).

Investors should regard their purchase as a medium to long-term investment: the price of nuits and the income from them may go down as well as up. How to invest
